CANADA

BUREAU FÉDÉRAL DE LA STATISTIQUE

STATISTIQUES VITALES 1921

PREMIER RAPPORT ANNUEL

Publié par ordre de l'Honorable Thos. A. Low, M.P.,
Ministre du Commerce

OTTAWA
F. A. ACLAND
IMPRIMEUR DE SA TRÈS EXCELLENTE MAJESTÉ LE ROI
1923

ERRATA

Page 99.—Tableau 14—Lisez 18062 au lieu de 13062.

Pages 2, 16, 635, 641.—Springhill devrait figurer parmi les villes de 5,000 — 10,000 au lieu des villes de 1,000 — 5,000.

Pages 94, 95, 96.—L'en-tête devrait être "..... cités et villes de 10,000 de population, etc." au lieu de "..... cités et villes de 1,000 habitants, etc.".

TABLE DES MATIÈRES

	Page
Préface	v–x
Introduction aux tableaux	xi–xix

NAISSANCES

Tableau 1.—Naissances dans le territoire d'enregistrement, par mois, en 1921 et 1920	1
Tableau 2.—Naissances dans les provinces, les cités et les villes en chaque mois de 1921	2–15
Tableau 3.—Naissances classifiées comme légitimes ou illégitimes et comme simple double ou triple par sexes, 1921	16–27
Tableau 4.—Naissances classifiées selon l'âge des parents, 1921	28–43
Tableau 5.—Naissances classifiées selon le lieu de naissance des parents, 1921	44–57
Tableau 6.—Naissances selon l'origine raciale des parents, 1921	58–69
Tableau 7.—Naissances, répartition numérique des pères et mères selon l'origine, 1921	68–69

MORTALITÉ INFANTILE

Tableau 8.—Décès d'enfants de moins d'un an, en 1921	70
Tableau 9.—Mortalité enfantine dans le territoire d'enregistrement par mois, 1920 et 1921	71
Tableau 10.—Décès d'enfants de moins d'un an dans chacun des mois par comtés, cités, etc., 1921	72–77
Tableau 11.—Enfants décédés dans leur première année d'existence par mois et causes de décès en 1921	78–93

MORTALITÉ GÉNÉRALE

Tableau 12.—Décès, Résumé générale par provinces, comtés, cités et villes de 10,000 habitants et au-dessus, 1921	94–96
Tableau 13.—Décès dans les divisions d'enregistrement par mois, 1921 et 1920	97
Tableau 14.—Décès par âges, individuels et par groupes d'âges, 1921	98–101
Tableau 15.—Décès classifiés selon l'origine raciale des décédés, par provinces, 1921.	102–103
Tableau 16.—Décès classifiés par lieu de naissance des décédés pour provinces, cités et villes de 10,000 habitants et plus, 1921	104–109
Tableau 17.—Décès classifiés selon le lieu de naissance des parents des décédés, 1921.	110–125

MORTALITÉ PAR CAUSES DE DÉCÈS

Tableau 18.—Causes de décès par totaux pour chaque sexe par provinces, 1921	126–133
Tableau 19.—Causes de décès dans chaque période d'âge par provinces, 1921	134–263
Tableau 20.—Causes de décès dans chaque période, d'âge pour cités de 40,000 et plus, 1921	264–387
Tableau 21.—Causes de décès selon la nativité, l'état civil et le mois de décès par provinces, 1921	388–513
Tableau 22.—Causes de décès selon la nativité, l'état civil et le mois de décès pour cités de 40,000 et plus, 1921	514–633

MARIAGES

Tableau 23.—Mariages au Canada (territoire d'enregistrement) par mois 1921 et 1920	634
Tableau 24.—Mariages enregistrés durant chaque mois, 1921	635–640
Tableau 25.—Mariages—Etat civil des conjoints, 1921	641–647
Tableau 26.—Mariages—Ages des mariés, 1921	648–657
Tableau 27.—Mariages—Lieu de naissance des mariés, 1921	658–671
Tableau 28.—Mariages selon la religion des conjoints, 1921	672–679
Tableau 29.—Mariages—Instruction des mariés selon le lieu de naissance	680

PRÉFACE

Ceci est le premier rapport annuel sur les statistiques vitales, élaboré et approfondi, qui ait été publié au Canada. Ces données ont été colligées et compilées sous les dispositions de l'arrangement, établissant la coopération du Bureau Fédéral de la Statistique avec les autorités provinciales, conclu à la Conférence de 1918. Il n'est pas inutile de donner ici un bref aperçu de l'origine et du but de cette convention, ainsi que du développement antérieur des statistiques vitales canadiennes.

Point n'est besoin d'insister sur l'importance des statistiques vitales et leur coordination sur une base nationale. Non seulement elles sont nécessaires pour la prévention de la criminalité et pour faciliter la dévolution des biens, mais elles gouvernent tout ce qui touche à l'hygiène publique et forment la base de toute étude de l'actif le plus important d'un état—sa population. Avec le recensement, qui constitue l'inventaire national et la statistique de la migration, qui constate les entrées et les sorties du pays, de même que les statistiques vitales relatent les changements dus aux causes naturelles, elles complètent l'ensemble des statistiques de la population. C'est pourquoi les statistiques vitales figurent dans la Loi de la Statistique de 1918, parmi les sujets à traiter annuellement par le Bureau, en raison de leur importance nationale et aussi parce que, même dans les cas d'application purement locale, elles doivent reposer sur la base la plus large qui soit possible.

Antérieurement à 1920, les seules statistiques vitales du Canada étaient celles de certains gouvernements provinciaux; malheureusement, elles n'avaient pas un caractère national. L'une des provinces se désintéressait de l'enregistrement des naissances et des décès. Dans les autres, la législation et les méthodes différaient largement; par exemple, la classification internationale des décès n'était pas universellement observée et chaque province procédait, à sa manière propre, au recueil, à la compilation et à la présentation des résultats. Sur les 24 questions figurant ordinairement aux certificats de décès, deux provinces en omettaient 16, une autre 15 et une autre 13. Les règlements administratifs, rendant obligatoires les déclarations d'état civil, différaient entre les provinces et parfois même dans la même province d'une année à l'autre. Cela étant, on arrivait bien à assembler certains totaux, mais ils étaient nécessairement incomplets et, d'ailleurs, insuffisants aux besoins d'un système national de statistiques vitales.

Deux tentatives avaient été faites dans le passé pour remédier à cette situation. En l'année 1882, le gouvernement fédéral avait organisé un système de statistiques de la mortalité dans les cités ayant au moins 25,000 habitants, en subventionnant les bureaux municipaux d'hygiène, chargés de fournir les informations nécessaires. Au début, ce système fonctionna dans cinq cités: Montréal, Toronto, Hamilton, Halifax et St-John, mais dès 1891, il s'étendait à 25 cités. A ce moment, les naissances et les décès étaient constatés uniquement par les municipalités. Lorsqu'on créa les statistiques provinciales, le gouvernement fédéral abandonna son système. Toutefois, presque au même moment, c'est-à-dire en 1893, on convoqua une conférence des fonctionnaires fédéraux et provinciaux, lesquels reconnurent la nécessité d'une étroite collaboration entre les autorités fédérale et provinciales, dans les opérations de recueil, de compilation et de publication des statistiques vitales du Canada.

La seconde tentative fut faite par le moyen du recensement. En vertu des dispositions de la loi originaire sur le recensement, on ajouta aux informations requises une série de questions sur le nombre et les causes des décès survenus dans chaque famille au cours de l'année précédente. Malheureusement, les

résultats furent décevants; d'une part, au moins un cinquième des décès était oublié et d'autre part, la cause du décès, dont l'importance est primordiale, n'était donnée que d'une manière évasive. Cet échec fut attribué particllement au déplacement de la population, aux défaillances de mémoire ou au manque de connaissances chez les personnes donnant les informations, ainsi, d'ailleurs, qu'à l'inexpérience des employés du recensement. Même si les résultats eussent été différents, la statistique de la mortalité prise à intervalles de dix ans n'a qu'une valeur très restreinte. De plus, les statistiques des naissances et des mariages ne le cèdent en rien comme importance à celles de la mortalité. L'impossibilité d'obtenir des statistiques vitales exactes, par le moyen du recensement, a été reconnue depuis de nombreuses années aux Etats-Unis, en France, en Allemagne et dans d'autres pays.

Lorsque le Bureau Fédéral de la Statistique fut établi, en 1918, il eut à résoudre le problème des statistiques vitales; à cette fin, il reprit la direction indiquées en 1893, c'est-à-dire l'établissement d'une étroite et permanente coopération entre les gouvernements fédéral et provinciaux. Un mémoire auquel était annexé un projet de loi provinciale et des modèles de formules d'enregistrement fut d'abord rédigé, après une étude approfondie de la législation et de la procédure en la matière existant tant dans les provinces que dans d'autres pays. Ce mémoire fut officieusement communiqué aux départements provinciaux, plusieurs desquels suggérèrent d'utiles modifications. En résumé, le plan dressé par le Bureau concluait ainsi: (1) chaque province devait opérer les réformes nécessaires pour amener sa législation et ses règlements administratifs à un niveau déterminé; (2) le Bureau devait agir (a) comme agent de liaison entre les provinces, pour le maintien de l'uniformité et (b) comme bureau central pour la compilation et la tabulation des résultats. Comme tel, le Bureau s'engageait à fournir gratuitement aux provinces les formules uniformes et à payer aux provinces le coût des duplicata d'actes d'état civil qu'elles lui enverraient. Evidemment, d'après ce système, chaque province conservait le droit de tirer parti de ses statistiques pour ses besoins personnels et, d'ailleurs, le plan général demeurait susceptible d'améliorations. Il était à peu près copié sur celui des Etats-Unis et d'autres pays, dont les institutions et la forme de gouvernemet ressemblent à ceux du Canada.

Après un échange de correspondance, le Bureau Fédéral de la Statistique convoquait, à Ottawa, en juin 1918, les fonctionnaires provinciaux en vue d'une discussion finale et d'une décision. Outre les représentants des ministres provinciaux, qui, avec les délégués du Bureau constituaient les principaux intéressés, d'autres branches de l'administration fédérale, telles que la division des assurances, la division de l'immigration, le ministère des pensions et la commission de conservation, étaient également représentés; y prenaient part également, des délégués de la Société Américaine des Actuaires, de l'Association médicale Canadienne, de l'Union des Municipalités canadiennes et de la Ligue d'Embellissement des Municipalités du Canada. Enfin, le Bureau du Recensement des Etats-Unis avait eu l'obligeance d'envoyer à cette conférence le chef de sa division des statistiques vitales.

A l'ordre du jour de la Conférence figuraient quatre questions principales; la première affirmait le principe de l'enregistrement et, comme corollaire, la cessation du recensement mortuaire décennal. La seconde établissait le principe de la coopération des autorités fédérale et provinciales, sous un plan de législation et de procédure uniformes. En troisième lieu, le projet de loi et les modèles de formules furent discutés dans tous leurs détails et approuvés avec quelques modifications. Finalement, le rôle du Bureau Fédéral de la Statistique fut défini par un projet d'arrêté ministériel. Le texte des résolutions adoptées par la conférence et les termes de l'arrêté ministériel qui furent plus tard approuvés et reçurent la sanction du Cabinet sous la date du 22 avril 1919, sont donnés plus loin.

Depuis cette conférence, des progrès constants ont été réalisés dans la mise à exécution de ce plan. Les provinces de la Nouvelle-Ecosse et de l'île du Prince-Edouard firent adopter le projet de loi par leur législature, avec certains changements nécessités par les conditions locales. Le Nouveau-Brunswick, autorisé par sa loi sur l'hygiène à établir un système de statistiques vitales au moyen d'un simple arrêté ministériel, employait cette voie pour la mise en vigueur des mêmes dispositions. Les provinces d'Ontario, du Manitoba, de la Saskatchewan, de l'Alberta et de la Colombie Britannique amendèrent leur législation, de manière à la rendre conforme aux principes adoptés. Dans toutes les provinces ci-dessus nommées, les actes de naissance et de décès doivent être dressés sur des formules uniformes, préparées et fournies par le Bureau Fédéral de la Statistique.

En ce qui concerne Québec, les principes contenus en cette loi modèle n'ont pas encore été adoptés et les actes d'état civil n'y sont pas dressés sur les formules établies par le Bureau. C'est pourquoi cette province ne figure pas dans les données du présent rapport.

Le rapport que nous présentons aujourd'hui traite des naissances, décès et mariages survenus dans huit provinces canadiennes en l'année 1921. On espère que les détails plus complets seront donnés dans les futurs rapports, et particulièrement, certaines analyses que l'on n'a pas cru devoir faire sur les opérations de la première année. Le Bureau a également l'intention de publier, dans les intervalles, des rapports périodiques, spécialement sur la mortalité dans les cités, dès que l'organisation du travail aura été suffisamment perfectionnée.

Les données ont été colligées et le rapport préparé sous la direction de M. E. S. Macphail.

R. H. COATS,
Statisticien du Dominion.

Bureau Fédéral de la Statistique,
16 janvier 1923.

APPENDICE I.—Résolutions adoptées à la Conférence de 1918

1. *Suppression de la statistique de la mortalité au recensement décennal.*—La conférence, après examen de la statistique de la mortalité obtenue par les recensements de 1901 et 1911, approuve la suggestion faite par le Bureau Fédéral de la Statistique de cesser toute investigation de cette nature.

2. *Coopération fédérale et provinciale.*—Il est résolu que l'organisation d'un système de statistiques vitales au Canada est une nécessité impérieuse au moment actuel. Ces statistiques (*a*) devant embrasser les naissances, les décès et les mariages; (*b*) être colligées annuellement et (*c*) être recueillies, compilées et publiées de telle manière que l'on puisse établir des comparaisons entre les différentes localités et provinces de la Puissance, aussi bien qu'entre le Canada et les autres pays.

Que la meilleure méthode d'établir ces statistiques réside dans une étroite coopération entre le gouvernement fédéral et les gouvernements provinciaux, selon les modalités prévues par la loi de la Statistique, articles 9 et 34.

Que le principe général devant servir de base à cette coopération sera (1) la mise en vigueur par les provinces d'une législation uniforme et l'adoption de méthodes d'application similaires; (2) l'engagement pris par le Bureau Fédéral de la Statistique (*a*) de coordonner les efforts de toutes les provinces en vue du maintien d'une parfaite homogénéité d'action et de corroborer avec elles, en autant que cela sera nécessaire; (*b*) de se procurer toutes les données nécessaires en opérant le recensement de la population.

3. *Uniformisation des statistiques vitales provinciales.*—Attendu qu'il est essentiel pour la réalisation de ce plan, que les lois, règlements, formules, etc., des différentes provinces soient établis sur les mêmes principes généraux et qu'il soit créé un mode d'enregistrement fonctionnant d'une manière uniforme; enfin, qu'il existe un même étalon d'efficacité statistique, afin que la situation de chaque province puisse être soumise à l'analyse et à la comparaison avec celle des autres provinces ou d'autres territoires équivalents.

Et attendu qu'il est de l'opinion de la conférence, qu'en vue d'établir la coopération entre les autorités fédérale et provinciales, comme elle existe aux Etats-Unis, en Australie et dans d'autres pays constitués par des états fédérés. la première phase consiste à imposer aux provinces l'uniformité en matière de législation et d'administration.

Il est par conséquent résolu: (*a*) Que le projet de loi sur les statistiques vitales, tel que modifié par le comité nommé à cette conférence, ainsi que les formules qui l'accompagnent, soient acceptés comme base d'uniformité de législation, sans préjudice toutefois aux droits de chaque province d'apporter au texte les modifications de détail nécessaires pour l'adaptation aux conditions locales, mais sans apporter de changement matériel aux clauses essentielles de la loi, ni aux formules qui en forment partie;

(*b*) Qu'en ce qui concerne les naissances et les décès, il soit adhéré aux règles de la pratique de la statistique, telles qu'adoptées par l'Association Statistique Américaine, dans la mesure où elles peuvent être appliquées au Canada;

(*c*) Que la statistique de la mortalité repose sur la nomenclature internationale des causes de décès;

(*d*) Qu'il est désirable qu'aucun changement, soit au projet de loi, soit aux formules présentement approuvées, ne soit effectué par une province quelconque sans avoir au préalable soumis le texte nouveau et les raisons qui militent en faveur de ce changement au Statisticien du Dominion, qui communiquera immédiatement aux autres gouvernements provinciaux copie des changements proposés; et, de plus, qu'aucun changement ne puisse y être fait, qui soit de nature à amoindrir en quelque manière l'efficacité des mesures considérées comme essentielles au succès du plan des statistiques vitales nationales.

APPENDICE II.—Arrêté en Conseil sur les statistiques vitales, du 22 avril 1919 (C.P. 693)

Attendu que le ministre par interim du Commerce expose: Que dans le but de découvrir le moyen de prévenir tout double emploi et d'assurer l'uniformité des méthodes de recueil, de compilation et de publication des statistiques des mariages, naissances et décès, entre le Bureau Fédéral de la Statistique et les autorités statistiques des gouvernements provinciaux, deux conférences, l'une en juin 1918 et l'autre en décembre de la même année, ont eu lieu entre les fonctionnaires fédéraux et provinciaux, auxquelles ont été prises les décisions suivantes:—

(1) Que le projet ou modèle de loi sur les statistiques vitales, préparées par le Bureau Fédéral de la Statistique, ratifié par ces conférences, formera désormais la base de la législation des différentes provinces en matière de statistiques vitales.

(2) Que les provinces exigeront que les actes de mariage, de naissance et de décès soient rédigés sur les formules prescrites, approuvées et adoptées à la conférence de décembre, le Bureau Fédéral de la Statistique devant fournir gratuitement ces formules.

(3) Que les provinces transmettront au Bureau Fédéral de la Statistique, périodiquement, soit l'original lui-même des actes de naissance, de mariage et de décès, soit des copies certifiées et que le Bureau Fédéral de la Statistique se chargera de leur compilation mécanique et de leur relevé sous forme tabulaire.

Par conséquent, Son Excellence le Gouverneur Général en conseil, dans le but d'établir une base mutuellement satisfaisante de coopération, entre le Ministre et les autorités provinciales, sanctionne les règles suivantes:

RÈGLES

1. Le Bureau Fédéral de la Statistique peut recevoir des copies, certifiées ou non, des actes originaux de mariage, de naissance et de décès, dressés par les ministres des différentes religions, les médecins, les entrepreneurs de pompes funèbres ou toutes autres personnes qualifiées à cet effet.

2. Ces copies seront transmises au Bureau Fédéral de la Statistique, soit trimestriellement, soit mensuellement, selon une entente à intervenir, par le département chargé dans chaque province de l'application de la loi sur les statistiques vitales.

3. Le Ministre peut payer au régistraire général telle rémunération qui sera mutuellement déterminée, pour chaque copie régulièrement établie d'acte de naissance, de mariage ou de décès, qui aurait été transmise; le Ministre peut aussi imprimer et fournir gratuitement les formules devant servir à la rédaction de ces actes, par les ministres des différentes religions, médecins, entrepreneurs de pompes funèbres, etc.

4. Les dispositions de l'article précédent ne s'opposent pas à ce que, le cas échéant, l'original lui-même des actes d'état civil soit envoyé au Bureau, qui le retournera après compilation, en vue de simplifier le travail et de réaliser une économie.

5. Le Bureau Fédéral de la Statistique procèdera à la compilation, au relevé tabulaire et à la publication des données ainsi recueillies, pour l'ensemble de la Puissance; il peut fournir mensuellement ou trimestriellement, à chaque province, les compilations des données la concernant, après entente à cet égard.

6. Le Bureau Fédéral de la Statistique est également chargé de coordonner les statistiques de l'immigration et de l'émigration avec les statistiques vitales; il devra de plus, en procédant au recensement de la population, se procurer les données nécessitées par les statistiques vitales et en faire la compilation.

7. Le Ministre peut, de temps à autre, prélever sur les crédits affectés au Bureau Fédéral de la Statistique, une somme n'excédant pas $2,000 et la consacrer au paiement des dépenses d'un représentant de chaque province, qui assistera à une conférence des statisticiens tenue à Ottawa. Cette conférence aura pour objet de resserrer les liens unissant les statisticiens des provinces à ceux de la Puissance; de rendre plus étroite la coopération entre les différentes administrations intéressées; de suggérer l'emploi de moyens efficaces, de faire servir les statistiques vitales à l'amélioration de l'hygiène publique et aux besoins de la justice, y compris de temps à autre la révision de la classification des causes de décès; de maintenir l'uniformité de méthode, de recueil, de conservation et de compilation des actes d'état civil, ainsi que de la publication des données statistiques en découlant; enfin, et d'une manière générale, de traiter de toutes les questions intéressant les statistiques vitales.

8. Après chaque révision décennale de la classification internationale des maladies et des causes de décès le ministre peut éditer un "manuel de la liste internationale des causes de décès", lequel contiendra (1) les termes de la liste française, ou tous ceux d'entre eux ayant un équivalent en anglais (2) les termes usités par les médecins canadiens pour indiquer les causes de décès.

9. Le ministre peut aussi éditer et fournir gratuitement aux régistraires des provinces, pour être par eux distribuée aux médecins de leur province, une édition de poche de la liste internationale des causes de décès.

19. Les dispositions qui précèdent s'appliqueront uniquement aux provinces qui établiront la "Loi modèle" comme base de leurs opérations sur les statistiques vitales, ou bien qui adopteront une législation conforme aux caractères distinctifs, de cette loi modèle, et à la condition que les formules fournies par le Bureau Fédéral de la Statistique serviront à l'usage auquel elles sont destinées et pourvu enfin que chaque province démontre que 90 pour cent au moins de tous les mariages, naissances et décès survenus au cours de chaque année, ont été portés à la connaissance des autorités.

Le ministre dont il est parlé ci-dessus sera le Ministre du Commerce.

(Signé) RODOLPHE BOUDREAU,
Greffier du Conseil Privé.

STATISTIQUES VITALES CANADA, 1921

PREMIER RAPPORT ANNUEL

Résumé général

Ce rapport présente les statistiques des naissances, des décès et des mariages pour les huit provinces:—Ile du Prince-Edouard, Nouvelle-Ecosse, Nouveau-Brunswick, Ontario, Manitoba, Saskatchewan, Alberta et Colombie Britannique —coopérant avec le Bureau Fédéral de la Statistique à cet égard. La population de ces huit provinces, au recensement du premier juin 1921, était de 6,414,654 habitants, soit plus de 73 p.c. de la population totale des territoires organisés de la Puissance.

Naissances

Au cours de l'année 1921, il est né dans ces huit provinces 168,979 enfants vivants, dont 165,036 sont des naissances simples, 1,937 naissances doubles (3,874 enfants) et 23 naissances triples (69 nouveaux-nés); en 1920, ces naissances s'étaient élevées au nombre de 166,741, dont 162,800 naissances simples, 1,921 naissances doubles et 33 naissances triples. En 1921, sur 1,000 naissances, 516 nouveaux-nés appartenaient au sexe masculin et 484 au sexe féminin, tandis qu'en 1920 on comptait 514 garçons pour 486 filles.

Le taux des naissances en 1921 fut sensiblement égal à celui de 1920, quoique très légèrement inférieur. En 1921, l'augmentation naturelle de la population de ces huit provinces, après déduction des décès, s'est élevée à 101,257 habitants, comparativement à 89,019 en 1920.

TABLEAU 1—NAISSANCES

Provinces	1921			1920		
	Population	Naissances (1)		Pop. en milliers d'hab. (2)	Naissances (1)	
		Nombre absolu	Par 1,000 habitants		Nombre absolu	Par 1,000 habitants
Ile du Prince-Edouard	88,615	2,156	24·3	89	2,301	25·9
Nouvelle-Ecosse	523,837	13,021	24·9	520	13,181	25·3

Alberta	588,454	16,561	28·1	570	16,531	29·0
Colombie Britannique	524,582	10,653	20·3	511	10,492	20·5
Totaux	6,414,654	168,979	26·3	6,272	166,741	26·5

(1) A l'exclusion des mort-nés. (2) Approximativement. (3) Sans y comprendre le comté de Kent.

Naissances illégitimes

Sur les 168,979 enfants vivants dont la naissance a été constatée en 1921, dans les huit provinces ci-dessus, 3,347 soit 2 pour cent, étaient nés hors mariage.

TABLEAU 2—NAISSANCES ILLÉGITIMES, PAR PROVINCE, ET ÂGE DES MÈRES

Le tableau 4 indique le pourcentage des sexes chez les enfants nés vivants dans chaque province en 1921. On y voit que l'île du Prince-Edouard est la seule province où les filles excèdent le nombre des garçons.

TABLEAU 4—NAISSANCES PAR SEXES ET LEUR PROPORTION RESPECTIVE, 1921

Provinces	Naissances, 1921					
	Total	Garçons		Filles		Garçons pour 1,000 filles
		Nombre absolu	Pourcentage du total	Nombre absolu	Pourcentage du total	
Ile du Prince-Edouard	2,156	1,073	49·8	1,083	50·2	999
Nouvelle-Ecosse	13,021	6,695	51·4	6,326	48·6	1,058
Nouveau-Brunswick	11,465	5,942	51·8	5,523	48·2	1,073
Ontario	74,152	38,307	51·7	35,845	48·3	1,069

Colombie Britannique	10,653	5,549	52·1	5,104	47·9	1,087
Total	168,979	87,134	51·6	81,845	48·4	1,065

Mortalité infantile

Etant donné que les taux de la mortalité infantile sont basés sur le nombre des naissances, il est indispensable de lui accorder une place spéciale dans les statistiques des naissances. On trouvera, dans la section consacrée à la mortalité, des tableaux indiquant les décès des enfants de moins d'un an, dans chaque province. Plus de 10 pour cent de tous les enfants nés en 1920 sont morts dans la première année de leur vie. En 1921, cette proportion descendit à 8.8 pour cent, soit 14,893 décès sur un total de 168,979 naissances. Les décès des enfants âgés de moins d'un an représentaient 22.0 pour cent de la totalité des décès en 1921, comparativement à 21.5 pour cent en 1920. Dans presque toutes les provinces, le taux de la mortalité infantile, par 1,000 naissances d'enfants vivants est plus bas en 1921 qu'en 1920.

TABLEAU 5—MORTALITÉ INFANTILE EN 1921 ET 1920—TOTAUX PAR PROVINCE, ET POURCENTAGE PAR 1,000 NAISSANCES VIVANTES

Provinces	Enfants nés vivants 1921	Nouveaux-nés morts en 1921		Enfants nés vivants 1920	Nouveaux-nés morts en 1920	
		Nombre	Taux par 1,000 naissances		Nombre	Taux par 1,000 naissances
Ile du Prince-Edouard	2,156	180	83·5	2,301	184	80·0
Nouvelle-Ecosse	13,021	1,311	100·7	13,181	1,537	116·6
Nouveau-Brunswick	11,465	1,299	113·3	10,778	1,454	134·9
Ontario	74,152	6,763	91·2	72,297	7,497	103·7
Manitoba	18,478	1,533	83·0	18,322	1,882	102·7
Saskatchewan	22,493	1,814	80·6	22,839	1,958	85·7
Alberta	16,561	1,391	84·0	16,531	1,545	93·5
Colombie Britannique	10,653	602	56·5	10,492	638	60·8
Totaux	168,979	14,893	88·1	166,741	16,695	100·1

En dressant le tableau 6 on a supposé que les enfants dont le décès est signalé sont morts dans l'année même de leur naissance. En fait, un certain nombre d'enfants de moins d'un an, décédés au cours de l'année civile 1921,

étaient nés en 1920. Mais, prenant les années l'une dans l'autre, les chiffres de ce tableau représentent équitablement la relation entre le nombre des décès infantiles survenant dans une certaine année et le nombre des naissances de la même année.

On voit par ce tableau que la mortalité infantile a sévi avec plus de rigueur chez les garçons que chez les filles; en effet, à leur naissance, le nombre des garçons excédait celui des filles de 5,289 et, cependant, à la fin de l'année, cette supériorité était réduite à 3,066. Dans les huit provinces qui nous occupent, le taux des décès par 1,000 naissances était de 98 pour les garçons, de 77 pour les filles et de 88.1 par 1,000 naissances pour les deux sexes.

TABLEAU 6—PROPORTION DE LA MORTALITÉ INFANTILE PAR RAPPORT AUX NAISSANCES VIVANTES ET PAR SEXES, EN 1921

Provinces	Garçons			Filles			Deux sexes. Décès par 1,000 naissances
	Enfants nés vivants	Décédés dans leur première année		Enfants nés vivants	Décédées dans leur première année		
		Nombre absolu	Par 1,000 naissances		Nombre absolu	Par 1,000 naissances	
Ile du Prince-Edouard	1,073	95	88	1,083	85	80	83·5
Nouvelle-Ecosse	6,695	738	110	6,326	573	90	100·7
Nouveau-Brunswick	5,942	740	124	5,523	559	101	113·3
Ontario	38,307	3,918	102	35,845	2,845	79	91·2
Manitoba	9,455	868	92	9,023	665	74	83·0
Saskatchewan	11,620	1,048	90	10,873	766	70	80·6
Alberta	8,493	808	95	8,068	583	72	84·0
Colombie Britannique	5,549	343	62	5,104	259	51	56·5
Totaux	87,134	8,558	98	81,845	6,335	77	88·1

Plus de 82 pour cent du total de la mortalité infantile en 1921, était attribuable à 12 maladies, qui ont emporté 83 pour cent des garçons et 76 pour cent des filles.

TABLEAU 7—MORTALITÉ INFANTILE, PAR CAUSES PRINCIPALES, EN 1921

Causes de décès	Sexes		Deux sexes	
	Garçons	Filles	Nombre absolu	Pourcentage de chaque cause

Taux par 1,000 naissances vivantes	98·2	77·7	88·1	–

Mortalité maternelle

La mortalité résultant des couches étant étroitement apparentée à la naissance, on donne, dans les tableaux 8 et 9 un résumé des statistiques qui s'y rapportent. Le tableau 8 classifie les décès provenant de cette cause, par âge des défuntes, dans chaque province; il indique aussi le taux de ces décès par 1,000 naissances d'enfants vivants; quant au tableau 9, il répartit ces décès selon leur cause déterminante.

TABLEAU 8—MORTALITÉ MATERNELLE, PAR GROUPES D'ÂGE, EN 1921

Mortalité (toutes causes)

La totalité des décès, à tout âge, sur une population de 6,414,654 habitants s'est élevée, en 1921, à 67,722 soit un taux brut de mortalité de 10.6 par 1,000 comparativement à 77,722 décès, sur 6,296,000 habitants, soit au taux de 12.3 par 1,000 en 1920, Dans chaque province, on constate une décroissance de la mortalité, tant dans les nombres absolus que dans les pourcentages.

TABLEAU 10—MORTALITÉ, NOMBRES ABSOLUS ET PROPORTIONNELS PAR PROVINCE EN 1920 ET 1921

Provinces	Décès de 1921			Décès de 1920		
	Pop. au recensement	Nombre tous âges	Pourcentage par 1,000 habitants	Population par milliers	Nombre tous âges	Pourcentage par 1,000 habitants
Ile du Prince-Edouard	88,615	1,209	13·6	89	1,279	14·4
Nouvelle-Ecosse	523,837	6,420	12·3	520	7,563	14·5
Nouveau-Brunswick	387,876	5,410	13·9	360(1)	5,628	15·4

Totaux	6,414,654	67,722	10·6	6,296	77,722	12·3

(1) Le comté de Kent excepté.

Il résulte du tableau 11 que le nombre des enfants mâles, nés en 1921, excéda de 50,723 le nombre des décès masculins pendant la même année, tandis que le gain réalisé pendant la même période par la population féminine atteignit 50,534, ce qui signifie que, quoique le nombre des nouveaux-nés du sexe masculin ait excédé celui du sexe féminin de 5,289, la mortalité infantile ayant été plus grande parmi les garçons (comme 98:77), la différence nette pour l'année s'est trouvée réduite à 189 enfants du sexe masculin de plus que l'autre sexe.

TABLEAU 11—EXCÉDENT DES NAISSANCES SUR LES DÉCÈS POUR CHAQUE SEXE ET TOTAUX PAR PROVINCE, EN 1921

Provinces	Garçons			Filles			Deux sexes
	Naissances	Décès	Excédent des naissances sur les décès	Naissances	Décès	Excédent des naissances sur les décès	Excédent des naissances sur les décès
Ile du Prince-Edouard	1,073	619	454	1,083	590	493	947

Total	87,134	36,411	50,723	81,845	31,311	50,534	101,257

Plus de 70 pour cent de tous les décès constatés en 1921, sont attribués à vingt maladies, énumérées dans le tableau suivant. Les maladies de cœur tiennent la tête de la liste, avec presque 9 pour cent de la totalité des décès; viennent ensuite, le cancer, avec 7.13 pour cent et la tuberculose avec 7.07 pour cent de l'ensemble. Le cancer a causé 37 décès de plus que la tuberculose.

TABLEAU 12—DÉCÈS CAUSÉS PAR LES VINGT PRINCIPALES MALADIES, EN 1921

Tuberculose

Les décès par la totalité des affections tuberculeuses se sont élevés au nombre de 4,789, soit 2,439 pour le sexe masculin et 2,350 pour le sexe féminin, le taux de mortalité pour les huit provinces étant de 747 par million d'habitants; en 1920, on comptait en Angleterre 1,131 décès par million d'habitants pour la même cause. Dans l'île du Prince-Edouard, la tuberculose s'attribue 106 décès sur 1,000, dans la Nouvelle-Ecosse 109, au Nouveau-Brunswick 76, dans Ontario 60, au Manitoba 78, dans la Saskatchewan 58, dans l'Alberta 63 et dans la Colombie Britannique 97.

Cancer

Les décès par le cancer, en 1921, sont au nombre de 4,826, soit 2,309 parmi la population masculine et 2,517 parmi la population féminine, le taux étant de 752 par million d'habitants. Dans l'île du Prince-Edouard sur 1,000 décès, 64 étaient dus au cancer, dans la Nouvelle-Ecosse 75 sur 1,000, au Nouveau-Brunswick 52, dans Ontario 75, au Manitoba 79, dans la Saskatchewan 55, dans l'Alberta 57 et dans la Colombie Britannique 92.

Mariages

Il est intéressant de noter que plus de 50 pour cent des nouveaux époux des provinces de l'ouest sont nés ailleurs qu'au Canada, tandis que dans les provinces de l'est, dans la plupart des cas, plus de 70 pour cent d'entre eux étaient nés au Canada; dans l'île du Prince-Edouard cette proportion atteignit même 97 pour cent, et dans la Nouvelle-Ecosse et le Nouveau-Brunswick elle dépassa 80 pour cent.

INTRODUCTION

General Summary—
Number of births, deaths and marriages IX
Method of obtaining population figures IX
Natural increase X

Births—
Birth rates by provinces XI
Masculinity of births XI
Births by months XII
Births by age of parents XII
Fecundity XIII
Births by nativity of parents XIV
Births by racial origin of parents XV
Illegitimate births XV

Stillbirths XVI

Infantile Mortality—
Comparative statistics of infant mortality XVII
Year of birth and age at death of infants XVIII
Infant Mortality by sex XVIII
Infant Mortality in other countries XIX
Infant Mortality by causes XX
Infant Mortality in cities XX

Maternal Mortality—
Maternal Mortality of provinces by age groups XXI
Maternal Mortality by causes of death XXII
Deaths from various causes associated with pregnancy and child-birth XXII

Mortality, All Causes—
Total deaths and crude death rates by provinces XXIII
Crude death rates in certain other countries XXIII
Age distribution of decedents XXIV
Death rates by sex and age groups XXV
Adjusted or standardized death rates XXVI
Deaths adjusted to the standard million in England and United States XXVIII
Death rates by months XXIX
Deaths due to certain specified causes XXIX

Marriages—
Marriages by months XXXIII
Conjugal condition of contracting parties XXXIV
Age at marriage XXXIV
Nativity of brides and bridegrooms XXXV

Appendix—Census Divisions in Prairie Provinces *411*

PREFACE

This is the Second Annual Report on Vital Statistics prepared by the Dominion Bureau of Statistics based on data obtained under a co-operative arrangement, effected by Conferences in 1918, between the Bureau and the Registration Departments of all the provinces of the Dominion, excepting Quebec.

The present report being only the second of the series brought out as a result of this arrangement, the following account of the origin and purpose thereof as well as of the earlier developments in Canadian Vital Statistics is here repeated from the First Annual Report.

Prior to 1920 the only vital statistics in Canada were those of certain Provincial Governments. These, however, were not available for national purposes. One province did not maintain provincial records of births and deaths. In the others legislation and methods differed widely; for instance, the international classification of deaths was not universally followed, and each province had its own scheme for the collection, compilation and presentation of results. Of the twenty-four items which the death certificate usually calls for, two provinces omitted sixteen, another fifteen, and another thirteen. Standards of administration, *i.e.*, the degree of enforcement of registration, differed between provinces, and sometimes within the same province from year to year. Thus, whilst it was possible to assemble certain totals, the latter were incomplete and otherwise inadequate to the purposes of a national system of vital statistics.

Two attempts had been made in the past to remedy this situation. In the year 1882 the Dominion Government instituted a plan for recording annually the mortuary statistics of cities of 25,000 and over, by subsidizing local boards of health to supply the necessary information under special regulations. A beginning was made with the five cities of Montreal, Toronto, Hamilton, Halifax and St. John, but by 1891 the list had grown to twenty-five. At that time the only records of births and deaths were those of the municipalities. With the organization of provincial records, the Dominion work was abandoned. Significantly enough, however, its discontinuance was marked by a conference of Dominion and provincial officials summoned in 1893, which passed a resolution calling upon the federal and provincial authorities to co-operate in the work of collecting, compiling and publishing the vital statistics of the Dominion.

The other attempt to meet the situation was made through the medium of the census. Under the original Census Act, a schedule covering the number and causes of the deaths occurring in each household during the preceding year was included in each Census. The results, however, proved abortive; probably one-fifth of the record was missed, whilst the information on the all-important matter of the cause of death was unsatisfactory. The reasons may be set down to the migration of population, lapse of memory or knowledge in the persons supplying the data, and lack of training in the census enumerators. Even had the results been otherwise, mortality statistics at ten year intervals are of diminished value. Moreover, birth statistics and marriage statistics are not less important than death statistics. The inability to obtain accurate vital statistics through the census has been recognized for many years in the United States, France, Germany and other countries.

The remedy accordingly which the bureau invoked in attacking the problem of vital statistics on its establishment in 1918 lay in the direction indicated in 1893, namely, the framing of a plan for permanent Dominion and provincial co-operation. A memorandum, to which were attached a model provincial bill and model forms of registration, was first drawn up, based on thorough examination of existing vital statistical legislation and administration in the provinces and in other countries. This memorandum was laid informally before the provincial departments, from several of whom valuable criticisms and suggestions in reply were received. Briefly, the plan put forward by the bureau involved (1) that each province should bring its legislation and administration to the standard indicated, (2) the bureau to act (*a*) as intermediary agent for the maintenance of the standard and (*b*) as clearing house for the compilation and tabulation of results. In the latter connection the bureau undertook to supply the standard forms to the provinces free of charge and to pay the provinces the cost of transcription in supplying the bureau with copies of returns. It was not suggested, of course, that the provinces surrender the right of individual treatment; or of independent compilation and publication; the

standard proposed was a minimum only, the general plan being based on that of the United States and other countries whose forms of government and institutions approximate to those of Canada.

The agenda of the conference consisted of four main items: First, the principle of registration was affirmed, with its corollary, the cessation of the decennial mortuary census. Secondly, the general principle was endorsed of Dominion and provincial co-operation under a scheme of uniform legislation and administration. Third, the Model Bill and schedules were discussed in full detail and approved as amended. Finally, the action to be taken by the Dominion Bureau of Statistics was defined in the form of a draft Order in Council. The text of the resolutions passed by the conference and of the Order in Council as finally approved and passed by the Cabinet under date of April 22, 1919, are appended.

The report covers births, deaths and marriages reported for the registration area for the year 1922. In the case of Quebec, the principles of the Model Bill have not yet been put into operation, nor are the returns of births, deaths and marriages made on the standard forms supplied by the Bureau of Statistics.

The records in the present report include returns of births and deaths among the Indian population of the co-operating provinces and arrangements are under way for the inclusion of similar data for the Northwest Territories. Beginning with January, 1922, monthly reports on births, deaths and marriages have been issued as have also preliminary annual reports in which the main facts are made available to the public.

The collection of the data and the preparation of the Report were under the direction of Mr. E. S. Macphail, Chief of the Division of Demography, assisted by Mr. W. R. Tracey.

R. H. COATS,
Dominion Statistician.

Dominion Bureau of Statistics, January, 1924.

Note 1:—Resolutions of Conference on Vital Statistics, 1918

Omission of Mortuary Statistics from the Schedules of the Decennial Census.—Resolved, that this conference, having reference to the mortuary statistics obtained by the censuses of 1901 and 1911, approves of the intended action of the Dominion Bureau of Statistics in omitting inquiries *re* mortuary statistics from future censuses.

Dominion and Provincial Co-operation.—Resolved, that the organization of a system of vital statistics for Canada is imperatively demanded at the present time, such statistics (*a*) to include births, deaths and marriages; (*b*) to be on an annual basis; and (*c*) to be collected, compiled and published in a manner which will permit comparison to be made between different localities and provinces throughout the Dominion and between Canada as a whole and other countries.

That such statistics can best be secured by Dominion and provincial co-operation, following the procedure indicated in the The Statistics Act, clauses 9 and 34.

That the general principle of such co-operation be (1) the enactment of uniform legislation and the adoption of uniform methods of administration by the provinces; and (2) an engagement on the part of the Dominion Bureau of Statistics (*a*) to use its machinery as a centralizing and unifying agency and to collaborate with the provinces in a mutually satisfactory way in the collection, compilation and publication of vital statistics; and (*b*) to secure all necessary data in taking the population census.

Standardization of Provincial Vital Statistics.—Whereas it is essential to a satisfactory scheme of vital statistics that the Acts, forms, regulations, etc., of the several provinces should agree in general principles and should provide for systems of registration in accordance with a uniform plan, and that there should be a uniform standard of statistical and general efficiency in order that conditions in every province may be submitted to analysis and comparison with those of other provinces or other communities similarly situated.

And whereas it is the opinion of this conference, that, in order to secure co-operation between the Dominion and provincial authorities, as in the United States, Australia and other federated communities, the first step is to establish legislative and administrative standards for the provinces.

Be it therefore resolved: (*a*) that the draft Vital Statistics Act, subject to amendment by the committee appointed at this conference, with the forms appertaining thereto, be accepted as the basis for securing uniformity of legislation in each province, with such changes in wording and content as may be necessary to suit local conditions, provided, however, that the clauses relating to administration and to schedules and forms being part of the Act be accepted without material change;

(*b*) That the "Rules of Statistical Practice," as adopted by the American Statistical Association, be adhered to *mutatis mutandis* in regard to deaths and births;

(*c*) That mortality statistics be collected in accordance with the International Nomenclature of Causes of Death;

(*d*) That it is desirable no changes in the Act, regulations or forms agreed upon for the collection of vital statistics should be made by any province without submitting copies clearly outlining such changes and the reasons why they are contemplated to the Dominion Statistician, who shall immediately communicate copies of the intended amendments to the various provincial governments, and further, that such changes should not be put into effect if they will in any way lessen the merits or alter the scope of the information agreed upon as essential to a scheme of national vital statistics.

Note 2:—Order in Council re Vital Statistics approved by Dominion Government (P. C. 693), April 22, 1919

Whereas the Acting Minister of Trade and Commerce reports that for the purpose of devising means to prevent duplication of work, and to insure uniformity of methods of collecting, compiling and publishing the statistics of marriages, births and deaths, as between the Dominion Bureau of Statistics and the Vital Statistical Branches of the Provincial governments, two conferences—one in June, 1918, and the other in December, 1918,—were held between officers of the branches named, at which it was agreed as follows:—

(1) That the Model Vital Statistics Act prepared by the Dominion Bureau of Statistics, as ratified at the conferences aforesaid, should form the basis of the vital statistical legislation of the several provinces;

(2) That the provinces should undertake to obtain the returns of marriages, births and deaths on the prescribed forms, as approved and adopted at the December conference, the Dominion Bureau of Statistics to supply the forms free of charge;

(3) That the provinces should forward to the Dominion Bureau of Statistics at such times as might be agreed upon, either the original returns of births, marriages and deaths or certified transcripts of the same; the Dominion Bureau to undertake the mechanical compilation and tabulation of the same.

Therefore, His Excellency the Governor General in Council, in order to provide a mutually satisfactory basis of co-operation between the Minister and the Registrars General of the several provinces as above outlined, is pleased to approve and doth hereby approve of the following regulations:—

Regulations

1. The Dominion Bureau of Statistics may receive transcripts or certified copies of the original returns of marriages, births and deaths made by the clergymen, physicians, undertakers or other persons upon whom it is incumbent to make such returns.

2. These copies are to be forwarded by the provincial department charged with the execution of the Vital Statistics Act in each province to the Dominion Bureau of Statistics quarterly or monthly on dates to be agreed upon.

3. The Minister may for each properly filled in transcript or copy of original return of each birth, marriage or death, pay to the Registrar General such remuneration as may be mutually agreed upon. He may also print and supply free of charge, the prescribed forms upon which the returns shall be made to the registrars by clergymen, physicians, undertakers, etc.

4. Nothing in the preceding sections shall preclude an arrangement between the Bureau of Statistics and any provincial department whereby the original returns may be forwarded to the Bureau for transcript, compilation and return in order to avoid duplication of work and office expense.

5. The Bureau of Statistics shall compile, tabulate and publish the vital statistical data for the Dominion as a whole, and may furnish monthly or quarterly compilations, according to a stated plan to each province of the data appertaining thereto.

6. The Bureau of Statistics shall co-ordinate the statistics of immigration and emigration with vital statistics, and shall undertake, when taking the census of population, to secure the data required for vital statistical purposes and to compile the same.

7. The Minister may, from time to time, out of the vote for the Bureau of Statistics, devote a sum not exceeding $2,000 to pay the expenses of one representative from each province to attend at Ottawa, a conference of vital statisticians. Such conference shall be for the purpose of bringing about a closer official and personal association of the registration officials of the several provinces and of increasing co-operation between Government bureaus, and other organizations interested in the improvement and use of vital statistics and of promoting the introduction of effective systems of registering vital statistics for public health and legal purposes, including the revision from time to time of the classification of causes of death; aiding in the maintenance of uniform methods of collecting, preserving, correcting and compiling registration records and of publishing the statistical data derived therefrom; and in general of promoting a proper appreciation of the necessity and importance of vital statistics.

8. The Minister may, after each decennial revision of the International Classification of Diseases and Causes of Death have prepared a "Manual of the International List of the Causes of Death", to contain (1) the terms of the French List or as many of them as may be properly used in English, (2) the terms founded upon medical certificates of causes of death as reported by Canadian physicians.

9. The Minister may also prepare and supply free of charge to Provincial Registrars for distribution to all duly qualified physicians in the Dominion, a Physician's Pocket Reference to the International List of Causes of Death.

10. The provisions of the foregoing regulations shall apply only to such provinces as shall adopt the "Model Act", as the basis of their legislation on vital statistics or have enacted legislation which conforms to the salient features of the "Model Act", and provided that the forms supplied by the Dominion Bureau of Statistics shall be used in obtaining the original returns, provided further that each province shall furnish satisfactory evidence that it received returns of at least 90 per cent of all marriages, births and deaths occurring in each calendar year.

The Minister hereinafter referred to, shall be the Minister of Trade and Commerce.

(Sgd.) RODOLPHE BOUDREAU,
Clerk of the Privy Council.

VITAL STATISTICS, CANADA, 1922

INTRODUCTION

This report presents the statistics of births, deaths and marriages for the eight provinces—Prince Edward Island, Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan Alberta and British Columbia—co-operating with the Dominion Bureau of Statistics in producing a National Vital Statistic.

The number of births, deaths and marriages by provinces are shown in Table 1. They are divided into rural and urban, the urban comprising all incorporated cities, towns and villages of 1,000 population and over, and rural the remainder.

TABLE I.—BIRTHS, DEATHS AND MARRIAGES BY PROVINCES, 1922

Population.—The population of the Registration Area (6,406,682) on which the birth, marriage or death rates for 1921 are based is that of the Census of 1921, while the figures of population in 1920 (6,272,000) and in 1922 (6,551,000) on which the rates are based are estimates calculated according to the geometric method.

This method assumes that the increase in population which took place in the Dominion between the Censuses of 1911 and 1921 was not made in equal annual instalments, but that the increment added during each yearly period bore a constant proportion to the population at the beginning of such period.[1]

A census of the Prairie Provinces taken in 1916 established the figures for that year in these provinces. The estimate for 1916 for the remainder of the Dominion, taken as a whole, was obtained on the basis of the annual rate of increase shown by a comparison of the census figures for this area in 1911 and 1921. This estimate added to the census figures of the Prairie Provinces gives the estimate for the whole Dominion for 1916. The intervening years between 1911 and 1916 and between 1916 and 1921 were then obtained, likewise by the geometric method,

[1] In the absence of a constant ratio and statistics of emigration in Canada it would seem that for intercensal estimates of population it is necessary to resort to a purely mathematical calculation based not upon specific information but rather upon assumed general laws. It remains then to find a satisfactory mode of procedure in constructing an estimate on a purely mathematical basis.

An obvious method would be to assume an arithmetic increase; i.e., to insert nine arithmetic means between the census years. This method has in certain cases met with good results. "The assumption" (to quote a paper read by Mr. George King, F.I.A., F.F.A., before the Institute of Actuaries in 1908) "is not however, natural.....Population begets population, and it is therefore more reasonable to assume that population increases...in geometrical progression." At any rate it is natural to assume that there is some kind of relationship between the increase in population and the population already existing. An arithmetic progression does not reflect such relationship to the same extent as a geometric progression.

If we assume an approximate geometric ratio of increase, it is clear that the approximation is closer when applied to an estimate for the whole Dominion than to an estimate for any one of the provinces, just as it would be closer when applied to the population of the world than to that of the Dominion. In the study of any law, a few observations only will disclose irregularities which are gradually smoothed down as the number of observations increases, accidental exceptions neutralizing each other or becoming less important as their proportion to the conforming factors decreases. To mention a single fact in the case of the Canadian population: granting that, in spite of the large proportion of immigrants, the population is increasing in a geometric ratio, it is obvious that these immigrants gravitate towards a few provinces, and that the shifting of these immigrants and of the native populations of the Dominion from one province to another would render a law, which might be roughly applicable to the Dominion as a whole, much more unequal when applied to one province.

Assuming then that the population of the whole Dominion has been increasing between 1911 and 1921 in a geometric ratio, the ratio between 7,206,643 (the population of 1911, and 8,788,483 (that of 1921) is 1·2195. Now by a simple process, nine geometric means can be inserted within the two census periods by multiplying 7,206,643 successively by 1·020042 (the 10th root of 1·2195, the ratio of increase), $(1{\cdot}020042)^2$, $(1{\cdot}020042)^3$ and so on. In this manner we might estimate the population assumed to have been living at certain dates within the intercensal period. (Appendix IV, Vol. I, Census 1921)

for the whole of Canada. The estimate for 1922 is based on the assumption that the annual rate of increase between 1916 and 1921 continued past the latter year.

Owing to the nature of the geometric mean, estimates for the individual provinces obtained purely by this method would not add up to the Dominion total. The arithmetic method has accordingly formed the basis of the estimates for the provinces and adjustment has then been made to bring the sum of the provinces into equality with the geometric estimate already obtained for the Dominion.[1]

The Censuses of 1911 and 1921 being taken as of date June 1st, the estimates of population for intercensal years are calculated for the same period (June 1st) instead of for the mid-year period. An estimate at July 1st would, theoretically, furnish a figure nearer to the mean population of the calendar year than one based on June 1st, but the difference is not material and the use of a population as of June 1st allows the employment of the actual census figures for 1921, instead of an estimate one month removed.

Natural Increase.—The net increase to the population of the Registration Area by the excess of births over deaths in 1922 was 95,166, being 47,013 males and 48,153 females. During the year 84,057 male births and 80,137 female births were reported, making a total of 164,194 for both sexes, and in the same period the total number of deaths reported was 69,028, of which 37,044 were males, as against 31,984 females. There were, therefore, 1,140 more females than males added, through natural increase, to the total population of the Registration Area in 1922.

TABLE II.—EXCESS OF BIRTHS OVER DEATHS BY PROVINCES FOR EACH SEX AND BY TOTALS 1922, 1921

Provinces		Males			Females			Both sexes	Pop'n, 1922 estimated, 1921 Census	Rate of natural increase per 1,000 pop'n

[1]To obtain estimates for the different provinces consistent with preserving the geometric ratio for the whole Dominion, several methods are available. One employed by A. C. Waters, Chief Clerk, General Registry Office, London, would be to assume that the ratio between the population of a province and that of the whole Dominion increased in arithmetic progression. A description and demonstration of this method may be found also in the paper by George King, F.I.A., F.F.A., previously mentioned. It would break down in the case of a decreasing population like that of Prince Edward Island or that of the Yukon. Among other methods may be mentioned a second method of Waters, one by Traverai and one by H. H. Wolfenden, F.I.A., F.A.S. The last has the merit of simplicity and wieldiness and is the one used in obtaining the estimates of population for this report. The population of the whole Dominion for each intercensal year is first obtained by geometric progression in the manner already described—call that for, say, 1916, G. To obtain the estimate for the provinces, say for the year 1916, an arithmetic mean is placed for each of the provinces between the population of 1911 and 1921. Call each of the means a_1, a_2, a_3, etc. The estimates for the provinces then are

$$a_1 \times \frac{G}{a_1+a_2+a_3}; \qquad a_2 \times \frac{G}{a_1+a_2+a_3} \text{ and so on.}$$

From the above it will be seen that when the populations for the different provinces thus estimated are added the total is G. (Appendix IV, Vol. I, Census 1921)

BIRTHS

Of the 164,194 living births in 1922, 160,362 were single births, 1,898 twin births (3,796 infants) and 12 triplet births (36 infants). In 1921 there were 168,979 living births in all, of which 165,036 were single births, 1,937 twin and 23 triplet births.

Birth rates.—The crude birth rate per 1,000 of population for 1922 was 25·1 as compared with 26·4 in 1921 and 26·6 in 1920. The highest rate in 1922 was 29·5 for New Brunswick; the lowest was 18·9 for British Columbia.

The number of births and the birth rate by provinces for the years 1920, 1921 and 1922 are shown in Table III.

TABLE III.—BIRTHS AND BIRTH RATES BY PROVINCES, 1922, 1921 AND 1920

Provinces	1922			1921			1920		
	Estimated pop'n in thousands	Births		Census population	Births		Estimated pop'n in thousands	Births

(1) Vital Statistics of Kent Co., New Brunswick were not collected until May 1, 1921. Its total estimate of population for 1920 and one-third of the census figure for 1921 have therefore been excluded.

Masculinity.—Table IV shows by provinces the number and per cent proportion of living births classified according to sex in 1920, 1921 and 1922 respectively, as well as the number of male births to every 1,000 female births. There was an excess of male births over female births reported for every province in the Registration Area in 1920 and 1922, while in 1921 only one province, Prince Edward Island, showed an excess of female over male births. In this connection it may be interesting to note that in 1921 the proportion of male births to female births among the white population of the Registration Area of the United States was 1,059 to 1,000, while in the six years 1915 to 1920 the ratios were 1,056, 1,058, 1,060, 1,060, 1,059 and 1,059 respectively.

England and Wales, where the registration of births has been controlled and directed from one centre for a long period, gives a good illustration of the range of masculinity of living births in a large population. In the fifty years 1871 to 1920 the sex proportion of male births to female births ranged from 1,032 in 1898 to 1,060 in 1919; the highest ratio prior to the Great War was 1,043 in 1875, while for the years 1915 to 1920 the ratio was 1,040, 1,044, 1,048, 1,060 and 1,052 respectively per 1,000 female births.

TABLE IV.—BIRTHS (EXCLUSIVE OF STILLBIRTHS) BY SEX AND RATIO OF MALES TO FEMALES 1922, 1921 AND 1920

Province		Births 1922, 1921 and 1920

Births by Months.—Table V shows by provinces the per cent proportion of living births reported in the Registration Area in each month. For the Registration Area as a whole the month of March showed the greatest number and December the smallest. The former corresponds to June as the leading month for marriages and the latter to March as reporting the lowest number. The correlation, however, extends only to primiparas and a comparison of Table V with Table XXXV shows a much more even distribution of births than of marriages throughout the year. Further, it may be noted that this correlation between marriages and births does not obtain in every province. In Saskatchewan, for example, March shows the highest birth rate and December the lowest, while November had the greatest number of marriages and May the fewest.

TABLE V.—PROPORTION OF BIRTHS (EXCLUSIVE OF STILL BIRTHS) OCCURRING IN EACH MONTH BY PROVINCES, 1922

Months	Total	P.E.I.	N.S.	N.B.	Ont.	Man.	Sask.	Alta.	B.C.

Births by Age of Parents.—The numerical and per cent distribution of legitimate living births by stated age of parents is given in Table VI. In the Registration Area there were eight

instances in 1922 where the mother was under 15 years of age, as against nine instances in 1921. Nearly 30 per cent of mothers reported with age in 1922 were under 25 years of age, whereas only 10·4 per cent of fathers were of a similar age. Less than 6 per cent of the births reported to mothers of stated ages were to wives 40 years of age and over, whereas the husbands 40 years and over represent 20·4 per cent of all fathers of stated age. In 1922 less than 3 per cent of all mothers were reported without statement of age, as against nearly 12 per cent in the previous year.

TABLE VI.—LEGITIMATE BIRTHS (EXCLUSIVE OF STILLBIRTHS) CLASSIFIED BY AGE OF PARENTS, 1921 AND 1922

Married Parents by Age Groups	Mother				Father			
	1922		1921		1922		1921

Age not stated	4,452	–	19,250	–	3,950	–	19,199	–
Totals	**160,823**	–	**165,645**	–	**160,823**	–	**165,645**	–

Fecundity.—Table VII presents the per cent distribution of legitimate births by nativity of mother.

In the Maritime Provinces the proportion of children born to mothers of alien birth ranged from 2·5 per cent in Prince Edward Island to 4·6 per cent in New Brunswick. In Manitoba the births credited to the foreign born mother formed 32·5 per cent of all living births, in Saskatchewan 44 per cent and in Alberta 44·9 per cent. For the Registration Area as a whole, births to mothers of Canadian nativity were 58·2 per cent of all births, to those born elsewhere in the Empire, 21·2 per cent, and to the alien born, 20·6 per cent.

TABLE VII.—PERCENTAGE OF LEGITIMATE CHILDREN BORN ALIVE HAVING CANADIAN BORN, BRITISH BORN OR FOREIGN BORN MOTHERS, BY PROVINCES, 1922

Province	Per cent distribution of children born, by nativity of mother			
	Total	Canadian born	British born	Foreign born

Alberta	100·0	30·9	24·2	44·9
British Columbia	100·0	33·7	43·4	22·9
Total	**100·0**	**58·2**	**21·2**	**20·6**

Assuming that the proportion which the number of married women 15 to 45 of each nativity bears to the total population is the same in 1922 as it was in the Census of 1921, the figures of Table VIII throw some light on the relative fecundity of married women of the ages of 15 to 45, Canadian born, British born or Foreign born. In every province of the Registration Area, excepting British Columbia, the number of births in 1922 per 1,000 married women of childbearing age was greater among Foreign born than it was among either the British born or Canadian born. For the Registration Area as a whole there was in 1922 an average of 201 children born to every 1,000 foreign born married women, as against 168 to every 1,000 British

born married women and 193 to every 1,000 Canadian born married women 15 to 45 years of age. The proportion for all classes of this age was 189 per thousand.

TABLE VIII.—NUMBER OF BIRTHS (EXCLUSIVE OF STILLBIRTHS) PER 1,000 MARRIED WOMEN BETWEEN 15 AND 45 BY NATIVITY OF MOTHER, 1922

Province	Births per 1000 Mothers

Total	**188·8**	**193·4**	**167·8**	**201·1**

Nativity of Parents.—Table IX, which classifies the children born in 1922 by country of birth of parents, furnishes some idea to what extent the coming generation will be the product of Canadian born, British born or foreign born parents. The term "unspecified," under country of birth, includes for the father illegitimate births and births of incomplete record, while for the mother it includes births of incomplete record only.

TABLE IX.—NUMBER AND PER CENT PROPORTION OF BIRTHS (EXCLUSIVE OF STILLBIRTHS) HAVING FATHERS AND MOTHERS BORN IN SPECIFIED COUNTRY, 1922, 1921

(1) Less than one-tenth of one per cent.
(2) Represents for 1922 the number of births where both parents were in the same category as regards birthplace. The difference between this figure (115,808) and total births (164,194) equals the number of births (48,386) where both parents were not in the same category as regards birthplace.
(3) This number excludes the percentage (28·4) of "mixed parentage," i.e., where both parents were not in same category by birthplace.
(4) As explained in Note (2) but with 1921 figures.
(5) As explained in Note (3) but with 1921 figures.

Racial Origin of Parents.—Table X gives the number and per cent proportion of births during the year, contributed by the principal racial groups. As an indication of the improvement which has taken place in obtaining records of racial origin it may be stated that in 1921, 12·8 per cent of fathers and 11·7 per cent of mothers were reported without a statement as to origin, while in 1922 this number was only 8·9 per cent of the total for fathers and 7·5 per cent for mothers.

TABLE X.—NUMBER AND PER CENT PROPORTION OF BIRTHS (EXCLUSIVE OF STILLBIRTHS) HAVING FATHERS AND MOTHERS OF SPECIFIED RACIAL ORIGINS, 1922, 1921

(1) Less than one-tenth of one per cent.
(2) Represents for 1922 the number of births where both parents were in the same category as regards racial origin The difference between this figure (111,404) and the total births (164,194) equals the number of births (52,790) where both parents were not in the same category as regards racial origin.
(3) This excludes the percentage (32·5) of "mixed parentage," i.e., where both parents were not in the same category by racial origin.
(4) As explained in Note (2), but with 1921 figures.
(5) As explained in Note (3), but with 1921 figures.

Illegitimate Births.—Of the total number of living births (164,194) reported in 1922 for the eight co-operating provinces, 3,371 or 20·5 per 1,000 living births were the issue of unmarried mothers, as compared with 19·7 per 1,000 living births in 1921.

Of the total number of unmarried mothers, more than 38 per cent were under 20 years of age in 1922, as against 33 per cent in 1921. There were 39 exnuptial births credited to mothers under 15 years of age in 1922. The ratio of illegitimate births to all births showed an increase in nearly every province in 1922 as compared with 1921.

Table XI classifies illegitimate births by age and birthplace of the mother for the Registration Area as a whole, while Table XII distributes these births in each province by the age of the mother.

TABLE XI.—ILLEGITIMATE BIRTHS CLASSIFIED BY AGE AND BIRTHPLACE OF THE MOTHER FOR THE REGISTRATION AREA, 1922

Stillbirths.—The statistics of children born dead during the year 1922 are shown in the next table, classified by the age of the mothers. In the case of married mothers the figures are by provinces, while for unmarried mothers they are given for the Registration Area as a whole.

TABLE XIII.—STILLBIRTHS BY AGE OF MOTHER AND LEGITIMACY OF CHILD, 1922

INFANTILE MORTALITY

Mortality rates for children under one year of age are based on the number of births, exclusive of stillbirths, reported in the period under review. The infant mortality rate is the number of deaths of infants under one year of age per 1,000 children born alive. The rate for the Registration Area in 1922 was 86·8, as compared with 88·1 in 1921 and 100·1 per 1,000 in 1920. For the provinces the rates in 1922 ranged from 68·1 per 1,000 in British Columbia to 103·3 per 1,000 in New Brunswick. Infantile mortality rates for Ontario and the Maritime Provinces in 1922 show a considerable betterment over the previous year, while those for the western provinces show an upward tendency.

TABLE XIV.—INFANT MORTALITY BY TOTALS FOR PROVINCES, 1922, 1921 AND 1920, TOGETHER WITH THE RATE PER 1,000 LIVING BIRTHS

Provinces	Infant Deaths 1922		Infant Deaths, 1921			Infant Deaths, 1920		
	Living Births 1922	Number	Rate per 1,000 living births	Living Births 1921	Number	Rate per 1,000 living births	Living Births 1920	Number	Rate per 1,000 living births

British Columbia	10,166	692	68·1	10,653	602	56·5	10,492	638	60·8
Totals	**164,194**	**14,256**	**86·8**	**168,979**	**14,893**	**88·1**	**166,741**	**16,695**	**100·1**

Year of Birth and Age at Death.—Although the infant death rates in Table XIV are based on the numbers of births and deaths reported in 1922, it is evident that a number of the deaths were of infants born in 1921 but who had not attained their first birthday at the time of death. The actual number of such cases was ascertained to have been 2,956 or 20·7 per cent of the total infantile mortality reported for the year, leaving 11,300 or 79·3 per cent of the total number as the deaths of infants who were born in 1922.

Where such a small proportion of infant deaths reported in any calendar year are those of children born in the preceding year, it may be concluded that an infant death rate based on the relation of the deaths in each year to the births in the same year not only gives an accurate representation of the conditions over a period of time, but may also quite properly be employed for the comparison of one year with another, except where a very considerable change in the number of births takes place between successive years. The fact that more than 50 per cent of the infant deaths in 1922 were of children who failed to live for one month explains the great preponderance of deaths among children whose birth and death occurred in the same calendar year. The proportion per 1,000 of infant deaths in 1922 at each age under one year is shown by provinces in Table XV.

TABLE XV.—PROPORTION PER 1,000 DEATHS OF INFANTS UNDER 1 YEAR OF AGE OCCURRING AT EACH AGE PERIOD, 1922

Infant Mortality by Sex.—Table XVI gives the number of births, infant deaths and the death rates by sex for the Registration Area of Canada for the three years 1920, 1921 and 1922.

The table shows for the Registration Area as a whole that while male births exceeded female births in 1922 by 3,920, yet owing to the greater mortality among male infants under one year the male net advantage at the end of the year was only 1,826. For the Registration Area the ratio of deaths to 1,000 births in 1922 was 97 for males, as against 76 for females and 87 per 1,000 births for both sexes. In 1921 the ratio was 98 for males, as against 77 for females and 88 for both sexes.

TABLE XVI.—NUMBER AND RATIO OF INFANT DEATHS TO LIVING BIRTHS BY SEX, 1922, 1921, 1920

Province		Males			Females			Both Sexes

Infant Mortality in Other Countries.—Table XVII presents a statement of the number of births and deaths of infants under one year of age for the Registration Area of Canada and certain other countries. The years to which the figures relate are the last full calendar year for which data are available. For every country shown the infant mortality rate for males exceeds that of females.

TABLE XVII.—BIRTHS AND DEATHS UNDER 1 YEAR OF AGE AND INFANT MORTALITY RATES, BY SEX, FOR THE REGISTRATION AREA OF CANADA AND FOR CERTAIN OTHER COUNTRIES

Infant Mortality by Causes.—Of the total infantile mortality reported for the Registration Area in 1922, 85·7 per cent of male deaths and 85·8 per cent of female deaths under one year were due to the 13 causes of death listed in the next table. Prematurity and injury at birth accounted for 24·6 per cent of all male deaths and for 24·7 of all female deaths of infants under one year.

TABLE XVIII.—INFANTILE MORTALITY BY PRINCIPAL CAUSES OF DEATH, 1922, 1921

Infant Mortality in Cities.—Table XIX shows the number of births, the number of deaths under one year of age and the infantile death rates for cities of 40,000 and over during the years 1921 and 1922. For 1922 Ottawa shows the highest rate, 127·7 per 1,000 living births, followed by Halifax with 125·1 per 1,000. In 1921 the highest mortality was in St. John with 146·9 per 1,000, followed by Halifax with 134·5 and Ottawa with 129·8 per 1,000 living births. Vancouver with a rate of 66·6, London, Ont., with 67·7, Calgary with 77·5 and Toronto with 77·9 per 1,000 births in 1922 are well below the general average for the Registration Area as a whole.

In considering the statistics of births and infantile mortality in cities the fact that many non-residents avail themselves of the advantages of urban institutions should not be overlooked.

TABLE XIX.—INFANTILE MORTALITY IN CITIES OF 40,000 AND OVER 1922, 1921

Cities of 40,000 and over (*Registration area*)	1922			1921		
	Living Births	Deaths under one year	Rate per 1,000 living births	Living Births	Deaths under one year	Rate per 1,000 living births

MATERNAL MORTALITY

Table XX classifies maternal deaths by age of decedents for each province in the Registration Area for 1922 and 1921. In 1922 there were 907 maternal deaths, or a rate of 5·5 per 1,000 living births, as compared with 868, or a rate of 5·1 per 1,000 in 1921. Every province excepting Ontario shows a higher proportion per 1,000 living births for maternal mortality in 1922 than in the previous year.

TABLE XX.—MATERNAL MORTALITY BY AGE GROUPS BY PROVINCES, 1922, 1921

Age Groups	Year	Total	P.E.I.	N.S.	N.B.	Ont.	Man.	Sask.	Alta.	B.C.
15–19	1922	47	1	3	5	18	4	7	6	3

Classifying children born alive in 1922 according to the age of the mother, and distributing those for whom the age was not stated (4,599) proportionately, we find that 10,372 were born to mothers under 20, 40,093 to mothers between 20 and 24, 45,309 to mothers between 25 and 29, 58,941 to mothers between 30 and 39 and 9,479 to mothers 40 years of age and over. The maternal mortality per 1,000 living births was 4·5 for mothers under 20 years, 3·7 for mothers between 20 and 24 years, 4·3 for mothers between 25 and 29, 6·8 for mothers between 30 and 39 and 12·8 per 1,000 births for mothers of 40 to 49 years.

In the following statement maternal death rates at each age period are shown in relation to living births. It may be noted that the death rate for mothers of 40 years and over is more than three times that of mothers 20 to 24. It is also worthy of note that the death rate for mothers under 20 and of those 25 to 29 was higher than for those between 20 and 24.

Age Groups	Living births 1922	Maternal deaths, 1922		Age Groups	Living births 1922	Maternal deaths, 1922	
		Number	Rate per 1,000 living births			Number	Rate per 1,000 living births

[1] Not in a criminal sense.

Table XXII shows the causes of death stated to have been complicated by the existence of the puerperal state, by provinces, in 1922. The causes of death most largely represented in the table are influenza, pneumonia, diseases of the heart, and tuberculosis.

TABLE XXII.—DEATHS OF WOMEN NOT CLASSED TO PREGNANCY OR CHILDBEARING BUT RETURNED AS ASSOCIATED THEREWITH, 1922

MORTALITY (ALL CAUSES)

The total number of deaths, all ages, reported in the Registration Area in 1922 was 69,028 in an estimated population of 6,551,000, giving a crude death rate of 10·5 per 1,000 population. In 1921 the total mortality was 67,722 and the crude rate 10·6, while in 1920 the total mortality was 77,722 and the rate 12·4 per 1,000 estimated population.

Table XXIII gives the population (estimated) for 1922 and 1920, and Census figures for 1921, together with the total number of deaths and the death rate per 1,000 population in each province. In Ontario and in each of the Maritime Provinces the crude death rate is higher than the average for the Registration Area, while in the Prairie Provinces and British Columbia it is below the average. The highest crude rate for 1922 was shown by New Brunswick with 13·2 and the lowest by Saskatchewan, with 7·8 per 1,000 population. The New Brunswick crude rate, which was 15·6 per 1,000 in 1920, fell to 14·2 in 1921 and to 13·2 in 1922.

TABLE XXIII.—TOTAL DEATHS AND CRUDE DEATH RATES PER 1,000 POPULATION BY PROVINCES, 1922, 1921 AND 1920

(1) See Note Table III.

It will be seen from the following statement, which presents the latest available crude death rates per 1,000 population for the principal countries of the world, that only three of them, New Zealand with 8·8, Australia with 9·2, and South Africa with 9·5 per 1,000 population have a lower death rate than the Registration Area of Canada. In this regard it may be pointed out that the rate for Canada is for the total population of the Registration Area (Aborigines included).

ANNUAL CRUDE DEATH RATES IN CANADA (REGISTRATION AREA) AND CERTAIN OTHER COUNTRIES

Country	Year	Crude death rate	Country	Year	Crude death rate

(1) Preliminary figure.

Age Distribution of Decedents.—Table XXIV distributes by absolute numbers the mortality in 1922 and 1921 by five year age groups for decedents under 80 years of age. Table XXV, a companion table, gives the per cent distribution of deaths by the same age groups. The population according to the Census of 1921 distributed by the same age groups is also included in these tables to show the incidence of mortality by age groups. The Census of 1921 being taken as of date June 1st, it is assumed that an age distribution of the population in 1922 based on these figures is sufficiently accurate for all purposes.

The 1921 Census shows that 2·27 per cent of the population of the Registration Area was under 1 year of age, 11·54 per cent under 5 years of age, 30·23 per cent between the ages of 5 and 19, or a total of 41·76 per cent under 20 years of age. On the other hand, the mortality statistics show that 20·70 per cent of all deaths in 1922 and 22·03 per cent in 1921 were of persons under 1 year of age and that 26·51 per cent of all decedents in 1922 and 28·29 per cent in 1921 were under 5 years of age, while the mortality reported for persons between the ages of 5 and 19 constituted only 6·94 per cent of all deaths in 1922 and 7·45 per cent in 1921. Referring to the older age groups, it will be noted while only 4·84 per cent of the population (Census 1921) was 65 years and over that 32·47 per cent of all deaths were in this age group in 1922 and 30·52 per cent in 1921. It may also be noted that according to the Census (1921) 68·04 per cent of the population of the Registration Area was between the ages of 5 and 44 and that only 22·80 per cent of the deaths in 1922 and 23·45 per cent in 1921 were in this age group.

TABLE XXIV.—NUMERICAL DISTRIBUTION OF DEATHS BY CERTAIN AGE GROUPS IN 1922 AND 1921, TOGETHER WITH NUMERICAL DISTRIBUTION OF THE POPULATION BY THE SAME AGE GROUPS, CENSUS 1921

Death Rates by Sex and Age Groups.—Death rates have been calculated for eleven age groups of each sex and of the sexes combined for 1921 and 1922 in Tables XXVI, XXVII and XXVIII. To obtain the population of each group for the later year the assumption has been made that the numbers in the various groups bore the same ratio to one another as at the Census of 1921. In obtaining the group rates in these tables no correction has been made for unstated ages in population or in number of deaths, the influence of these being negligible.

Adjusted or Standardized Death Rates.—While the crude death rate gives the measure of the actual mortality per unit of population, it does not afford a satisfactory basis for a com-

parison of the trend of mortality in different communities. The reason for this is evident from Tables XXVII and XXVIII, where "specific death rates" by sex for the various age groups show considerable diversity. The death rates for children under 5 years of age and for persons 65 years and upwards are much heavier than for the intermediate age groups. Crude death rates, therefore, reflect not only the influence of such factors as climate, sanitary conditions mode of living, heredity, environment, but also differences in the age and sex distribution of population in any two communities and, particularly, abnormalities in the proportion which the number of the very young or very old bear to the total population.

This does not signify, however, that the crude rates are computed without due care, or that they do not serve useful purposes, but indicates that the rates are based on the total deaths and the total population without regard to the sex and age constitution of the latter. The proportionate loss by death in the population is correctly shown by such rates. The difference between crude birth and death rates represents the net natural increase in population for a given period of time.

While comparisons of the rates of mortality in two communities by age groups for each sex avoid the effects of differences in sex and age constitution, it is, however, desirable in comparing death rates by countries, states or provinces, to adopt a more summary method of comparison by obtaining a single rate for each area. This is accomplished by applying the group death rates of the communities (which are under survey) to the group populations of a community which has been chosen as a "standard," or, in other words, finding what the crude death rates would have been for the communities to be compared if their age and sex groups had been proportionate to those in the community chosen as a standard. Such rates are known as "standardized" or "adjusted" death rates.

The "standard" population chosen for this purpose in the present report is that of England and Wales according to the Census of 1901. This standard is used in the reports of the Registrar General for England and Wales and has also been adopted by the Bureau of the Census in the United States for the computation of "adjusted" death rates. Adjustments of death rates thus made are referred to as having been made on the basis of the "Standard million of England and Wales, 1901."

The age and sex distribution per million of the population of England and Wales in 1901 was as follows:—

Age Groups	Persons	Males	Females
All ages	1,000,000	483,543	516,457
Under 5 years	114,262	57,039	57,223
5– 9 years	107,209	53,462	53,747
10–14 "	102,735	51,370	51,365
15–19 "	99,796	49,420	50,376
20–24 "	95,946	45,273	50,673
25–34 "	161,579	76,425	85,154
35–44 "	122,849	59,394	63,455
45–54 "	89,222	42,924	46,298
55–64 "	59,741	27,913	31,828
65–74 "	33,080	14,691	18,389
75 years and over	13,581	5,632	7,949

In obtaining adjusted death rates for sexes combined in Table XXIX the group death rates for males and females respectively, as given in Tables XXVII and XXVIII were applied to the corresponding groups of the "standard" population above. A summation of the group deaths so obtained gave the total deaths in the "standard million" which were then reduced to a rate per thousand. A correction was made for unstated ages in the population or deaths on which the group death rates were based.

The adjusted rates for either sex separately were obtained by applying the group death rates of the particular sex to the corresponding groups of "persons" in the "standard" population. The addition of the deaths in the eleven groups then gave the number of deaths in one million population. The group death rates for males and females being applied to the same population enables comparison between the sexes as well as between the various provinces.

It is to be noted that the crude is an actual, the "adjusted" a hypothetical rate. The latter is employed to signify a death rate in which allowances have been made for differences in the

age and sex constitution of the population. It has no other than a comparative value, and therefore its absolute size possesses no particular significance.

The sex and age composition of the population of England and Wales in 1901 was, to quote the Registrar General's report, "exceptionally favourable to low mortality," and although Canada, as a country with large immigration of persons under middle age within a recent period is also favourably constituted in this respect, the death rate of the Registration Area for 1922, which was 10·5 in its crude form, dropped to 10·2 upon adjustment to the English standard.

TABLE XXIX.—CRUDE AND ADJUSTED DEATH RATES FOR 1922 AND 1921

Provinces	1922			1921		
	Total	Males	Females	Total	Males	Females
Canada (Reg. Area)—						
Crude	**10·5**	**10·8**	**10·2**	**10·6**	**10·9**	**10·2**

Adjusted	10·1	10·2	10·0	9·6	10·0	9·2
Saskatchewan—						
Crude	7·8	7·9	7·6	7·4	7·4	7·3
Adjusted	8·9	9·2	8·7	8·3	8·4	8·2
Alberta—						
Crude	8·6	8·9	8·3	8·4	8·8	7·9
Adjusted	9·9	10·2	9·7	9·4	10·1	8·9
British Columbia—						
Crude	9·1	10·1	7·8	8·0	8·9	7·0
Adjusted	9·7	10·7	8·7	8·4	9·3	7·6

A reference to Table XXIX shows that the actual amount of difference between the adjusted and the crude rate is not of special importance. For provinces with populations more favourably situated than the "standard population" the "adjusted" rates are higher than the crude rates. For provinces less favourably constituted the reverse is true.

The death rate adjusted to the "Standard million" was 11·5 per 1,000 population in 1921 for England and Wales and 11·8 for the Registration Area of the United States. In 1922 the adjusted death rate for England and Wales was 11·9 and for the Registration Area of the United States 11·8 per 1,000. The death rate in the Registration Area of Canada similarly adjusted was 10·2 per 1,000 population in 1922 and in 1921.

The death rates based on the "Standard million" for the Registration States of the United States for the year 1922 were as follows:—

Total, Registration States	**11·8**	Montana	9·2
California	12·8	Nebraska	9·1
Colorado	13·5	New Hampshire	11·7
Connecticut	11·4	New Jersey	12·3
Delaware	12·4	New York	12·7
Florida	12·6	North Carolina	12·5
Illinois	11·2	Ohio	10·5
Indiana	10·8	Oregon	10·7
Kansas	9·7	Pennsylvania	12·1
Kentucky	10·7	Rhode Island	12·6
Louisiana	12·6	South Carolina	13·3
Maine	11·9	Tennessee	11·2
Maryland	13·4	Utah	10·9
Massachusetts	12·0	Vermont	11·5
Michigan	10·7	Virginia	12·5
Minnesota	9·3	Washington	10·0
Mississippi	11·8	Wisconsin	9·5
Missouri	10·7		

Death Rates by Months.—Table XXX compares the equivalent monthly death rates by provinces for the Registration Area for 1922 and 1921. The table very clearly shows the part that seasonal influences play in the death rates month by month.

TABLE XXX.—DEATH RATES (CRUDE) PER 1,000 POPULATION IN REGISTRATION AREA BY MONTHS FOR 1922 AND 1921

Deaths Due to Certain Specified Causes.—About 84 per cent of all deaths recorded in the Registration Area of Canada in 1922 and 1921 were due to the 26 causes of death specified in Tables XXXI–XXXIV. Table XXXI gives by absolute numbers the mortality credited to each of these causes in 1921 and 1922. Table XXXII shows the proportion which the number of deaths due to each of these causes constitutes of every 1,000 deaths. In 1922, more than 845 deaths out of every 1,000 were due to these causes as compared with 833 in the previous year. For the Registration Area as a whole "Diseases of the heart" (International Classification Numbers 87–90) and "Pneumonia" in the order named showed the highest proportion per 1,000 deaths. "Diseases of early infancy" (International Classification Numbers 160–163, see page 140) claimed the highest proportion of deaths in the Prairie Provinces as did Tuberculosis (all kinds) in the Maritime Provinces. In British Columbia, largely due to the wide extent of its primary industries, deaths due to "External causes" (165-203) come next in importance to "Diseases of the heart" which heads the list in that province.

For the Registration Area as a whole the proportion of deaths due to Tuberculosis dropped from 72·9 per 1,000 in 1921 to 70·4 in 1922, while the proportion of deaths due to Cancer advanced from 1921 to 1922 from 73·5 to 76·0 per 1,000 deaths.

		1921	1,000·0	1,000·0	1,000·0	1,000·0	1,000·0	1,000·0	1,000·0	1,000·0	1,000·0

Table XXXIII gives by sex and age groups the proportion per 1,000 which deaths due to certain principal causes form of the total mortality by specified causes. The table furnishes some interesting data as to the incidence of mortality by sex and age. For example, out of every 1,000 deaths of boys under 5 years of age 363 were credited to "Diseases of Early Infancy" (International List 160–163) which comprises "Congenital Debility," "Premature Birth," "Injury at Birth" and "Lack of Care" as compared with a mortality of 343 girls out of every 1,000 female deaths at this age. The next in importance as a cause of death of children under 5 was "Diarrhoea and Enteritis" with a proportion per 1,000 deaths of 148·3 for males and 150·0 for females, which was followed by Pneumonia with a proportion of 134·2 for males and 136·4 for females. These three causes accounted for more than 60 per cent of total deaths (specified causes) of both sexes at this age.

In the age group 5–14 years the heaviest proportion of male deaths was due to "accidents" (International List 175–203) being nearly, 207 per 1,000, followed by Diphtheria with a proportion of 141·3 and Pneumonia with nearly 79 per 1,000 deaths. On the other hand, the proportion of female deaths due to "accidents" was only 77 per 1,000, and that to Diphtheria 180·8. It may be noted that in every age group the proportion of deaths due to accidents among men is far in excess of that among women. The proportion of deaths per 1,000 due to Influenza, Tuberculosis and Diseases of the Heart was much greater among females than males in this age group. It may also be noted that Diphtheria as a cause of death takes its heaviest toll at this age.

In the age group 15–29 years the largest proportion of deaths among both males and females was claimed by Tuberculosis with 274 males and 338 females per 1,000 deaths of stated causes.

In the age group 30–49, excluding deaths due to accidents, the proportion of deaths (both sexes) from Cancer advanced to second place, Tuberculosis easily retaining first place. It is at this age that Cancer as a cause of death among females passed the century mark. It is also in this age group that the proportion of deaths due to "Diseases of the Heart" shows a marked increase over the proportion shown per 1,000 deaths in either of the younger age groups.

For persons 50 years and over "Diseases of the Heart," Cancer and Pneumonia in the order named claimed the greatest proportion per 1,000 deaths.

Table XXXIV gives the death rate per 100,000 population for the principal causes in the Registration Area as a whole and in each of the eight provinces. The most striking features disclosed by this table is the high mortality rate from Tuberculosis in the water-bound provinces as compared with the prairie provinces. In each of the three Atlantic provinces the rate was more than 100 per 100,000 population, being 127 in Prince Edward Island, 131 in Nova Scotia and 106 in New Brunswick. In the Pacific province, British Columbia, it was 94 and in Ontario 67 per 100,000 population, as compared with a ratio of 44, 51 and 60 respectively in Saskatchewan, Alberta and Manitoba. Cancer also claimed a smaller proportion per 100,000 population in the Prairie Provinces than elsewhere in the Registration Area. The same feature is noticeable as regards Pneumonia and "Diseases of the Heart." The position, however, is reversed as regards "Diseases of Early Infancy" in which British Columbia, Prince Edward Island and Nova Scotia, in the order named, have the lowest rate per 100,000 population. "Diseases of the Heart" is the only cause of death which shows a death rate of 100 or over per 100,000 population for the Registration Area as a whole.

TABLE XXXIV.—DEATH RATES PER 100,000 POPULATION FROM PRINCIPAL CAUSES BY PROVINCES, 1922, 1921.

MARRIAGES

The total number of marriages reported for the registration area in 1922 was 47,811, as compared with 51,073 in 1921 and 59,344 in 1920. There was thus a falling off of 11,533 marriages in 1922 as compared with 1920 and of 3,262 as compared with 1921. The decrease in marriages in 1922 was a feature in all provinces except Prince Edward Island, where there was a slight increase over the previous year.

Marriages by Months.—The proportion of marriages in each month is shown by provinces in Table XXXV. June was the leading month for the Registration Area as a whole, with 12·6 per cent of the total number of marriages during the year. Its nearest rival was September, with 10·5 per cent. September led in number of marriages for Nova Scotia and New Brunswick, while in Prince Edward Island and in the Prairie Provinces the leading position was taken by November. In the other two provinces the honour fell to the month of June. The month of March showed the smallest number of marriages for the Registration Area, having only 5·5 of the total, and occupied the same relative position in every province with the exception of Saskatchewan and Alberta, where it was replaced by the month of May.

TABLE XXXV.—PROPORTION OF MARRIAGES IN EACH MONTH BY PROVINCES, 1922

Months	Total	P.E.I.	N.S.	N.B.	Ont.	Man.	Sask.	Alta.	B.C.
January	6·7	7·4	7·1	6·4	6·0	7·8	8·1	7·4	6·6

December	8·9	8·1	6·9	6·7	8·3	8·6	12·4	10·6	9·4
Total for 1922	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**

Conjugal Condition of Contracting Parties.—Out of each 1,000 grooms in 1922 there were 892 bachelors, 100 widowers and 8 divorced men.

Out of each 1,000 brides there were 909 spinsters, 83 widows and 8 divorced women.

The proportionate distribution of marriages according to the conjugal condition of both contracting parties is shown in Table XXXVI. Marriages in which one or both parties were divorced have been omitted from consideration in this table, as they formed only 1·6 per cent of the total marriages reported in the year.

TABLE XXXVI.—PROPORTIONAL DISTRIBUTION OF MARRIAGES ACCORDING TO CONJUGAL CONDITION OF CONTRACTING PARTIES, EXCLUSIVE OF DIVORCED PERSONS, BY PROVINCES, 1922

Provinces	Total	Bachelors and		Widowers and	
		Spinsters	Widows	Spinsters	Widows
Prince Edward Island	1,000	886·0	13·8	76·0	24·2
Nova Scotia	1,000	852·9	39·7	67·5	40·0
New Brunswick	1,000	828·9	44·1	78·1	48·9
Ontario	1,000	867·5	35·8	56·5	40·3
Manitoba	1,000	854·1	44·8	63·2	38·0
Saskatchewan	1,000	862·9	45·8	57·0	34·4
Alberta	1,000	849·3	56·8	57·8	36·1
British Columbia	1,000	822·5	71·6	60·1	45·8
Total, 1922	**1,000**	**857·6**	**42·8**	**59·8**	**39·8**
1921	**1,000**	**843·3**	**48·6**	**64·6**	**43·6**

Age at Marriage.—The average age of bridegrooms in 1922 was 29·9 years and that of brides 25·4 years. The average excess of the bridegrooms' age was thus 4·5 years. It may be noted that when the contracting parties are grouped by age of bridegroom, the average difference in age is less for the younger groups than for the older, being only 1·9 years for grooms from 21 to 25 years of age and 10·0 years for grooms from 46 to 50 years. This is natural, in view of the fact that the groom's age is generally in excess of the bride's and therefore as his age increases the range of reasonably possible ages for the bride widens. On the other hand, when the parties are grouped by the age of the bride, it is found that, although with less regularity than is shown in the table by age of grooms, the general tendency is for the older brides to marry men nearer their own age than in the case of the younger brides.

TABLE XXXVII.—DIFFERENCE IN AGES OF BRIDEGROOMS AND BRIDES

By Age Group of Bridegroom				By Age Group of Bride			
Age Group of Bridegroom	Average age of Bride groom	Average age of Bride	Average excess of Bride-grooms age	Age Group of Bride	Average age of Bride	Average age of Bride-groom	Average excess of Bride-grooms' age
All bridegrooms	**29·9**	**25·4**	**4·5**	**All brides**	**25·4**	**29·9**	**4·5**
Under 21 years	19·9	19·8	0·1	Under 21 years	19·1	25·1	6·0
21–25 years	23·5	21·6	1·9	21–25 years	23·2	27·4	4·2
26–30 "	28·3	23·9	4·4	26–30 "	28·2	31·6	3·4
31–35 "	33·3	26·7	6·6	31–35 "	33·3	36·5	3·2
36–40 "	38·3	30·2	8·1	36–40 "	38·4	41·6	3·2
41–45 "	43·3	34·5	8·8	41–45 "	43·5	47·2	3·7
46–50 "	48·4	38·4	10·0	46–50 "	48·3	52·6	4·3
51 years and over	59·2	48·2	11·0	51 years and over	58·3	61·3	3·0

The average ages of bridegrooms and brides are shown by provinces in the next table.

TABLE XXXVIII.—AVERAGE AGE OF CONTRACTING PARTIES, 1922

Provinces	Average age of Grooms	Average age of Brides	Average excess of Grooms' age over Brides'
Prince Edward Island	30·3	25·9	4·4
Nova Scotia	29·6	25·1	4·5
New Brunswick	29·7	24·8	4·9
Ontario	29·6	25·7	3·9
Manitoba	30·1	25·1	5·0
Saskatchewan	29·7	24·2	5·5
Alberta	30·2	24·8	5·4
British Columbia	32·0	26·9	5·1
Total	**29·9**	**25·4**	**4·5**

Nativity of Brides and Bridegrooms.—In the Prairie Provinces and British Columbia the majority of the grooms were not of Canadian birth, while the same is true of brides in British Columbia, Alberta and Saskatchewan. In the eastern provinces the number of Canadian born brides and grooms show a marked predominance. For the Registration Area 60 per cent of all grooms and 63·6 per cent of the brides were Canadian born.

Table XXXIX gives the number of marriages per 1,000 population in each province as well as the per cent distribution of brides and grooms according to nativity.

TABLE XXXIX.—MARRIAGES CLASSIFIED BY BIRTHPLACE OF CONTRACTING PARTIES IN 1922 AND 1921

Provinces	Population [1]	Marriages		Per Cent Distribution of Grooms and Brides, by Nativity

PRÉFACE

Cet ouvrage est le second rapport annuel sur les statistiques vitales dressé par le Bureau Fédéral de la Statistique, au moyen des données qui lui sont fournies par les régistraires généraux de toutes les provinces de la Puissance, excepté Québec, en vertu d'une convention réglant cette coopération, intervenue à la Conférence de 1918. Nous croyons utile de reproduire dans la préface de ce second rapport un extrait de la préface du premier rapport anuuel, indiquant l'origine des statistiques vitales, leur objet et les phases successives de leur organisation.

Antérieurement à 1920, les seules statistiques vitales du Canada étaient celles de certains gouvernements provinciaux; malheureusement, elles n'avaient pas un caractère national. L'une des provinces se désintéressait de l'enregistrement des naissances et des décès. Dans les autres, la législation et les méthodes différaient largement; par exemple, la classification internationale des décès n'était pas universellement observée et chaque province procédait, à sa manière propre, au recueil, à la compilation et à la présentation des résultats. Sur les 24 questions figurant ordinairement aux certificats de décès, deux provinces en omettaient 16, une autre 15 et une autre 13. Les règlements administratifs, rendant obligatoires les déclarations d'état civil, différaient entre les provinces et parfois même dans la même province d'une année à l'autre. Cela étant, on arrivait bien à assembler certains totaux, mais ils étaient nécessairement incomplets, et d'ailleurs, insuffisants aux besoins d'un système national de statistiques vitales.

Deux tentatives avaient été faites dans le passé pour remédier à cette situation. En l'année 1882, le gouvernement fédéral avait organisé un système de statistiques de la mortalité dans les cités ayant au moins 25,000 habitants, en subventionnant les bureaux municipaux d'hygiène, chargés de fournir les informations nécessaires. Au début, ce système fonctionna dans cinq cités: Montréal, Toronto, Hamilton, Halifax et St-John, mais dès 1891, il s'étendait à 25 cités. A ce moment, les naissances et les décès étaient constatés uniquement par les municipalités. Lorsqu'on créa les statistiques provinciales, le gouvernement fédéral abandonna son système. Toutefois, presque au même moment, c'est-à-dire en 1893, on convoqua une conférence des fonctionnaires fédéraux et provinciaux, lesquels reconnurent la nécessité d'une étroite collaboration entre les autorités fédérale et provinciales, dans les opérations de recueil, de compilation et de publication des statistiques vitales du Canada.

La seconde tentative fut faite par le moyen du recensement. En vertu des dispositions de la loi originaire sur le recensement, on ajouta aux informations requises une série de questions sur le nombre et les causes des décès survenus dans chaque famille au cours de l'année précédente. Malheureusement, les résultats furent décevants; d'une part, au moins un cinquième des décès était oublié et d'autre part, la cause du décès, dont l'importance est primordiale, n'était donnée que d'une manière évasive. Cet échec fut attribué partiellement au déplacement de la population, aux défaillances de mémoire ou au manque de connaissances chez les personnes donnant les informations, ainsi, d'ailleurs, qu'à l'inexpérience des employés du recensement. Même si les résultats eussent été différents, la statistique de la mortalité prise à intervalles de dix ans n'a qu'une valeur très restreinte. De plus, les statistiques des naissances et des mariages ne le cèdent en rien comme importance à celles de la mortalité. L'impossibilité d'obtenir des statistiques vitales exactes, par le moyen du recensement, a été reconnue depuis de nombreuses années aux Etats-Unis, en France, en Allemagne et dans d'autres pays.

Lorsque le Bureau Fédéral de la Statistique fut établi, en 1918, il eut à résoudre le problème des statistiques vitales; à cette fin, il reprit la direction indiquée en 1893, c'est-à-dire l'établissement d'une étroite et permanente coopération entre les gouvernements fédéral et provinciaux. Un mémoire auquel était annexé un projet de loi provinciale et des modèles de formules d'enregistrement fut d'abord rédigé, après une étude approfondie de la législation et de la procédure en la matière existant tant dans les provinces que dans d'autres pays. Ce mémoire fut officieusement communiqué aux départements provinciaux, plusieurs desquels suggérèrent d'utiles modifications. En résumé, le plan dressé par le Bureau concluait ainsi: (1) chaque province devait opérer les réformes nécessaires pour amener sa législation et ses règlements administratifs à un niveau déterminé; (2) le Bureau devait agir (a) comme agent

de liaison entre les provinces, pour le maintien de l'uniformité et (b) comme bureau central pour la compilation et la tabulation des résultats. Comme tel, le Bureau s'engageait à fournir gratuitement aux provinces les formules uniformes et à payer aux provinces le coût des duplicata d'actes d'état civil qu'elles lui enverraient. Evidemment, d'après ce système, chaque province conservait le droit de tirer parti de ses statistiques pour ses besoins personnels, et d'ailleurs, le plan général demeurait susceptible d'améliorations. Il était à peu près copié sur celui des Etats-Unis et d'autres pays, dont les institutions et la forme de gouvernement ressemblent à ceux du Canada.

A l'ordre du jour de la Conférence figuraient quatre questions principales; la première affirmait le principe de l'enregistrement et, comme corollaire, la cessation du recensement mortuaire décennal. La seconde établissait le principe de la coopération des autorités fédérale et provinciales, sous un plan de législation et de procédure uniformes. En troisième lieu, le projet de loi et les modèles de formules furent discutés dans tous leurs détails et approuvés avec quelques modifications. Finalement, le rôle du Bureau Fédéral de la Statistique fut défini par un projet d'arrêté ministériel. Le texte des résolutions adoptées par la conférence et les termes de l'arrêté ministériel qui furent plus tard approuvés et reçurent la sanction du Cabinet sous la date du 22 avril 1919, sont donnés plus loin.

Le présent rapport est consacré aux naissances, aux décès et aux mariages constatés en l'année 1922, dans huit provinces du Canada. En ce qui concerne la province de Québec, les principes de la loi modèle n'y ont pas encore été adoptés et les actes de naissance, de décès et de mariage n'y sont pas dressés sur les formules uniformes fournies par le Bureau Fédéral de la Statistique.

On a fait figurer dans ce rapport les naissances et les décès survenus parmi la population indigène habitant les provinces qui nous occupent et l'on se propose d'étendre bientôt cette investigation aux Territoires du Nord-Ouest. Depuis le mois de janvier 1922, il est publié des rapports mensuels sur les naissances, les décès et les mariages; les rapports annuels sont également précédés des rapports préliminaires contenant les chiffres les plus essentiels.

Le dépouillement des données et la préparation du rapport ont été exécutés sous la direction de M. E. S. Macphail, chef de la Division de la Démographie, aidé par M. W. R. Tracy.

R. H. COATS,
Statisticien du Dominion.

Bureau Fédéral de la Statistique,
Janvier 1924.

Appendice 1.—Résolutions adoptées à la Conférence de 1918

1. *Suppression de la statistique de la mortalité au recensement décennal.*—La conférence, après examen de la statistique de la mortalité obtenue par les recensements de 1901 et 1911, approuve la suggestion faite par le Bureau Fédéral de la Statistique de cesser toute investigation de cette nature.

2. *Coopération fédérale et provinciale.*—Il est résolu que l'organisation d'un système de statistiques vitales au Canada est une nécessité impérieuse au moment actuel. Ces statistiques (*a*) devant embrasser les naissances, les décès et les mariages; (*b*) être colligées annuellement et (*c*) être recueillies, compilées et publiées de telle manière que l'on puisse établir des comparaisons entre les différentes localités et provinces de la Puissance, aussi bien qu'entre le Canada et les autres pays.

Que la meilleure méthode d'établir ces statistiques réside dans une étroite coopération entre le gouvernement fédéral et les gouvernements provinciaux, selon les modalités prévues par la loi de la Statistique, articles 9 et 34.

Que le principe général devant servir de base à cette coopération sera (1) la mise en vigueur par les provinces d'une législation uniforme et l'adoption de méthodes d'application similaires; (2) l'engagement pris par le Bureau Fédéral de la Statistique (*a*) de coordonner les efforts de toutes les provinces en vue du maintien d'une parfaite homogénéité d'action et de collaborer avec elles, en autant que cela sera nécessaire; (*b*) de se procurer toutes les données nécessaires en opérant le recensement de la population.

3. *Uniformisation des statistiques vitales provinciales.*—Attendu qu'il est essentiel pour la réalisation de ce plan, que les lois, règlements, formules, etc., des différentes provinces soient établis sur les mêmes principes généraux et qu'il soit créé un mode d'enregistrement fonctionnant d'une manière uniforme; enfin, qu'il existe un même étalon d'efficacité statistique, afin que la situation de chaque province puisse être soumise à l'analyse et à la comparaison avec celle des autres provinces ou d'autres territoires équivalents.

Et attendu qu'il est de l'opinion de la conférence, qu'en vue d'établir la coopération entre les autorités fédérale et provinciales, comme elle existe aux Etats-Unis, en Australie et dans d'autres pays constitués par des états fédérés, la première phase consiste à imposer aux provinces l'uniformité en matière de législation et d'administration.

Il est par conséquent résolu: (*a*) Que le projet de loi sur les statistiques vitales, tel que modifié par le comité nommé à cette conférence, ainsi que les formules qui l'accompagnent, soient acceptés comme base d'uniformité de législation, sans préjudice toutefois aux droits de chaque province d'apporter au texte les modifications de détail nécessaires pour

l'adaptation aux conditions locales, mais sans apporter de changement matériel aux clauses essentielles de la loi, ni aux formules qui en forment partie;

(*b*) Qu'en ce qui concerne les naissances et les décès, il soit adhéré aux règles de la pratique de la statistique, telles qu'adoptées par l'Association Statistique Américaine, dans la mesure où elles peuvent être appliquées au Canada;

(*c*) Que la statistique de la mortalité repose sur la nomenclature internationale des causes de décès;

(*d*) Qu'il est désirable qu'aucun changement, soit au projet de loi, soit aux formules présentement approuvées, ne soit effectué par une province quelconque sans avoir au préalable soumis le texte nouveau et les raisons qui militent en faveur de ce changement au Statisticien du Dominion, qui communiquera immédiatement aux autres gouvernements provinciaux copie des changements proposés; et, de plus, qu'aucun changement ne puisse y être fait, qui soit de nature à amoindrir en quelque manière l'efficacité des mesures considérées comme essentielles au succès du plan des statistiques vitales nationales.

Appendice 2.—Arrêté en Conseil sur les statistiques vitales, du 22 avril 1919 (C.P. 693)

Attendu que le ministre par interim du Commerce expose: Que dans le but de découvrir le moyen de prévenir tout double emploi et d'assurer l'uniformité des méthodes de recueil, de compilation et de publication des statistiques des mariages, naissances et décès, entre le Bureau Fédéral de la Statistique et les autorités statistiques des gouvernements provinciaux, deux conférences, l'une en juin 1918 et l'autre en décembre de la même année, ont eu lieu entre les fonctionnaires fédéraux et provinciaux, auxquelles ont été prises les décisions suivantes:

(1) Que le projet ou modèle de loi sur les statistiques vitales préparé par le Bureau Fédéral de la Statistique, ratifié par ces conférences, formera désormais la base de la législation des différentes provinces en matière de statistiques vitales.

(2) Que les provinces exigeront que les actes de mariage, de naissance et de décès soient rédigés sur les formules prescrites, approuvées et adoptées à la conférence de décembre, le Bureau Fédéral de la Statistique devant fournir gratuitement ces formules.

(3) Que les provinces transmettront au Bureau Fédéral de la Statistique, périodiquement, soit l'original lui-même des actes de naissance, de mariage et de décès, soit des copies certifiées et que le Bureau Fédéral de la Statistique se chargera de leur compilation mécanique et de leur relevé sous forme tabulaire.

Par conséquent, Son Excellence le Gouverneur Général en conseil, dans le but d'établir une base mutuellement satisfaisante de coopération, entre le Ministre et les autorités provinciales, sanctionne les règles suivantes:

RÈGLES

1. Le Bureau Fédéral de la Statistique peut recevoir des copies, certifiées ou non, des actes originaux de mariage, de naissance et de décès, dressés par les ministres des différentes religions, les médecins, les entrepreneurs de pompes funèbres ou toutes autres personnes qualifiées à cet effet.

2. Ces copies seront transmises au Bureau Fédéral de la Statistique, soit trimestriellement, soit mensuellement, selon une entente à intervenir, par le département chargé dans chaque province de l'application de la loi sur les statistiques vitales.

3. Le Ministre peut payer au régistraire général telle rémunération qui sera mutuellement déterminée, pour chaque copie régulièrement établie d'acte de naissance, de mariage ou de décès, qui aurait été transmise; le Ministre peut aussi imprimer et fournir gratuitement les formules devant servir à la rédaction de ces actes, par les ministres des différentes religions, médecins, entrepreneurs de pompes funèbres, etc.

4. Les dispositions de l'article précédent ne s'opposent pas à ce que, le cas échéant, l'original lui-même des actes d'état civil soit envoyé au Bureau, qui le retournera après compilation, en vue de simplifier le travail et de réaliser une économie.

5. Le Bureau Fédéral de la Statistique procédera à la compilation, au relevé tabulaire et à la publication des donnés. ainsi recueillies, pour l'ensemble de la Puissance; il peut fournir mensuellement ou trimestriellement, à chaque province, les compilations des données la concernant, après entente à cet égard.

6. Le Bureau Fédéral de la Statistique est également chargé de coordonner les statistiques de l'immigration et de l'émigration avec les statistiques vitales; il devra de plus, en procédant au recensement de la population, se procurer les données nécessitées par les statistiques vitales et en faire la compilation.

7. Le Ministre peut, de temps à autre, prélever sur les crédits affectés au Bureau Fédéral de la Statistique, une somme n'excédant pas $2,000 et la consacrer au paiement des dépenses d'un représentant de chaque province, qui assistera à une conférence des statisticiens tenue à Ottawa. Cette conférence aura pour objet de resserrer les liens unissant les statisticiens des provinces à ceux de la Puissance; de rendre plus étroite la coopération entre les différentes administrations intéressées; de suggérer l'emploi de moyens efficaces, de faire servir les statistiques vitales à l'amélioration de l'hygiène publique et aux besoins de la justice, y compris de temps à autre la révision de la classification des causes de décès; de maintenir l'uniformité de méthode, de recueil, de conservation et de compilation des actes d'état civil, ainsi que de la publication des données statistiques en découlant; enfin, et d'une manière générale, de traiter de toutes les questions intéressant les statistiques vitales.

8. Après chaque révision décennale de la classification internationale des maladies et des causes de décés le ministre peut éditer un «manuel de la liste internationale des causes de décès», lequel contiendra (1) les termes de la liste française, ou tous ceux d'entre eux ayant un équivalent en anglais (2) les termes usités par les médecins canadiens pour indiquer les causes de décès.

9. Le ministre peut aussi éditer et fournir gratuitement aux régistraires des provinces, pour être par eux distribuée aux médecins de leur province, une édition de poche de la liste internationale des causes de décès.

10. Les dispositions qui précèdent s'appliqueront uniquement aux provinces qui établiront la «Loi modèle» comme base de leurs opérations sur les statistiques vitales, ou bien qui adopteront une législation conforme aux caractères distinctifs de cette loi modèle, et à la condition que les formules fournies par le Bureau Fédéral de la Statistique serviront à l'usage auquel elles sont destinées et pourvu enfin que chaque province démontre que 90 pour cent au moins de tous les mariages, naissances et décès survenus au cours de chaque année, ont été portés à la connaissance des autorités.

Le ministre dont il est parlé ci-dessus sera le Ministre du Commerce.

(Signé) RODOLPHE BOUDREAU,
Greffier du Conseil Privé.

STATISTIQUES VITALES DU CANADA, 1922.

INTRODUCTION

Ce rapport présente les statistiques des naissances, des décès et des mariages pour les huit provinces: Ile du Prince-Edouard, Nouvelle-Ecosse, Nouveau-Brunswick, Ontario, Manitoba, Saskatchewan, Alberta et Colombie Britannique, coopérant avec le Bureau Fédéral de la Statistique à cet égard.

Le tableau I indique le nombre des naissances, des décès et des mariages survenus dans chaque province. Il est établi une distinction entre la population urbaine et la population rurale, la population urbaine étant celle des cités, des villes et des villages ayant une population d'au moins 1,000 âmes; partout ailleurs, la population est considérée comme rurale.

TABLEAU I.—NAISSANCES, DÉCÈS ET MARIAGES, PAR PROVINCES, 1922

Provinces	Naissances	Décès	Mariages	Provinces	Naissances	Décès	Mariages
Canada (8 provinces)	**164,194**	**69,028**	**47,811**	Manitoba	17,679	5,754	4,808
Rurale	**85,637**	**33,217**	**14,700**	Rurale	9,554	2,803	1,595
Urbaine	**78,557**	**35,811**	**33,111**	Urbaine	8,125	2,951	3,213
I. Prince Edouard	2,160	1,113	579				
Rurale	1,751	817	354	Saskatchewan	22,339	6,119	5,061
Urbaine	409	296	225	Rurale	17,497	4,274	2,557
Nouvelle-Ecosse	12,693	6,679	3,169	Urbaine	4,842	1,845	2,504
Rurale	6,914	3,665	984				
Urbaine	5,779	3,014	2,185	Alberta	16,163	5,264	4,272
Nouveau Brunswick	11,564	5,158	2,799	Rurale	9,487	2,843	1,439
Rurale	7,874	3,287	1,332	Urbaine	6,676	2,421	2,833
Urbaine	3,690	1,871	1,467				
Ontario	71,430	34,034	23,360	Colombie Britannique	10,166	4,907	3,763
Rurale	29,343	13,908	5,675	Rurale	3,217	1,620	764
Urbaine	42,087	20,126	17,685	Urbaine	6,949	3,287	2,999

Population.—La population des huit provinces qui nous occupent (6,406,682 âmes),—ayant servi à la computation du taux des naissances, des mariages et des décès pour 1921, a été révélée par le recensement de 1921; quant à la population des mêmes provinces en 1920 (6,272,000 âmes) et en 1922 (6,551,000 âmes) elle a été estimée en prenant pour base la méthode de progression géométrique.

Cette méthode présume que l'accroissement de la population de la Puissance, entre le recensement de 1911 et celui de 1921 n'est pas représentée chaque année par un dixième de l'augmentation totale, mais que l'addition faite durant chaque période annuelle s'est maintenue constamment en relation avec la population au commencement de cette période.(1)

(1) En l'absence d'une relation constante et aussi parce qu'il n'existe pas au Canada de statistique de l'émigration, lorsqu'on veut connaître le chiffre de la population dans les intervalles des recensements, on doit recourir à un calcul purement mathématique basé non pas sur des données certaines mais sur des présomptions tirées de lois générales. Reste à découvrir une modalité satisfaisante pour établir cette estimation sur une base purement mathématique.

A première vue, il semble que la meilleure méthode consiste à présumer une progression arithmétique, c'est-à-dire à insérer neuf moyennes arithmétiques entre les années de recensement. Cette méthode a parfois donné de bons résultats. Dans une conférence faite en 1908 devant l'Institut des Actuaires, M. George King, F.I.A., F.F.A., s'exprimait ainsi: "Cette présomption n'est, cependant, pas naturelle .....Les êtres humains engendrent d'autres êtres humains, ce qui fait naturellement supposer que la population s'accroît.....selon une progression géométrique. A tout événement, il est logique de présumer l'existence d'une relation étroite entre l'accroissement de population et la population déjà existante; mais cette relation s'exprime plus exactement par une progression géométrique que par une progression arithmétique.

Si nous prenons pour base un taux d'accroissement géométrique, il est clair que l'approximation sera meilleure si l'on estime la population de la Puissance plutôt que celle d'une province, comme elle serait meilleure dans le calcul de la population de l'univers plutôt que de la Puissance. En étudiant une loi quelconque, on y découvrira certaines irrégularités qui s'atténuent graduellement, au fur et à mesure que les observations deviennent plus nombreuses, les exceptions accidentelles se neutralisant les unes les autres ou bien perdant une partie de leur force en même temps que les facteurs affirmatifs gagnent du terrain. En ce qui concerne la population du Canada, signalons ce seul fait: admettant que, malgré la proportion considérable des immigrants, la population augmente dans un rapport géométrique, il est évident que ces immigrants gravitent autour de quelques provinces et, conséquemment, que le déplacement de ces immigrants et de la population autochtone d'une province à l'autre affecterait sensiblement l'exactitude de cette loi dans son application à une province.

Présumant que la population de la Puissance s'est accrue entre 1911 et 1921 selon une progression géométrique, la relation entre 7,206,643, population de 1911 et 8,788,483, celle de 1921, est 1·2195; rien n'est plus simple que d'intercaler neuf moyennes géométriques entre les deux années de recensement, en multipliant 7,206,643 successivement par 1·020042 (racine dixième de 1·2195, taux d'accroissement), $1{\cdot}020042^2$, $1{\cdot}020042^3$ et ainsi de suite. En procédant ainsi, on peut estimer la population à certaines dates circonscrites entre deux recensements. (Appendice IV, vol. 1, recensement de 1921).

Le recensement des provinces des prairies, effectué en 1916, a établi les chiffres exacts de la population de ces provinces pour cette année-là. Quant au surplus de la Puissance, l'estimation de 1916 a été computée en prenant pour base le taux annuel d'accroissement résultant de la comparaison des chiffres du recensement de 1911 et de celui de 1921. Cette estimation, s'ajoutant aux chiffres du recensement des provinces des prairies, permet de connaître la population de la Puissance en 1916. Quant aux années s'intercalant entre 1911 et 1916, ainsi qu'entre 1916 et 1921, on a calculé leur population par la méthode de progression géométrique. L'estimation de 1922 est également conjecturale; on a présumé que l'accroissement annuel entre 1916 et 1921 s'est continué en 1922.

A cause des défectuosités de la moyenne géométrique, les estimations, pour chacune des provinces considérée isolément, obtenues exclusivement par cette méthode, ne donnent pas un total concordant avec le total de la Puissance. On a donc dû recourir à la méthode arithmétique dans les estimations de la population des provinces, les chiffres ainsi obtenus ayant été mis en concordance avec l'estimation de l'entière population de la Puissance, celle-ci obtenue par la méthode géométrique.(1)

Les recensements de 1911 et 1921 ayant été effectués, l'un et l'autre, à la date du premier juin, les estimations de la population pour les années intermédiaires sont calculées à la même date et non pas au milieu de l'année. Théoriquement, une estimation au premier juillet fournirait une approximation plus exacte de la population moyenne durant l'année que celle du premier juin, mais la différence est insignifiante et d'ailleurs, en calculant la population au premier juin, cela permet de se servir des chiffres exacts du recensement de 1921, qu'il aurait fallu autrement modifier.

Accroissement naturel.—L'accroissement net de la population des huit provinces, par l'excédent des naissances sur les décès, en 1922, fut de 95,166 âmes, dont 47,013 pour le sexe masculin et 48,153 pour le sexe féminin. Pendant l'année, on a constaté 84,057 naissances de garçons et 80,137 naissances de filles, formant un total de 164,194 naissances des deux sexes; durant la même période, les décès se sont élevés à 69,028, dont 37,044 dans la population masculine et 31,984 dans la population féminine. Par conséquent, la population féminine s'est accrue naturellement de 1,140 âmes de plus que la population masculine, dans les huit provinces, en 1922.

---

(1) Pour l'estimation de la population des différentes provinces, permettant de conserver la relation géométrique avec l'ensemble de la Puissance, il existe plusieurs moyens. L'un, employé par A. C. Waters, de l'Office du Registraire de Londres, présume que le taux d'accroissement d'une province a suivi celui de la Puissance selon une progression arithmétique. Cette méthode, expliquée et commentée dans la conférence de M. King plus haut citée, faillirait si on cherchait à l'appliquer à l'île du Prince-Edouard et au Yukon. Parmi les autres méthodes connues, citons une autre de Waters, celle de Travera[i] et celle de H. H. Wolfenden, F.I.A., F.A.S. Cette dernière a le mérite de la simplicité et de la souplesse; il en est fait usage dans les tableaux de ce rapport. On commence par calculer la population de la Puissance en chaque année, dans les intervalles des recensements, au moyen de la progression géométrique, plus haut expliquée; puis, pour connaître la population des provinces, par exemple pour l'année 1916, une moyenne arithmétique est placée pour chacune des provinces, entre sa population de 1911 et celle de 1921 (a^1, a^2, a^3, etc.). Les estimations pour les provinces sont donc

$$a^1 \times \frac{G}{a^1+a^2+a^3}; \qquad a^2 \times \frac{G}{a^1+a^2+a^3}$$ et ainsi de suite.

L'addition de la population des différentes provinces donne le total G. (Appendice IV, vol. I, recensement de 1921).

TABLEAU II.—EXCÉDENT DES NAISSANCES SUR LES DÉCÈS, PAR PROVINCES, POUR CHAQUE SEXE, EN 1921 ET 1922

Provinces		Population masculine			Population féminine			Deux sexes	Population, 1922 (estimée) 1921 (celle du recensement)	Taux de l'accroissement naturel par 1,000 personnes
		Naissances	Décès	Excédent des naissances sur les décès	Naissances	Décès	Excédent des naissances sur les décès	Excédent des naissances sur tous décès		
Ile Prince-Edouard	1922	1,104	588	516	1,056	525	531	1,047	88,000	11·9
	1921	1,073	619	454	1,083	590	493	947	88,615	10·7
Nouvelle-Écosse	1922	6,630	3,515	3,115	6,063	3,164	2,899	6,014	528,000	11·4
	1921	6,695	3,372	3,323	6,326	3,048	3,278	6,601	523,837	12·6
Nouveau-Brunswick	1922	5,955	2,689	3,266	5,609	2,469	3,140	6,406	392,000	16·3
	1921	5,942	2,858	3,084	5,523	2,552	2,971	6,055	379,904	15·9

NAISSANCES

Au cours de l'année 1922, il est né dans ces huit provinces 164,194 enfants vivants, dont 160,362 sont des naissances simples, 1,898 naissances doubles (3,796 enfants) et 12 naissances triples (36 nouveaux-nés). En 1921, ces naissances s'étaient élevées au nombre de 168,979, dont 165,036 naissances simples, 1,937 naissances doubles et 23 naissances triples.

Taux de la natalité.—En 1921, le taux de la natalité par 1,000 personnes vivantes fut de 25·1, comparativement à 26·4 en 1921 et 26·6 en 1920. Entre toutes les provinces, le Nouveau-Brunswick possède le taux le plus élevé, soit 29·5, tandis que le plus bas 18·9 se trouve en Colombie Britannique. On trouvera dans le tableau III le nombre des naissances et le taux de la natalité dans chaque province, en 1920, 1921 et 1922.

TABLEAU III.—NAISSANCES ET TAUX DE LA NATALITÉ PAR PROVINCES, EN 1922, 1921 ET 1920

Provinces	1922			1921			1920		
	Population approximative en milliers	Naissances		Population, chiffres du recensement	Naissances		Population approximative en milliers	Naissances	
		Nombre absolu	Taux par 1,000 personnes		Nombre absolu	Taux par 1,000 personnes		Nombre absolu	Taux par 1,000 personnes

Totaux	**6,551**	**164,194**	**25·1**	**6,406,682**	**168,979**	**26·4**	**6,272**	**166,741**	**26·6**

(1) Les statistiques vitales du comté de Kent, N.-B., n'existent que depuis le premier mai 1921. On a donc dû exclure de ce tableau la population de ce comté en 1920 et un tiers de sa population en 1921.

Masculinité.—On trouvera dans le tableau IV, pour chacune des provinces, le nombre absolu et le nombre proportionnel des naissances des garçons et des filles en 1920, 1921 et 1922. En 1920 et 1922, chacune des huit provinces qui nous occupent eut un excédent de naissances masculines sur les naissances féminines; en 1921, dans une seule province, l'île du Prince-Edouard, les naissances féminines ont prédominé. A cet égard, il peut être intéressant de faire remarquer qu'aux Etats-Unis, en 1921, parmi la population de race blanche des Etats couverts par les statistiques vitales, il est né 1,059 garçons pour 1,000 filles et que, entre 1915 et 1920, la même proportion s'est maintenue presque exactement, savoir: 1,056, 1,058, 1,060, 1,060, 1,059 et 1,059. Dans l'Angleterre et le pays de Galles où les naissances sont exactement enregistrées depuis fort longtemps, on trouve une démonstration excellente de la masculinité des naissances vivantes au sein d'une nombreuse population. Durant les cinquante années écoulées entre 1871 et 1920, la masculinité des naissances s'est traduite par un excédent variant entre 1,032 en 1898, à 1,060 en 1919; avant la grande guerre, l'excédent le plus fort, 1,043, s'était produit en 1875; entre 1915 et 1920, lorsque naissaient 1,000 filles il naissait 1,040, 1,044, 1,048, 1,060 et 1,052 garçons.

TABLEAU IV.—NAISSANCES, (À L'EXCLUSION DES MORT-NÉS) PAR SEXES, ET PROPORTION DES GARÇONS PAR RAPPORT AUX FILLES, 1922, 1921 ET 1920

Provinces		Total des naissances	Garçons		Filles		Garçons par 1,000 filles

Naissances par mois.—On trouvera dans le tableau V le pourcentage, dans chacune des huit provinces, des naissances d'enfants vivants enregistrées chaque mois. On y voit que le plus grand nombre des naissances se placent au mois de mars et que c'est en décembre qu'elles sont le moins nombreuses. Les enfants nés en mars ont été conçus en juin, mois où l'on célèbre le plus de mariages; ceux nés en décembre ont été conçus en mars. Toutefois, cette corrélation ne s'étend qu'aux primipares; aussi, en comparant le tableau V avec le tableau XXXV, on constatera que les naissances se répartissent au cours de l'année plus également que les mariages; d'autre part, on remarque que cette corrélation entre les mariages et les naissances n'existe pas dans chaque province; par exemple, dans la Saskatchewan c'est en mars qu'il y a le plus de naissances et en décembre qu'il y en a le moins. Dans la même province on se marie surtout en novembre et très peu en mai.

TABLEAU V.—PROPORTION DES NAISSANCES (À L'EXCLUSION DES MORT-NÉS) EN CHAQUE MOIS PAR PROVINCES, EN 1922

	Total	I. P.-E.	N.-E.	N.-B.	Ont.	Man.	Sask.	Alberta	C.B.

Ages des pères et mères des nouveaux-nés.—Le tableau VI contient le relevé numérique et proportionnel des naissances d'enfants vivants et légitimes, selon l'âge de leurs père et mère. En 1922, dans huit cas, la mère avait moins de 15 ans, fait qui s'était produit neuf fois en 1921 Près de 30 p.c. des mères dont on connaît l'âge avaient moins de 25 ans, tandis que 10·4 p.c seulement des pères avaient le même âge. Un peu moins de 6 p.c. des naissances déclarées étaient attribubales aux mères de 40 ans et plus, tandis que les pères de 40 ans et plus représentent 20·4 p.c. de l'ensemble. En 1922, l'âge des mères est resté inconnu pour 3 p.c. d'entre elles seulement, au lieu de 12 p.c. l'année précédente.

TABLEAU VI.—NAISSANCES D'ENFANTS LÉGITIMES (À L'EXCLUSION DES MORTS-NÉS) CLASSIFIÉES SELON L'ÂGE DES PÈRE ET MÈRE, 1921 ET 1922

Pères et mères par groupes d'âge	Mères				Pères			
	1922		1921		1922		1921

Total, âge inconnu	4,452	–	19,250	–	3,950	–	19,199	–
Totaux	**160,823**	–	**165,645**	–	**160,823**	–	**165,645**	–

Fécondité.—Le tableau VII relate le pourcentage des naissances légitimes attribuables aux mères de diverses origines. Les mères nées à l'étranger représentent un pourcentage de 2·5 p.c. dans l'île du Prince-Edouard et de 4·6 p.c. au Nouveau-Brunswick; au Manitoba, les mères nées à l'étranger ont donné naissance à 32·5 p.c. des enfants vivants, dans la Saskatchewan à 44 p.c. et dans l'Alberta à 44·9 p.c. Pour l'ensemble des huit provinces, les mères nées au Canada revendiquent 58·2 p.c. des naissances, celles nées dans les autres parties de l'empire britannique 21·2 p.c. et celles nées à l'étranger 20·6 p.c.

TABLEAU VII.—POURCENTAGE DES ENFANTS LÉGITIMES NÉS VIVANTS DONT LES MÈRES SONT NÉES AU CANADA, DANS LES AUTRES PARTIES DE L'EMPIRE BRITANNIQUE OU À L'ÉTRANGER, PAR PROVINCES, 1922

Provinces	Pourcentages des naissances par pays d'origine des mères			
	Total	Nées au Canada	Nées dans l'empire britannique	Nées à l'étranger
Ile du Prince-Edouard	100·0	95·3	2·2	2·5
Nouvelle-Ecosse	100·0	85·2	10·8	4·0
Nouveau-Brunswick	100·0	91·0	4·4	4·6
Ontario	100·0	67·5	22·3	10·2
Manitoba	100·0	43·5	24·0	32·5
Saskatchewan	100·0	36·4	19·6	44·0
Alberta	100·0	30·9	24·2	44·9
Colombie Britannique	100·0	33·7	43·4	22·9
Total	**100·0**	**58·2**	**21·2**	**20·6**

En supposant que le nombre des femmes de 15 à 45 ans, quel que soit le lieu de leur naissance, soit dans la même proportion par rapport à la population totale en 1922, qu'il l'était au recensement de 1921, les chiffres du tableau VIII nous éclaireront sur la fécondité relative des femmes mariées de 15 à 45 ans nées au Canada, dans les autres parties de l'enpire britannique ou à l'étranger. Hormis la Colombie Britannique, dans chacune des provinces qui nous occupent, le nombre des naissances en 1922, par 1,000 femmes mariées, d'âge fructifère, fut plus grand parmi celles nées à l'étranger que dans les autres catégories. Pour l'ensemble des provinces, on constate en 1922 une moyenne de 201 enfants par 1,000 femmes mariées nées à l'etranger, au lieu de 168 par 1,000 femmes mariées nées dans les autres parties de l'empire britannique et 193 par 1,000 femmes mariées nées au Canada, les unes et les autres ayant de 15 à 45 ans. La moyenne générale est de 189 naissances par 1,000.

TABLEAU VIII.—NOMBRE DE NAISSANCES (MORT-NÉS EXCLUS) PAR 1,000 FEMMES MARIÉES DE 15 À 45 ANS, PAR LIEU DE NAISSANCE DE LA MÈRE, 1922

Provinces	Naissances par 1,000 mères—			
	Total	Nées au Canada	Nées dans l'empire britanique	Nées à l'étranger
Ile du Prince-Edouard	246·0	243·4	267·4	368·1

Total	**188·8**	**193·4**	**167·8**	**201·1**

Lieu de naissance des parents.—Le tableau IX, qui classifie les enfants nés en 1922 selon le lieu de naissance de leurs parents, nous fait connaître dans quelle mesure la génération qui pousse sera le produit de parents autochtones, ou bien nés dans l'empire britannique ou à l'étranger. Le mot " inconnu ", dans la colonne indiquant le pays d'origine, quand il s'agit du père, s'applique aussi bien aux naissances illégitimes qu'au manque de renseignements, mais quand il s'applique à la mère, il ne faut accuser que l'absence d'information.

TABLEAU IX.—NOMBRE ET PROPORTION DES NAISSANCES (MORT-NÉS EXCLUS) SELON LE LIEU DE NAISSANCE DES PÈRE ET MÈRE, 1922 ET 1921

Pays d'origine	Nombre des enfants dont le père ou la mère, ou l'un et l'autre sont nés dans les pays ci-après						Pourcentage des enfants dont le père ou la mère ou l'un et l'autre sont nés dans les pays ci-après

(1) Moins d'un dixième de un pour cent.

(2) Ce chiffre représente pour 1922 le nombre des enfants dont le père et la mère sont nés dans le même pays. La différence entre ce chiffre (115,803) et le total des naissances (164,194) égale le nombre d'enfants (48,386) dont le père et la mère sont dans des catégories différentes.

(3) A l'exclusion du pourcentage (28·4) représenté par les enfants dont le père et la mère sont dans des catégories différentes.

(4) Même explication que dans la note 2, mais se rapportant aux chiffres de 1921.

(5) Même explication que dans la note 3, mais se rapportant aux chiffres de 1921.

Origine raciale des pères et mères.—On verra par le tableau X le nombre et la proportion des naissances appartenant aux principaux groupes de races. A titre d'indication des améliorations, qui se sont produites dans la collection des statistiques vitales, signalons qu'en 1921 l'origine raciale n'était pas indiquée pour 12·8 p.c. des pères et 11·7 p.c. des mères, tandis qu'en 1922 cette absence d'information ne s'applique qu'à 8·9 p.c. des pères et à 7·5 p.c. des mères.

TABLEAU X.—NOMBRE ET PROPORTION DES NAISSANCES (MORT-NÉS EXCLUS) SELON L'ORIGINE RACIALE DES PÈRE ET MÈRE, 1922, 1921

Origine raciale des père et mère	Nombre de nouveaux-nés dont le père ou la mère, ou l'un et l'autre appartiennent aux origines ci-après						Pourcentage des nouveaux-nés dont le père ou mère, ou l'un et l'autre appartiennent aux origines ci-après

(1) Moins d'un dixième de un pour cent.

(2) Ce chiffre représente pour 1922 le nombre des enfants dont le père et la mère ont la même origine raciale. La différence entre ce chiffre (111,404) et le total des naissances (164,194) égale le nombre d'enfants (52,790) dont le père et la mère sont dans des catégories différentes.

(3) A l'exclusion du pourcentage (32·5) représenté par les enfants dont le père et la mère sont dans des catégories différentes.

(4) Même explication que dans la note (2), mais se rapportant aux chiffres de 1921.

(5) Même explication que dans la note (3), mais se rapportant aux chiffres de 1921.

Enfants illégitimes.—Sur les 164,194 enfants vivants dont la naissance a été constatée en 1922, dans les huit provinces qui nous occupent, 3,371, soit 20·5 par 1,000 naissances d'enfants vivants sont nés hors mariage, au lieu de 19·7 par 1,000 en 1921.

Parmi les mères non mariées, plus de 38 p.c. avaient moins de 20 ans en 1922, contre 33 p.c. en 1921; il y avait aussi dans ce nombre 39 jeunes filles de moins de 15 ans. La proportion des naissances illégitimes par rapport à l'ensemble des naissances a été plus élevée en 1922 qu'en 1921 dans presque toutes les provinces.

Dans le tableau XI on trouve une classification des enfants illégitimes, selon l'âge et le lieu de naissance de leurs mères; le tableau XII répartit ces naissances dans chaque province, selon l'âge de la mère.

TABLEAU XI.—ENFANTS ILLÉGITIMES CLASSIFIÉS SELON L'ÂGE ET LE LIEU DE NAISSANCE DE LA MÈRE, EN 1922

MORTALITÉ INFANTILE

Le taux de la mortalité des enfants de moins d'un an est basé sur le nombre des naissances déclarées durant la période, à l'exclusion des mort-nés. Donc, le taux de la mortalité infantile est représenté par le nombre des décès d'enfants de moins d'un an pour 1,000 enfants nés vivants. En 1922 ce taux fut de 86·8, comparativement à 88·1 pour 1921 et 100·1 pour 1,000 en 1920. Dans les provinces en 1922 ce taux a varié depuis 68·1 par 1,000 dans la Colombie Britannique jusqu'à 103·3 par 1,000 au Nouveau-Brunswick. La mortalité infantile dans Ontario et dans le provinces maritimes a sensiblement décru en 1922; au contraire, elle a une tendance à s'accroître dans les provinces de l'ouest.

TABLEAU XIV.—MORTALITÉ INFANTILE DANS LES PROVINCES EN 1922, 1921 ET 1920 ET PROPORTION PAR 1,000 NAISSANCES VIVANTES

Provinces	Naissances vivantes 1922	Nouveaux-nés morts en 1922		Naissances vivantes 1921	Nouveaux-nés morts en 1921		Naissances vivantes 1920	Nouveaux-nés morts en 1920

Totaux	**164,194**	**14,256**	**86·8**	**168,979**	**14,893**	**88·1**	**166,741**	**16,695**	**100·1**

Année de naissance et âge au décès.—Quoique les chiffres de la mortalité infantile que présente le tableau XIV soient basés sur les naissances et les décès enregistrés en 1922, il est évident qu'un certain nombre d'enfants décédés en 1922 étaient nés en 1921, quoique ayant vécu moins d'un an. On constate en effet que les cas de cette nature se sont présentés au nombre de 2,956, soit 20·7 p.c. du total des mortalités infantiles durant l'année, laissant 11,300 (ou 79·3 p.c. du total) décès d'enfants nés en 1922. Le petit nombre des enfants nés l'année précédente et morts en 1922 permet de conclure que le taux de la mortalité infantile basé sur la relation entre les décès d'une année quelconque et les naissances de la même année présente un tableau exact de la réalité et que ces chiffres peuvent se comparer d'une année à l'autre, sauf pour le cas exceptionnel où un grand changement se produirait dans le nombre des naissances d'une année à l'autre. Le fait que plus de 50 p.c. des enfants morts en 1922 ont vécu moins d'un mois explique la grande prépondérance des décès parmi les enfants dont la naissance et la mort appartiennent à la même année. Le tableau XV nous donne la proportion par 1,000 des enfants de moins d'un an décédés en 1922, avec indication de la durée de leur existence, par chaque province.

TABLEAU XV.—PROPORTION PAR 1,000 DÉCÈS DES ENFANTS DE MOINS D'UN AN GROUPÉS SELON LA DURÉE DE LEUR EXISTENCE, EN 1922

Mortalité infantile, par sexes.—Le tableau XVI établit une distinction entre le sexe des enfants décédés dans leur première année, pour chacune des huit provinces en 1922, 1921 et 1920. On y voit que pour l'ensemble de ces provinces, les naissances masculines ont excédé les naissances féminines de 3,920 unités en 1922; la mortalité infantile, sévissant avec plus d'intensité chez les garçons que chez les filles, a réduit l'avantage des garçons à 1,826 unités à la fin de l'année. Dans l'ensemble, la proportion des décès par 1,000 naissances vivantes en 1922 fut de 97 pour les garçons, de 76 pour les filles et de 87 pour les deux sexes. En 1921, ce taux avait été de 98 pour les garçons, de 77 pour les filles et de 88 pour les deux sexes.

TABLEAU XVI.—NOMBRE ET PROPORTION DE LA MORTALITÉ INFANTILE PAR RAPPORT AUX NAISSANCES D'ENFANTS VIVANTS ET PAR SEXE EN 1922, 1921 ET 1920

Mortalité infantile dans les autres pays.—Dans le tableau XVII on établit un parallèle entre la mortalité infantile au Canada et dans différents autres pays. On s'est servi pour les autres pays des chiffres les plus récents. On remarquera que, partout, la mortalité infantile est plus forte chez les garçons que chez les filles.

TABLEAU XVII.—NAISSANCES, DÉCÈS DANS LA PREMIÈRE ANNÉE ET TAUX DE LA MORTALITÉ INFANTILE, PAR SEXE, DANS HUIT PROVINCES DU CANADA ET DANS CERTAINS AUTRES PAYS

Mortalité infantile par causes.—Sur la totalité des enfants de moins d'un an décédés en 1922 dans les huit provinces, 85·7 p.c. des garçons et 85·8 p.c. des filles ont été victimes des treize maladies énumérées dans le tableau qui suit. La naissance prématurée et les blessures à la naissance ont causé 24·6 p.c. des décès chez les garçons et 24·7 p.c. chez les filles de moins d'un an.

(1) Embrasse fièvre typhoïde, variole, rougeole, fièvre scarlatine, coqueluche, diphtérie, oreillons, choléra nostras, dysenterie, érysipèle, poliomyélite aigue, encéphalite, léthargie, méningococcémie, méningite, varicelle, infection gonococcique et infection purulente.

Mortalité infantile dans les cités.—Le tableau XIX nous renseigne sur les naissances, les décès des enfants de moins d'un an et sur le taux de la mortalité infantile, dans les cités de 40,000 âmes et plus, pendant les années 1921 et 1922. Pour cette dernière année, Ottawa détient le taux le plus élevé, 127·7 par 1,000 naissances d'enfants vivants, suivi par Halifax avec 125·1 par 1,000. En 1921, la plus forte mortalité se trouvait à St-John avec 146·9 par 1,000, puis à Halifax avec 134·5 et à Ottawa avec 129·8 par 1,000 naissances d'enfants vivants. Certaines cités se placent fort-au-dessous de la moyenne générale, telles sont: Vancouver, avec un taux de 66·6, London, Ont., avec 67·7, Calgary, avec 77·5 et Toronto avec 77·9 par 1,000 naissances en 1922. En étudiant les chiffres de la statistique des naissances et de la mortalité infantile dans les cités, il ne faut pas perdre de vue qu'un certain nombre de femmes appartenant à la population rurale vont faire leurs couches dans les cités.

TABLEAU XIX—MORTALITÉ INFANTILE DANS LES CITÉS DE 40,000 ÂMES ET PLUS EN 1922 ET 1921

Cités de 40,000 âmes et plus (*Huit provinces seulement*)	1922			1921

MORTALITÉ PUERPÉRALE

Dans le tableau XX, les décès de nature puerpérale sont classifiés par âge des défuntes et pour chacune des huit provinces, tant en 1922 qu'en 1921. En 1922, ces décès étaient au nombre de 907, soit à raison de 5·5 par 1,000 naissances d'enfants vivants, au lieu de 868 ou 5·1 par 1,000 en 1921. Hormis Ontario, chaque province présente une élévation du taux de cette mortalité.

	1921	**5·1**	**3·2**	**4·3**	**4·1**	**5·2**	**4·4**	**5·7**	**6·7**	**4·8**

En classifiant les enfants nés vivants en 1922, selon l'âge de leur mère et en opérant une répartition proportionnelle entre les différents groupes d'âge de ceux dont l'âge de la mère est resté inconnu (4,599), nous découvrons que les mères âgées de moins de 20 ans ont donné le jour à 10,372 enfants, celles entre 20 et 24 à 40,093, celles de 25 à 29 à 45,309, celles de 30 à 39 à 58,941 et celles de 40 ans et plus à 9,479.

Le taux de la mortalité puerpérale par 1,000 enfants nés vivants fut de 4·5 pour les mères de moins de 20 ans, de 3·7 entre 20 et 24, de 4·3 entre 25 et 29, de 6·8 entre 30 et 39 et de 12·8 entre 40 et 49 ans.

Dans l'état qui suit, le taux de la mortalité puerpérale, à chaque période d'âge, est indiqué proportionnellement aux naissances d'enfants vivants.

On remarquera que le taux de la mortalité chez les mères de 40 à 49 ans est presque le triple de celui qui frappe les mères de 20 à 24 ans. A remarquer aussi que le taux de la mortalité chez les mères de moins de 20 ans et chez celles de 25 à 29 ans est plus élevé que dans le groupe de 20 à 24 ans.

Groupes d'âge	Naissances vivantes, 1922	Mortalité puerpérale, 1922		Groupes d'âge	Naissances vivantes, 1922	Mortalité puerpérale, 1922	
		Décès	Taux par 1,000 naissances vivantes			Décès	Taux par 1,000 naissances vivantes

(1) Accidentel, mais non criminellement provoqué.

On trouvera dans le tableau XXII l'énumération d'un certain nombre de maladies indiquées comme causes de décès, mais avec complications résultant de l'état puerpéral; on y verra que les causes les plus fréquentes sont: la grippe, la pneumonie, les affections du cœur et la tuberculose.

MORTALITÉ (TOUTES CAUSES)

Les décès à tous âges constatés dans les huit provinces en 1922, sur une population de 6,551,000 âmes, se sont élevés à 69,028, soit un taux brut de mortalité de 10·5 par 1,000, comparativement à 67,722 décès et un taux de 10·6 en 1921, et à 77,722 décès et un taux de 12·4 par 1,000 en 1920.

Le tableau XXIII (dans lequel la population est approximativement estimée pour 1922 et 1920 et conforme aux chiffres du recensement pour 1921) indique le nombre total des décès et le taux de la mortalité dans chaque province. On y voit que dans Ontario et dans chacune des provinces maritimes le taux de la province est plus élevé que la moyenne de l'ensemble; au contraire, il est inférieur dans les provinces des prairies et dans la Colombie Britannique. Pour 1922, la province du Nouveau-Brunswick présente la mortalité la plus élevée, avec un taux de 13·2 par 1,000 âmes, tandis que le minimum se trouve dans la Saskatchewan, avec 7·8 par 1,000. Le taux de la mortalité au Nouveau-Brunswick avait été de 15·6 par 1,000 en 1920; il est tombé à 14·2 en 1921 et à 13·2 en 1922.

TABLEAU XXIII.—MORTALITÉ, NOMBRES ABSOLUS ET PROPORTIONNELS, PAR PROVINCES, EN 1922, 1921 ET 1920

(1) Voir la note qui fait suite au tableau III.

Au moyen du relevé qui suit, indiquant le taux de la mortalité dans les principaux pays de l'univers, on peut constater que trois d'entre eux seulement: la Nouvelle-Zélande, avec 8·8; l'Australie avec 9·2 et l'Union Sud-Africaine avec 9·5 par 1,000 âmes, ont une mortalité inférieure à celle des huit provinces canadiennes qui nous occupent, (nos indigènes y compris).

(1) Chiffres préliminaires. (2) Etats soumis aux statistiques vitales

Répartition selon les âges.—Le tableau XXIV répartit les décès de 1922 et 1921 en nombres absolus, par groupes d'âge quinquennaux, ces groupes étant établis jusqu'à 80 ans. Le tableau XXV, qui lui fait suite, opère la répartition de ces décès par pourcentages, dans les mêmes groupes d'âge. Le recensement de 1921 ayant été effectué à la date du premier juin, on estime que l'âge de la population, en 1922, basée sur le recensement, offre une exactitude suffisante à cet égard.

Il résulte du recensement de 1921 que 2·27 p.c. de la population de ces huit provinces étaient âgés de moins d'un an, 11·54 p.c. de moins de 5 ans, 30·23 p.c. de 5 à 19 ans, soit 41·76 p.c. au-dessous de 20 ans. D'autre part, la statistique de la mortalité nous apprend que 20·70 p.c. de la totalité des décès de 1922 et 22·03 p.c. de 1921, s'appliquent à des enfants n'ayant pas encore complété leur première année et que 26·51 p.c. de la totalité des décès de 1922 et 28·29 p.c. de ceux de 1921 s'appliquaient à des enfants de moins de cinq ans, tandis que la mortalité des enfants et des adolescents de 5 à 19 ans ne représente que 6·94 p.c. de l'ensemble des décès de 1922 et 7·45 p.c. en 1921. En remontant l'échelle des âges on voit que quoique seulement 4·84 p.c. de la population recensée atteignait ou dépassait l'âge de 65 ans, 32·47 p.c. de tous les décès se plaçaient dans ce groupe d'âge en 1922 et 30·52 p.c. en 1921.

D'autre part, il résulte du recensement de 1921 que 68·04 p.c. de la population recensée se plaçait entre 5 et 44 ans, tandis que les décès attribués à ce groupe d'âge ne représentent que 22·80 p.c. de la totalité en 1922 et 23·45 p.c. en 1921.

TABLEAU XXIV.—RÉPARTITION NUMÉRIQUE DES DÉCÈS PAR CERTAINS GROUPES D'ÂGES EN 1922 ET 1921 ET RÉPARTITION NUMÉRIQUE DE LA POPULATION DES MÊMES ÂGES D'APRÈS LE RECENSEMENT DE 1921

Mortalité par sexe et par groupes d'âge.—Les tableaux XXVI, XXVII et XXVIII relèvent le taux de la mortalité, par chaque groupe d'âge, d'abord pour les deux sexes, puis pour chaque sexe séparément, tant en 1922 qu'en 1921. Pour estimer la population de chacun de ces groupes en 1922, on a présumé que ces groupes avaient entre eux la même relation qu'au recensement de 1921. Dans ce calcul on n'a tenu nul compte de la population dont l'âge est ignoré soit au recensement, soit dans les actes de décès, cette influence ayant été jugée négligeable.

Taux "ajusté" de la mortalité.—Le taux de la mortalité nous donne la mesure des décès survenus dans une certaine unité de population, 1,000 âmes par exemple, mais à première vue il ne nous permet pas de nous rendre compte des tendances de la mortalité considérée sous ses multiples aspects. Par exemple, nous venons de voir dans les tableaux XXVII et XXVIII que le taux de la mortalité diffère sensiblement d'un sexe à l'autre. D'autre part, les enfants de moins de 5 ans et les adultes ayant dépassé l'âge de 65 ans paient à la mort un tribut plus lourd que les autres groupes d'âge. Par conséquent, il est exact de dire que le taux de la mortalité réfléchit non seulement l'influence des facteurs tels que le climat, la salubrité, le genre d'existence, l'hérédité, le milieu, mais aussi les différences susceptibles d'exister dans la constitution de la population de deux agglomérations, tout spécialement certaines anomalies dans la relation entre les tout jeunes enfants ou bien les vieillards et la masse de la population.

Sans doute le taux de la mortalité a son utilité, quoiqu'il manque de la souplesse nécessaire pour s'adapter aux conditions particulières de telle ou telle population. La différence entre le taux de la mortalité et le taux de la natalité représente l'accroissement naturel de la population pendant une période donnée.

Evidemment, les avantages de la computation du taux de la mortalité selon les sexes et selon les âges sont incontestables; toutefois, si l'on veut établir un parallèle entre les pays, les états ou les provinces, il est utile d'adopter une méthode de comparaison plus sommaire, c'est-à-dire de recourir au taux unique, pour chaque territoire. On y parvient en rapprochant les taux de la mortalité des provinces qui nous occupent du taux d'un certain territoire, qui a été choisi comme standard ou, en d'autres termes, en calculant ce qu'aurait été le taux brut de la mortalité dans les pays qu'il s'agit de comparer, si leur population avait été exactement constituée de la même manière quant aux sexes et à l'âge. Le taux hypothétique résultant de ce mode de computation est appelé "standardisé" ou "ajusté".

La population ayant servi de standard pour nos calculs est celle de l'Angleterre et du pays de Galles résultant du recensement de 1901. Ce standard est utilisé dans les rapports du registraire général de l'Angleterre et du pays de Galles; il a également été adopté par le Bureau du recensement des Etats-Unis, pour la computation de son taux "ajusté" de la mortalité. A cette méthode on a donné le nom de "million standard d'Angleterre et du pays de Galles, 1901".

En 1901, la population de l'Angleterre et du pays de Galles, par chaque million d'âmes, se divisait, au point de vue du sexe et de l'âge ainsi qu'il suit:

Groupes d'âge	Deux sexes	Masculin	Féminin
Tous âges	**1,000,000**	**483,543**	**516,457**
Au-dessous de 5 ans	114,262	57,039	57,223
5- 9 ans	107,209	53,462	53,747
10–14 "	102,735	51,370	51,365
15–19 "	99,796	49,420	50,376
20–24 "	95,946	45,273	50,673
25–34 "	161,579	76,425	85,154
35–44 "	122,849	59,394	63,455
45–54 "	89,222	42,924	46,298
55–64 "	59,741	27,913	31,828
65–74 "	33,080	14,691	18,389
75 ans et plus	13,581	5,632	7,949

Pour le calcul du taux "ajusté" de la mortalité, par sexes, que l'on trouve dans le tableau XXIX, on s'est servi comme base des chiffres des tableaux XXVII et XXVIII, appliqués aux groupes correspondants de la population choisie comme standard. Une totalisation des décès de ces groupes révéla les décès survenus dans le million standard, lesquels furent ramenés au taux par mille. On a cru nécessaire d'y faire une correction, à cause des décès de personnes d'âge inconnu.

Le taux "ajusté", pour chacun des sexes séparément, fut obtenu par la superposition du taux de la mortalité de l'un des sexes et de l'un des groupes au groupe correspondant, mais pour les deux sexes de la population standard. L'addition des décès survenus dans les onze groupes représente le taux de la mortalité dans un million d'âmes. Ce procédé permet la comparaison non seulement entre les différentes provinces mais aussi entre les sexes.

Il ne faut jamais perdre de vue que le taux brut est un taux réel, tandis que le taux "ajusté" n'est qu'hypothétique. Lorsque l'on se sert de ce dernier, cela signifie que l'on a supprimé les différences d'âge et de sexe susceptibles d'exister entre deux populations mises en parallèle. Sa valeur se limite exclusivement à la comparaison.

Au point de vue de son sexe et de son âge la population de l'Angleterre et du pays de Galles était, en 1901, "exceptionnellement favorable à une basse mortalité", selon la propre expression du registraire général. Le Canada, lui aussi, se trouve dans le même cas, particulièrement en raison du grand nombre de ses immigrants jeunes et robustes; après l'ajustement nécessaire, le taux de la mortalité des huit provinces canadiennes concourant aux statistiques vitales, est descendu de 10·5, sous sa forme brute, à 10·2 sous sa forme "ajustée."

TABLEAU XXIX.—TAUX BRUT ET TAUX AJUSTÉ DE LA MORTALITÉ EN 1922 ET 1921

Provinces	1922			1921		
	Deux sexes	Masculin	Féminin	Deux sexes	Masculin	Féminin
Canada (huit provinces)—						
Brut	**10·5**	**10·8**	**10·2**	**10·6**	**10·9**	**10·2**
Ajusté	**10·2**	**10·6**	**9·8**	**10·2**	**10·7**	**9·8**
Ile du Prince-Edouard—						
Brut	12·6	13·1	12·0	13·6	13·8	13·5
Ajusté	9·3	9·8	8·8	10·3	10·6	10·1
Nouvelle-Ecosse—						
Brut	12·6	13·1	12·2	12·3	12·7	11·8
Ajusté	10·5	11·1	9·9	10·3	10·8	9·8
Nouveau-Brunswick—						
Brut	13·2	13·5	12·8	14·2	14·8	13·7
Ajusté	11·7	11·9	11·4	12·4	12·8	11·9
Ontario—						
Brut	11·4	11·7	11·1	11·8	12·2	11·4
Ajusté	10·4	10·8	9·9	10·8	11·3	10·3
Manitoba—						
Brut	9·2	9·4	9·0	8·8	9·2	8·4
Ajusté	10·1	10·2	10·0	9·6	10·0	9·2
Saskatchewan—						
Brut	7·8	7·9	7·6	7·4	7·4	7·3
Ajusté	8·9	9·2	8·7	8·3	8·4	8·2
Alberta—						
Brut	8·6	8·9	8·3	8·4	8·8	7·9
Ajusté	9·9	10·2	9·7	9·4	10·1	8·9
Colombie Britannique—						
Brut	9·1	10·1	7·8	8·0	8·9	7·0
Ajusté	9·7	10·7	8·7	8·4	9·3	7·6

On peut voir par l'examen du tableau XXIX que la différence entre le taux brut et le taux ajusté ne présente pas d'importance spéciale. Dans les provinces dont la situation de population est plus favorable que celle du standard, le taux ajusté est plus haut que le taux brut; dans les autres provinces, c'est le contraire qui se produit.

Le taux de la mortalité ajusté au "million standard" était de 11·5 par 1,000 âmes en 1921, dans l'Angleterre et le pays de Galles et de 11·8 aux Etats-Unis (partie soumise à cette statistique). En 1922, ce taux ajusté montait à 11·9 dans l'Angleterre et le pays de Galles et restait stationnaire à 11·8 aux Etats-Unis. Dans les huit provinces du Canada, le même taux ajusté était de 10·2 par 1,000 âmes tant en 1922 qu'en 1921.

Les taux de la mortalité, basés sur le "million standard", s'établissaient ainsi qu'il suit, aux Etats-Unis (partie soumise à cette statistique) en 1922:

Moyenne générale	**11·8**	Montana	9·2
Californie	12·8	Nebraska	9·1
Colorado	13·5	New Hampshire	11·7
Connecticut	11·4	New Jersey	12·3
Delaware	12·4	New York	12·7
Floride	12·6	Caroline du Nord	12·5
Illinois	11·2	Ohio	10·5
Indiana	10·8	Oregon	10·7
Kansas	9·7	Pennsylvanie	12·1
Kentucky	10·7	Rhode Island	12·6
Louisiane	12·6	Caroline du Sud	13·3
Maine	11·9	Tennessee	11·2
Maryland	13·4	Utah	10·9
Massachusetts	12·0	Vermont	11·5
Michigan	10·7	Virginie	12·5
Minnesota	9·3	Washington	10·0
Mississipi	11·8	Wisconsin	9·5
Missouri	10·7		

Mortalité par mois.—Dans le tableau XXX on trouve une comparaison du taux mensuel de la mortalité, dans nos provinces, pour 1922 et 1921. De ce tableau ressort clairement l'influence qu'exercent les saisons sur le taux de la mortalité, de mois en mois.

TABLEAU XXX.—TAUX DE LA MORTALITÉ (BRUT) PAR 1,000 ÂMES ET PAR MOIS, DANS HUIT PROVINCES, EN 1922 ET 1921

Provinces	Année	Taux annuel	Equivalent du taux de la mortalité annuelle

Décès dus à certaines causes.—Environ 84 p.c. de la totalité des décès constatés dans huit provinces canadiennes, en 1922 et 1921, sont attribués aux 26 causes de décès énumérées dans les tableaux XXXI-XXXIV. Le tableau XXXI nous donne le nombre des décès revendiqués par chacune de ces causes en 1921 et 1922; le tableau XXXII indique la porportion, par 1,000 décès de chacune de ces causes. En 1922, sur 1,000 décès, plus de 845 sont attribuables à ces causes, au lieu de 833 l'année précédente. Les "affections du cœur" (nos 87-90 de la classification internationale) et la "pneumonie" se partagent le plus grand nombre des décès. Les "maladies du premier âge" (nos 160-163 de la classification internationale, voir

p. 140) ont été la cause prédominante des décès dans les provinces des prairies; dans les provinces maritimes, ce rang est occupé par la tuberculose, sous toutes ses formes. Dans la Colombie Britannique, où se trouvent un très grand nombre d'industries primaires, les décès résultant de "causes extérieures" (165-203) tiennent la seconde place, venant immédiatement après les "affections du cœur", qui occupent le premier rang dans cette province.

Pour l'ensemble du territoire, la proportion des décès causés par la tuberculose est descendue de 72·9 par 1,000 en 1921, à 70·4 en 1922; au contraire, le cancer qui, en 1921, avait causé 73·5 décès par 1,000 est monté, en 1922, à 76·0.

Le tableau XXXIII répartit par sexe et par groupes d'âge les décès attribués aux causes principales et établit leur proportion par 1,000 décès. On y voit que sur 1,000 décès de jeunes garçons âgés de moins de cinq ans, 363 sont attribués aux "maladies de la première enfance" (nos 160-163 de la liste internationale) lesquelles comprennent la "débilité congénitale, la "naissance prématurée," les "blessures pendant l'accouchement" et le "défaut de soins"; chez les filles du même âge, les mêmes causes n'ont amené que 343 décès par 1,000. Après celles-ci la cause la plus importante des décès d'enfants de moins de 5 ans furent la diarrhée et entérite, avec 148·3 décès par 1,000 chez les garçons et 150·0 chez les filles, puis la pneumonie qui emporta une proportion de 134·2 garçons et 136·4 filles. Ces trois causes réunies réclament plus de 60 p.c. de la totalité des décès des deux sexes à cet âge (causes spécifiées).

Dans le groupe de 5 à 14 ans, la plus lourde proportion des décès chez les garçons est due aux "accidents" (nos 175-203 de la liste internationale) atteignant presque 207 par 1,000; viennent ensuite la diphtérie, avec une proportion de 141·3 et la pneumonie avec près de 79 par 1,000; par contre, chez les filles, les décès dus aux accidents n'ont pas dépassé 77 par 1,000, tandis que la diphtérie se chiffre par 180·8. Disons tout de suite que dans chaque groupe d'âge, la proportion des décès dus aux accidents est beaucoup plus grande chez le sexe masculin que chez l'autre. La proportion des décès causés par la grippe, la tuberculose ou les "affections du cœur" est beaucoup plus grande chez les filles que parmi les garçons de ce groupe d'âge. Remarquons que c'est à cet âge que la diphtérie prélève son plus lourd tribut.

Dans le groupe d'âge de 15 à 29 ans, la plus forte proportion des décès chez l'un et l'autre sexe, appartient à la tuberculose, qui emporte 274 jeunes hommes et 338 jeunes femmes par 1,000 décès dont la cause est spécifiée.

Dans le groupe d'âge de 30 à 49 ans, en excluant les accidents, la tuberculose se place encore au premier rang et le cancer occupe la seconde place chez les deux sexes. C'est à cet âge que le cancer exerce surtout ses ravages parmi les femmes, cette cause dépassant alors la centaine. C'est également dans ce groupe d'âge que les décès dus aux "affections du cœur" présentent une augmentation marquée sur les âges moins avancés.

Chez les personnes de 50 ans et plus, les "affections du cœur" le cancer et la pneumonie, dans cet ordre, représentent la proportion la plus considérable des décès par 1,000 causes.

Dans le tableau XXXIV on trouve le taux de la mortalité, par 100,000 âmes, et par principales causes, tant pour l'ensemble des huit provinces que pour chacune d'elles. Le fait le plus saillant qui ressort de ce tableau, c'est le taux élevé de la mortalité attribuée à la tuberculose dans les provinces maritimes, comparativement aux provinces des prairies. Dans chacune des trois provinces qui baignent l'Atlantique, ce taux fut supérieur à 100 par 100,000 âmes, soit 127 dans l'île du Prince-Edouard, 131 dans la Nouvelle-Ecosse et 106 dans le Nouveau-Brunswick. Dans la Colombie Britannique, baignée par le Pacifique, on relève 94 décès provenant de cette cause par 100,000 âmes, tandis que dans Ontario il n'y en a plus que 67, au Manitoba

60, dans l'Alberta 51 et enfin dans la Saskatchewan 44. Le cancer, lui aussi, fut moins meurtrier dans les provinces des prairies que dans les autres. Même observation en ce qui concerne la pneumonie et les "affections du cœur". Mais c'est le contraire qui se produit si l'on considère les "maladies du premier âge", la Colombie Britannique, l'île du Prince-Edouard et la Nouvelle-Ecosse, dans cet ordre, présentant le taux le plus bas. Pour l'ensemble des huit provinces soumises à la statistique, les "affections du cœur" sont la seule cause de décès dont le taux par 100,000 âmes atteigne ou dépasse 100.

MARIAGES

Il a été célébré en 1922, dans les huit provinces, 47,811 mariages, comparativement à 51,073 en 1921 et 59,344 en 1920, soit 3,262 de moins qu'en 1921 et 11,533 de moins qu'en 1920. Ce déclin s'est manifesté dans toutes les provinces, sauf l'île du Prince-Edouard, qui présente un léger accroissement sur l'année précédente.

Répartition mensuelle des mariages.—On trouve dans le tableau XXXV une répartition proportionnelle des mariages pour chacun des mois de l'année. Dans l'ensemble des huit provinces, c'est le mois de juin qui prédomine avec 12·6 p.c. de la totalité des mariages de l'année. Son rival fut le mois de septembre, avec 10·5 p.c. Si l'on considère les provinces isolément, on constate qu'en Nouvelle-Ecosse et au Nouveau-Brunswick le plus grand nombre des mariages ont eu lieu en septembre, tandis que dans l'île du Prince-Edouard et les provinces des prairies, c'est le mois de novembre qui occupe la première place. Dans les deux autres provinces, cet honneur échoit au mois de juin. Dans l'ensemble, le mois où l'on se marie le moins est mars, avec 5·5 p.c. du total; il en est ainsi dans six provinces, mais c'est le mois de mai qui est au bas de l'échelle dans la Saskatchewan et l'Alberta.

TABLEAU XXXV.—PROPORTION DES MARIAGES, PAR CHAQUE MOIS, DANS LES PROVINCES, EN 1922

—	Total	I. P.-E.	N.-E.	N.-B.	Ont.	Man.	Sask.	Alberta	C. B.

Décembre	8·9	8·1	6·9	6·7	8·3	8·6	12·4	10·6	9·4
Total pour 1922	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**	**100·0**

État civil des conjoints.—Sur 1,000 hommes ayant contracté mariage en 1922, il y avait 892 célibataires, 100 veufs et 8 divorcés. Quant à leurs compagnes, elles se classifient ainsi: 909 célibataires, 83 veuves et 8 divorcées.

La répartition proportionnelle des mariages selon l'état civil des conjoints fait l'objet du tableau XXXVI. On a laissé de côté ce qui se rapporte aux divorcés, les mariages dans lesquels ceux-ci figurent ne représentant que 1·6 p.c. de la totalité.

TABLEAU XXXVI.—RÉPARTITION PROPORTIONNELLE DES MARIAGES SELON L'ÉTAT CIVIL DES CONJOINTS, À L'EXCLUSION DES DIVORCÉS, PAR PROVINCES, EN 1922

Provinces	Total	Célibataires et		Veufs et	
		Célibataires	Veuves	Célibataires	Veuves
Ile du Prince-Edouard	1,000	886·0	13·8	76·0	24·2
Nouvelle-Ecosse	1,000	852·9	39·7	67·5	40·0
Nouveau-Brunswick	1,000	828·9	44·1	78·1	48·9
Ontario	1,000	867·5	35·8	56·5	40·3
Manitoba	1,000	854·1	44·8	63·2	38·0
Saskatchewan	1,000	862·9	45·8	57·0	34·4
Alberta	1,000	849·3	56·8	57·8	36·1
Colombie Britannique	1,000	822·5	71·6	60·1	45·8
Total, 1922	**1,000**	**857·6**	**42·8**	**59·8**	**39·8**
1921	**1,000**	**843·3**	**48·6**	**64·6**	**43·6**

Age des conjoints.—On constate que la moyenne de l'âge des mariés, en 1922, s'établit à 29·9 ans et celle des mariées à 25·4, c'est-à-dire que l'époux a, en moyenne, 4·5 ans de plus que sa femme. On remarquera que lorsque les conjoints sont groupés selon l'âge du marié, la moyenne de la différence d'âge entre les époux est moindre pour les groupes plus jeunes que pour les plus âgés; en effet, il s'établit à 1·9 an, pour les jeunes mariés de 21 à 25 ans et à 10·0 ans pour les mariés de 46 à 50 ans. Ceci est logique, puisque l'âge du marié est généralement plus élevé que celui de la femme, par conséquent, plus son âge est avancé, plus s'élargit la possibilité de différence entre l'âge de sa femme et le sien. Par contre, lorsque les conjoints sont groupés selon l'âge de la femme, on remarque, avec moins de régularité toutefois que dans le cas précédent, que les fiancées les plus âgées ont une tendance générale à épouser des hommes dont l'âge se rapproche du leur, tendance qui n'existe pas chez les filles plus jeunes.

TABLEAU XXXVII.—DIFFÉRENCE D'ÂGE ENTRE LES ÉPOUX

Par groupes d'âge des maris				Par groupes d'âge des femmes			
Groupes d'âge des mariés	Moyenne de l'âge des maris	Moyenne de l'âge des femmes	Moyenne de l'excédent d'âge des maris	Groupes d'âge des mariées	Moyenne de l'âge des femmes	Moyenne de l'âge des maris	Moyenne de l'excédent d'âge des maris
Tous mariés	**29·9**	**25·4**	**4·5**	**Toutes mariées**	**25·4**	**29·9**	**4·5**
Moins de 21 ans	19·9	19·8	0·1	Moins de 21 ans	19·1	25·1	6·0
21–25 ans	23·5	21·6	1·9	21–25 ans	23·2	27·4	4·2
26–30 "	28·3	23·9	4·4	26–30 "	28·2	31·6	3·4
31–35 "	33·3	26·7	6·6	31–35 "	33·3	36·5	3·2
36–40 "	38·3	30·2	8·1	36–40 "	38·4	41·6	3·2
41–45 "	43·3	34·5	8·8	41–45 "	43·5	47·2	3·7
46–50 "	48·4	38·4	10·0	46–50 "	48·3	52·6	4·3
51 ans et plus	59·2	48·2	11·0	51 ans et plus	58·3	61·3	3·0

L'âge moyen de chacun des jeunes époux, par provinces, est indiqué dans le tableau suivant:

TABLEAU XXXVIII.—ÂGE MOYEN DES CONJOINTS EN 1922

Provinces	Âge moyen des maris	Âge moyen des femmes	Moyenne de l'excédent d'âge des maris
Ile du Prince-Edouard	30·3	25·9	4·4
Nouvelle-Ecosse	29·6	25·1	4·5
Nouveau-Brunswick	29·7	24·8	4·9
Ontario	29·6	25·7	3·9
Manitoba	30·1	25·1	5·0
Saskatchewan	29·7	24·2	5·5
Alberta	30·2	24·8	5·4
Colombie Britannique	32·0	26·9	5·1
Total	**29·9**	**25·4**	**4·5**

Lieu de naissance des conjoints.—Dans les provinces des prairies et dans la Colombie Britannique, la majorité des nouveaux maris n'étaient pas de naissance canadienne et il en était ainsi pour les jeunes femmes de la Colombie Britannique, l'Alberta et la Saskatchewan. Dans les provinces de l'est, les jeunes époux des deux sexes nés au Canada présentent une prédominance marquée. Pour l'ensemble des huit provinces, 60 p.c. des jeunes maris et 63·6 p.c. des jeunes femmes étaient nés au Canada.

Le tableau XXXIX donne le nombre des mariages par 1,000 personnes, dans chacune des provinces, ainsi que la répartition proportionnelle des conjoints, selon leur lieu de naissance.

TABLEAU XXXIX.—MARIAGES CLASSIFIÉS PAR LE LIEU DE NAISSANCE DES CONJOINTS, EN 1922 ET 1921

Provinces		Population[1]	Mariages		Répartition proportionnelle des jeunes époux, par lieu de naissance					
			Total	Par 1,000 âmes	Nés dans la province qu'ils habitent		Nés dans les autres provinces		Nés ailleurs

Int. list No.	Causes of Death — Causes de décès		Ages: Total	Under 1 year — Moins de 1 an	1 year — 1 an	2 years — 2 ans	3 years — 2 ans	4 years — 4 ans	5 to 9 years — 5 à 9 ans	10 to 14 years — 10 à 14 ans	15 to 19 years — 15 à 19 ans
	CLASS I-con.—**CLASSE I**-fin										
44	Cancer of the stomach and liver—Cancer de l'estomac et du foie.	M.	99	–	–	–	–	–	–	–	–
		F.	57	–	–	–	–	1	–	–	–
45	Cancer of the peritoneum, intestines and rectum—Cancer du péritoine, des intestins et du rectum.	M.	29	–	–	–	–	–	–	–	–
		F.	14	–	–	–	–	–	–	–	–
46	Cancer of the female genital organs—Cancer des organes génitaux de la femme.	F.	25	–	–	–	–	–	–	–	–
47	Cancer of the breast—Cancer du sein	F.	24	–	–	–	–	–	–	–	–
48	Cancer of the skin—Cancer de la peau	M.	4	–	–	–	–	–	–	–	–
		F.	1	–	–	–	–	–	1	–	–
49	Cancer of the unspecified organs—Cancer d'organes non-spécifiés.	M.	54	–	–	–	–	–	1	–	1
		F.	27	–	–	1	–	–	1	–	–
50	Benign tumours and tumours not returned as malignant (tumours of female genital organs excepted)—Tumeurs bénignes et autres tumeurs non-données comme malignes (tumeurs des organes génitaux de la femme exceptées).	M.	–	–	–	–	–	–	–	–	–
		F.	2	–	–	–	–	–	–	–	–
51	Acute Rheumatic fever—Rhumatisme articulaire aigu fébrile.	M.	16	–	–	–	–	–	3	4	3
		F.	12	–	–	–	–	–	3	4	–
52	Chronic rheumatism, osteo-arthritis, gout—Rhumatisme chronique et goutte.	M.	6	–	–	–	–	–	–	–	–
		F.	6	–	–	–	–	–	–	–	–
56	Rickets—Rachitisme	M.	6	2	3	1	–	–	–	–	–
		F.	3	3	–	–	–	–	–	–	–
57	Diabetes mellitus—Diabète	M.	24	–	–	1	–	–	1	1	2
		F.	20	–	–	–	1	–	2	3	–
58	Anaemia, Chlorosis—Anémie Chlorose	M.	16	–	–	–	–	–	–	–	–
		F.	16	–	1	–	–	–	2	1	–
	(a) Pernicious anaemia—Anémie pernicieuse	M.	16	–	–	–	–	–	–	–	–
		F.	10	–	–	–	–	–	–	–	–
	(b) Other anaemias and chlorosis—Autres anémies et chloroses.	M.	–	–	–	–	–	–	–	–	–
		F.	6	–	1	–	–	–	2	1	–
60	Diseases of the thyroid gland—Affections de la glande thyroïde.	M.	2	–	–	–	–	–	–	–	1
		F.	16	–	–	–	–	–	–	–	–
	(a) Exophthalmic goitre—Goitre exophtalmique.	M.	1	–	–	–	–	–	–	–	–
		F.	11	–	–	–	–	–	–	–	–
	(b) Other diseases of the thyroid gland—Autres affections de la glande thyroïde.	M.	1	–	–	–	–	–	–	–	1
		F.	5	–	–	–	–	–	–	–	–
62	Diseases of the thymus—Affections du thymus	M.	1	1	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
63	Diseases of the adrenals (Addison's disease)—Maladies des glandes surrenales (maladie d'Addison).	M.	1	–	–	–	–	–	–	–	–
		F.	2	–	–	–	–	–	–	–	–
65	Leukaemia lymphadenoma—Leucémie lymphadenie.	M.	3	–	–	–	–	–	1	–	–
		F.	2	–	–	–	–	–	1	–	–
	(a) Leukaemia—Leucémie	M.	1	–	–	–	–	–	1	–	–
		F.	2	–	–	–	–	–	1	–	–
	(b) Lymphadenoma (Hodgkin's disease)—Lymphadénie (maladie d'Hodgkin).	M.	2	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
66	Alcoholism (acute or chronic)—Alcoolisme (aigu ou chronique).	M.	11	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
67	Chronic poisoning by mineral substances—Empoisonnements chroniques par substances minérales.	M.	1	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
	(a) Chronic lead poisoning—Empoisonnement chronique par le plomb.	M.	–	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
	(b) Others under this title—Autres sous ce titre	M.	1	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
68	Chronic poisoning by organic substances—Empoisonnements chroniques par substances organiques.	M.	1	–	–	–	–	–	–	–	–
		F.	–	–	–	–	–	–	–	–	–
69	Other general diseases—Autres maladies générales.	M.	2	1	–	–	1	–	–	–	–
		F.	2	2	–	–	–	–	–	–	–
	CLASS II—DISEASES OE THE NERVOUS SYSTEM AND SENSE ORGANS—CLASSE II—AFFECTIONS DU SYSTEME NERVEUX ET DES ORGANES DES SENS.	**Total**	**391**	**116**	**16**	**9**	**2**	**2**	**18**	**4**	**5**

APPENDIX

SCHEDULE OF CENSUS DIVISIONS IN PRAIRIE PROVINCES

There being no fixed political divisions in Manitoba, Saskatchewan and Alberta corresponding to counties in Eastern Canada, it was deemed advisable, in compiling and publishing the results of the Census of 1921, to divide these provinces for statistical purposes into "Census Divisions", each containing a certain number of rural municipalities, "local improvement districts", cities, towns and incorporated villages. The object of this demarcation was to obtain permanent units smaller than the provinces for comparisons extending over a number of years. The same "Divisions" have been adopted in the present Report.

Maps are inserted, showing the boundaries of the "Divisions" by red lines; the municipalities contained within "Divisions" by heavy black lines and the townships within municipalities by faint black lines. The numbers enclosed in red circles on the maps refer to the numbers assigned to the "Divisions"; the black figures refer to municipalities or local improvement districts (L.I.D.) and correspond to the numbers under which the Census data for these areas are given in the tables. When the municipality has a name, it, as well as the numerical designation, is printed in the stub to the tables.

The following schedule gives the rural municipalities by name and number (the latter in parenthesis), together with the cities, towns and villages comprised within each "Census Division." Local Improvement Districts and Unorganized Territorial Units in Saskatchewan and Alberta are given by number only.

MANITOBA

Division No. 1. Comprises the municipalities of Birch River (1), Hanover (2), La Broquerie (3), Piney (4), Ste. Anne (5), Sprague (6), Stuartburn (7), Taché (8); Unorganized parts East of the Principal Meridian between townships 3 and 10 (9).

Division No. 2 comprises the municipalities of De Salaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Indian Reserves—Roseau Band; Towns—Emerson, Morden, Morris; Villages—Gretna, Plum Coulee, Winkler.

Division No. 3 comprises the municipalities of Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Indian Reserves—Swan Lake; Towns—Killarney; Villages—Manitou, Pilot Mound.

Division No. 4 comprises the municipalities of Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Towns—Boissevain, Deloraine, Hartney, Melita: Villages—Napinka.

Division No. 5 comprises the municipalities of Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St. Clements (5), St. Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Unorganized parts East of the Principal Meridian between townships 9 and 21 (10); Indian Reserves—Fort Alexander, Brokenhead; Towns—Beauséjour, Transcona; Villages—Lyall.

Division No. 6 comprises the municipalities of Cartier (1), Charleswood (2), Dufferin (3), Fort Garry (4), Grey (5), Macdonald (6), Portage la Prairie (7), Ritchot (8), St. Vital (9); Indian Reserves—Long Plain, Sioux Village; Cities—Portage la Prairie, St. Boniface, Winnipeg; Towns—Carman, Tuxedo.

Division No. 7 comprises the municipalities of Cornwallis (1), Cypress North (2), Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Indian Reserves—Indian Gardens; Cities—Brandon; Towns—Carberry; Villages—Wawanesa.

Division No. 8 comprises the municipalities of Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5), Whitehead (6), Woodworth (7); Indian Reserves—Oak Lake, Oak River; Towns—Oak Lake, Rivers, Souris, Virden; Villages—Elkhorn.

Division No. 9 comprises the municipalities of Assiniboia (1), Kildonan West (2), Rockwood (3), Rosser (4), St. Andrews (5), St. Francois Xavier (6), St. James (7), St. Paul West (8), Woodlands (9); Towns—Selkirk, Stonewall, Winnipeg Beach.

Division No. 10 comprises the municipalities of Glenella (1), Lakeview (2), Langford (3), Lansdowne (4), McCreary (5), Rosedale (6), Westbourne (7); Indian Reserves—Lake View; Towns—Gladstone, Neepawa.

Division No. 11 comprises the municipalities of Archie (1), Birtle (2), Blanchard (3), Clanwilliam (4), Ellice (5), Hamiota (6), Harrison (7), Miniota (8), Minto (9), Odanah (10), Saskatchewan (11), Shoal Lake (12), Strathclair (13); Indian Reserves—Bird Tail, Rolling River, Keeseekoowenins; Towns—Birtle, Minnedosa, Rapid City; Villages—Foxwarren, Hamiota, Shoal Lake.

Division No. 12 comprises the municipalities of Armstrong (1), Bifrost (2), Chatfield (3), Coldwell (4), Eriksdale (5), Fisher Branch (6), Gimli (7), Kreuzburg (8), St. Laurent (9), Siglunes (10), Woodlea (11); Indian Reserves—Dog Creek; Villages—Gimli.

Division No. 13.—comprises the municipalities of Dauphin (1), Ethelbert (2), Lawrence (3), Mossy River (4), Ochre River (5), Ste. Rose (6); Unorganized parts north of township 20 and lying between the eastern boundaries of the municipalities of Ste. Rose and Lawrence, and Lake Manitoba (7); Indian Reserves—Ebb & Flow, Crane River; Towns—Dauphin; Villages—Winnipegosis.

Division No. 14 comprises the municipalities of Boulton (1), Gilbert Plains (2), Grandview (3), Hillsburg (4), Rossburn (5), Russell (6), Shellmouth (7), Shell River (8), Silver Creek (9): Unorganized

territory between townships 18 and 23 and between ranges 16 and 26 west principal meridian (10); Indian Reserves—Valley River, Gamblers, Lizard Point; Towns—Grandview, Russell; Villages—Binscarth, Gilbert Plains, Roblin, Rossburn.

Division No. 15 comprises the municipalities of Minitonas (1), Swan River (2); Unorganized parts between townships 27 and 35 and between the western provincial boundary and range 23 west principal meridian (3); Towns—Swan River.

Division No. 16 comprises unorganized northern parts; Indian Reserves—Norway House Agency, Fisher River Agency, Pas Agency, Black River, Hollow Water, Fairford, Lake St. Martin, Little Saskatchewan, Pine Creek, Shoal River, Waterhen; Towns—The Pas.

SASKATCHEWAN

Division No. 1 comprises the municipalities of Argyle (1), Mount Pleasant (2), Enniskillen (3), Coalfields (4), Estevan (5), Storthoaks (31), Reciprocity (32), Moose Creek (33), Browning (34), Benson (35), Antler (61), Moose Mountain (63), Brock (64), Tecumseh (65), Maryfield (91), Walpole (92), Wawken (93), Hazelwood (94), Golden West (95); Indian Reserves—Moose Mountain; Towns—Alameda, Arcola Carlyle, Carnduff, Estevan, Oxbow,; Villages—Antler, Bienfait, Carievale, Fairlight, Forget, Frobisher, Gainsboro, Glen Ewen, Heward, Kennedy, Kisbey, Lampman, Manor, Maryfield, North Portal, Redvers, Roche Percee, Stoughton, Wawchope, Wawota.

Division No. 2 comprises the municipalities of Cambria (6), Souris Valley (7), LakeAlma (8), Surprise Valley (9), Happy Valley (10), Cymri (36), Lomond (37), Laurier (38), The Gap (39), Bengough (40), Griffin (66), Weyburn (67), Brokenshell (68), Norton (69), Key West (70), Fillmore (96) Wellington (97), Scott (98), Caledonia (99), Elmsthorpe (100); Cities—Weyburn; Towns—Milestone, Ogema, Radville, Yellow Grass; Villages—Amulet, Avonlea, Bengough, Bromhead, Ceylon, Colgate, Creelman, Fillmore, Forward, Goodwater, Griffin, Halbrite, Horizon, Khedive, Lang, Macoun, McTaggart, Midale, Osage, Pangman, Tribune, Truax, Tyvan.

Division No. 3 comprises the municipalities of Hart Butte (11), Poplar Valley (12), Willow Bunch (42), Waverley (44), Mankota (45), Glen McPherson (46), Excel (71), Lake of the Rivers (72),Stonehenge (73), Wood River (74), Pinto Creek (75), Auvergne (76), Terrell (101), Lake Johnson (102). Sutton (103), Gravelbourg (104), Glen Bain (105), Whiska Creek (106); Unorganized Territorial Units 13, 14, 15, 16, 43; Indian Reserves—Wood Mountain; Towns—Assiniboia, Gravelbourg; Villages—Aneroid, Ardill, Congress Ettington, Expanse, Hazenmore, Kincaid, Lafleche, Limerick, Mazenod, Meyronne, Mitchellton, Mossbank, Neville, Palmer, Ponteix, Readlyn, Spring Valley, Vanguard, Vantage, Verwood, Viceroy, Woodrow.

Division No. 4 comprises the municipalities of Lone Tree (18), Frontier (19), White Valley (49), Reno (51), Wise Creek (77), Grassy Creek (78), Arlington (79), Lac Pelletier (107), Bone Creek (108), Carmichael (109), Piapot (110), Maple Creek (111); Unorganized Territorial Units 17, 20, 21, 22, 47, 48, 50, 52, 80, 81, 82, 112; Towns—East End, Maple Creek, Shaunavon; Villages—Admiral, Cadillac, Carmichael, Consul, Dollard, Hatton, Piapot, Robsart, Scotsguard, Vidora.

Division No. 5 comprises the municipalities of Moosomin (121), Martin (122), Silverwood (123), Kingsley (124), Chester (125), Rocanville (151), Spy Hill (152), Willowdale (153), El Capo (154), Wolseley (155), Langenburg (181), Fertile Belt (183), Grayson (184), McLeod (185), Churchbridge (211), Saltcoats (213), Cana (214), Stanley (215); Indian Reserves—Crooked Lake Agency; Towns— Bredenbury, Broadview, Fleming, Grenfell, Lemberg, Melville, Moosomin, Saltcoats, Wapella, Whitewood, Wolseley; Villages—Atwater, Bangor, Birmingham, Churchbridge, Dubuc, Duff, Esterhazy, Fenwood, Glenavon, Goodeve, Grayson, Killaly, Kipling, Langenburg, MacNutt, Neudorf, Otthon, Rocanville, Spy Hill, Stockholm, Summerberry, Tantallon, Waldron, Welwyn, Windthorst.

Division No. 6 comprises the municipalities of Montmartre (126), Francis (127), Lajord (128), Bratts Lake (129), Redburn (130), Indian Head (156), South Qu'Appelle (157), Edenwold (158), Sherwood (159) Pense (160), Abernethy (186), North Qu'Appelle (187), Lumsden (189), Dufferin (190), Tullymet (216), Lipton (217), Cupar (218), Longlaketon (219), McKillop (220), Sarnia (221); Indian Reserve—Qu'Appelle Agency, Assiniboine Agency, File Hill Agency; Cities—Regina; Towns—Balgonie, Francis, Indian Head, Lumsden, Qu'Appelle, Rouleau, Sintaluta, Strasbourg; Villages—Abernethy, Balcarres, Belle Plaine, Bethune, Briercrest, B—Say—Tah, Bulyea, Chamberlain, Craven, Cupar, Dilke, Disley, Drinkwater, Dysart, Earl Grey, Edenwold, Findlater, Fort Qu'Appelle, Grand Coulee, Holdfast, Kendal, Kronau, Lebret, Lipton, Markinch, McLean, Montmartre, North Regina, Odessa, Pense, Penzance, Pilot Butte, Regina Beach, Sedley, Silton, Southey, Vibank, Wilcox.

Division No. 7 comprises the municipalities of Baildon (131), Hillsborough (132), Rodgers (133), Shamrock (134), Lawtonia (135), Coulee (136), Moosejaw (161), Caron (162), Wheatlands (163), Chaplin (164), Morse 165)(, Excelsior (166), Marquis (191), Eyebrow (193), Enfield (194), Vermilion Hills (195), Craik (222), Huron (223),Maple Bush (224), Canaan (225), Victory (226), Coteau (255), King George (256); Cities—Moose Jaw; Towns—Caron, Craik, Herbert, Morse, Mortlach; Villages—Aylesbury, Birsay, Bridgeford, Brownlee, Central Butte, Chaplin, Dunblane, Ernfold, Eyebrow, Hodgeville, Keeler, Lawson, Lucky Lake, Marquis, Mawer, Parkbeg, Riverhurst, Rush Lake, Tugaske, Tuxford, Waldeck.

Division No. 8 comprises the municipalities of Swift Current (137), Webb (138), Gull Lake (139), Big Stick (141), Bitter Lake (142), Saskatchewan Landing (167), Riverside (168), Pittville (169), Keeblerville (171), Enterprise (172), Lacadena (228), Miry Creek (229), Clinworth (230), Happyland (231), Deer Forks (232), Monet (257) Fairview (258), Snipe Lake (259), Newcombe (260), Royal Canadian (261), Mantario (262); Unorganized Territorial Units 140, 170, 227; Cities—Swift Current; Towns—Cabri, Gull Lake, Leader; Villages—Abbey, Burstall, Eatonia, Elrose, Eston, Estuary, Glidden, Hughton, Lancer, Lemsford, Pennant, Plato, Portreeve, Prelate, Richlea, Sceptre, Shackleton, Success, Tompkins, Webb.

Division No. 9 comprises the municipalities of Calder (241), Wallace (243), Orkney (244), Garry (245) , Cote (271), Sliding Hills (273), Good Lake (274), Insinger (275), St. Phillips (301), Keys (303), Buchanan (304), Invermay (305), Livingstone (331), Clayton (333), Preeceville (334), Hazel Dell (335); Indian Reserves—Pelly Agency; Towns—Canora, Kamsack, Yorkton,; Villages—Arran, Buchanan, Calder, Hyas, Insinger, Invermay, Norquay, Pelley, Preeceville, Rama, Rhein, Sheho, Springside, Stenen, Stornoway, Sturgis, Theodore, Togo, Veregin, Willowbrook, Wroxton.

Division No. 10 comprises the municipalities of Ituna Bon Accord (246), Kelross (247), Touchwood (248), Mi'lington (249), Beaver (276), Emerald (277), Kutawa (278), Mount Hope (279), Foam Lake (306), Elfros (307), Big Quill (308), Prairie Rose (309), Sasman (336), Lakeview (337), Lakeside (338), Ayr (339); Indian Reserves—Muscowequans, Gordon, Day Star, Poorman, Fishing Lake; Towns—Wadena, Watson, Wynyard; Villages—Dafoe, Elfros, Foam Lake, Hubbard, Ituna, Jansen, Jasmin, Kandahar, Kelliher, Kuroki, Leross, Leslie, Lestock, Margo, Punnichy, Quill Lake, Quinton, Raymore, Semans, Tate.

Division No. 11 comprises the municipalities of Last Mountain Valley (250), Big Arm (251), Arm River (252), Willner (253), Loreburn (254), Wreford (280), Wood Creek (281), McCraney (282), Rosedale (283), Rudy (284), Osborne (310), Morris (312), Lost River (313), Dundurn (314), Wolverine (340), Viscount (341), Colonsay (342), Blucher (343), Cory (344); Indian Reserves—Moose Woods; Cities—Saskatoon; Towns—Davidson, Govan Hanley, Lanigan, Nokomis, Outlook, Sutherland, Watrous; Villages—Allan, Bladworth, Bradwell, Broderick, Clavet, Colonsay, Drake, Dundurn, Duval, Elbow, Elstow, Girvin, Glenside, Guernsey, Hawarden, Imperial, Kenaston, Liberty, Lockwood, Loreburn, Meacham, Simpson, Strongfield, Venn, Viscount, Young, Zelma.

Division No. 12 comprises the municipalities of Fertile Valley (285), Milden (286), St. Andrews (287), Pleasant Valley (288), Montrose (315), Harris (316), Marriot (317), Mountain View (318), Loganton (345), Perdue (346), Biggar (347), Bushville (348), Park (375), Eagle Creek (376), Glenside (377), Rosemount (378), Prairie (408), Battle River (438); Indian Reserves—Mosquito, Sweet Grass, Red Pheasant; Towns—Asquith, Battleford, Biggar, Delisle, Langham, Rosetown, Zealandia; Villages—Ardath, Bounty, Conquest, Delmas, Dinsmore, Harris, Herschel, Kinley, Laura, Leney, Macrorie, McGee, Milden, Perdue, Sovereign, Springwater, Stranraer, Swanson, Tessier, Vanscoy, Wiseton.

Division No. 13 comprises the municipalities of Hillsburg (289), Kindersley (290), Elma (291), Milton (292), Winslow (319), Oakdale (320), Prairiedale (321), Antelope Park (322), Grandview (349), Mariposa (350), Progress (351), Hearts Hill (352), Reford (379), Tramping Lake (380), Grass Lake (381), Eye Hill, (382), Buffalo (409), Round Valley (410), Senlac (411), Cut Knife (439), Hillsdale (440), Manitou Lake (442); Indian Reserves—Poundmaker, Little Pine, Lucky Man; Towns—Alsask, Kerrobert, Kindersley, Mack in, Scott, Unity, Wilkie; Villages—Adanac, Brock, Cavell, Cut Knife, Denzil, Dodsland, Druid, Evesham, Flaxcombe, Handel, Kelfield, Landis, Leipzig, Loverna, Luseland, Major, Marengo, Netherhill, Plenty, Rock Haven, Salvador, Senlac, Smiley, Tramping Lake.

Division No. 14 comprises the municipalities of Kelvington (366), Ponass Lake (367), Spalding, (368) Barrier Valley (397), Pleasantdale (398), Bjorkdale (426), Tisdale (427), Star City (428), Arborfield (456), Connaught (457), Willow Creek (458), Moose Range (486), Nipawin (487); Unorganized Territorial Units 361, 363, 364, 365, 391, 393, 394, 395, 396, 421, 423, 424, 425, 451, 453, 454, 455, 481, 483, 484, 485, 488, 511, 513, 514, 515, 516, 517, 518; Indian Reserves—Kinistino, Nut Lake, Shoal Lake, Red Earth; Towns—Melfort, Tisdale; Villages—Hudson Bay Jct., Naicam, Star City.

Division No. 15 comprises the municipalities of St. Peter (369), Humboldt (370), Bayne (371), Grant (372), Aberdeen (373), Warman (374), Lake Lenore (399), Three Lakes (400), Hoodoo (401), Fish Creek (402), Rosthern (403), Laird (404), Carrot River (429), Invergordon (430), St. Louis (431), Weldon (459), Birch Hills (460), Prince Albert (461), Duck Lake (463), Russia (490), Buckland (491); Unorganized Territorial Units 489, 519, 520, 521; Indian Reserves—Duck Lake Boarding School, One Arrow Band, Okemanis Band, John Smith Band, James Smith Band, Wahpaton Band; Cities—Prince Albert; Towns—Duck Lake, Humboldt, Rosthern, Vonda; Villages—Aberdeen, Beatty, Birch Hills, Bruno, Cudworth, Dalmeny, Dana, Domremy, Englefeld, Hague, Hepburn, Howell, Kinistino, Laird, Lake Lenore, Muenster, Osler, St. Brieux, St. Gregor, Wakaw, Waldheim, Warman, Weldon.

Division No. 16 comprises the municipalities of Great Bend (405), Mayfield (406) Blaine Lake (434), Redberry (435), Douglas (436), North Battleford (437), Leask (464), Royal (465), Meeting Lake (466), Round Hill (467), Rozilee (493), Canwood (494) Shell River (495), Medstead (497); Unorganized Territorial Units 496, 523, 524, 525, 526, 527, 553, 554, 555, 556, 557, 587; Indian Reserves—Carleton Agency, Thunder Child, Sturgeon Lake; Cities—North Battleford; Towns—Radisson; Villages—Blaine Lake, Borden, Canwood, Denholm, Fielding, Hafford, Krydor, Leask, Marcelin, Maymount, Parkside, Richard, Ruddell, Shellbrook, Speers.

Division No. 17 comprises the municipalities of Meota (468), Turtle River (469), Paynton (470), Eldon (471), Wilton (472), Parkdale (498), Mervin (499), Paradise Hill (501), Britannia (502), Bright Sand (529), North Star (531); Unorganized Territorial Units 528, 532, 558, 559, 561, 562, 588, 589, 591, 592; Indian Reserves—Moosomin, Saultans, Meadow Lake, Waterhen, Onion Lake Agency; Towns—Lloydminster (part); Villages—Edam, Lashburn, Maidstone, Marshall, Meota, Mervin, Paynton, Turtleford, Vawn, Waseca.

Division No. 18 comprises Northern unorganized parts; Indian Reserves—Fond du Lac Band, William Charles Band, Cumberland Band, Pine Bluff Band, Lac la Ronge, Lac Stanley, South End, Pelican Narrows, English River, Clear Lake, Canoe Lake.

ALBERTA

Division No. 1 comprises the municipalities of Flowery Plain (33), Burlington (34), Warner (36), Forty Mile (64), Eureka (65), Excelsior (92), Bow Island (94); Local Improvement Districts 1, 2, 3, 4, 5, 6, 31, 32, 35, 61, 62, 63, 66, 91, 93; Cities—Medicine Hat; Towns—Bow Island, Irvine, Taber; Villages—Burdett, Grassy Lake, Milk River, Walsh, Warner.

Division No. 2 comprises the municipalities of Cochrane (10), Kerr (39), Castle River (40), Bright (69), Livingstone (70), Argyle (99); Local Improvement Districts, 7, 8, 9 37, 38, 67, 68, 71, 100, 101; Indian Reserves—Peigan Reserve, Blood Agency; Cities—Lethbridge; Towns—Blairmore, Cardston, Claresholm, Coleman, Diamond City, Granum, Macleod, Magrath, Pincher Creek, Raymond; Villages—Coaldale, Coalhurst, Commerce, Cowley, Frank, Monarch, Pincher City, Stirling.

Division No. 3 comprises the municipalities of McLean (96), Sunny South (123), King (153), Britannia (183); Local Improvement Districts, 121, 122, 124, 125, 126, 151, 152, 154, 155, 156, 181, 182, 184, 185, 186, 211; Towns—Bassano, Brooks, Redcliffe; Villages—Alderson, Duchess, Empress, Enchant, Jenner, Retlaw, Suffield.

Division No. 4 comprises the municipalities of Little Bow (98), Clifton (127), Harmony (128), Clear Lake, (129), Marquis (157), Royal (158), Riley (159), Dinton, (189), Sheep Creek (190), Stockland (191); Local Improvement Districts—97, 130, 131, 160, 161, 192; Unorganized parts between townships 17 and 22 west to the provincial boundary; Towns—Carmangay, High River, Nanton, Okotoks, Staveley, Vulcan; Villages—Barons, Blackie, Cayley, Champion, Lomond, Nobleford.

Division No. 5 comprises the municipalities of Berry Creek (214), Bulyea (215), Acadia (241), Cereal (242), Colholme (243), Flowerdale (244), Lonebutte (245), Bertawan (271), Golden Centre (272), Sounding Creek (273), Richdale (274), Hand Hills (275), Michichi (277), Canmer (301), Stewart (302), Wiste (303), Hiram (304), Dowling Lake (305), Lambton (306), Star Land (307); Local Improvement Districts—212, 213, 246; Towns—Drumheller, Hanna, Youngstown; Villages—Cereal, Chinook, Craigmyle, Delia, Morrin, Munson, Oyen, Richdale, Rumsey.

Division No. 6 comprises the municipalities of Blackfoot (218), Bow Valley (219), Shepard (220), Springbank (221), Grasswold (248), Keoma (249), Beddington (250), Carbon (278), Norquay (279), Rosebud (280), Beaver Dam (281), Ghost Pine (308), Stauffer (309), Mountain View (310), Westerdale (311); Local Improvement Districts 216, 217, 222, 247, 251, 252, 282; Unorganized parts between townships 21 and 31 west to the provincial boundary; Indian Reserves—Stony Reserve, Sarcee Reserve, Blackfoot Agency; Cities—Calgary, Banff (not incorporated); Towns—Didsbury, Gleichen, Olds, Strathmore; Villages—Acme, Airdrie, Beiseker, Carbon, Carstairs, Cochrane, Grossfield, Irricana, Langdon, Rockyford, Rosebud, Three Hills, Trochu.

Division No. 7 comprises the municipalities of Coronation (334), Sullivan Lake (335), Rosenheim (361), Hillcrest (362), Stocks (363), Flagstaff (364), Progress (365), Sifton (391), Vale (392), Huamha (393), Asquith (394), Wheatland (395), Ribstone (421), Gilt Edge (422), Battle River (423), Kinsella (424), Stirling (425), Iron Creek (455); Local Improvement Districts 331, 332, 333; Towns—Castor, Coronation. Hardisty, Wainwright; Villages—Alliance, Cadogan, Chauvin, Consort, Czar, Edgerton, Forestburg, Galahad, Hughenden, Irma, Killam, Lougheed, Monitor, Provost, Sedgewick, Strome, Veteran, Viking,

Division No. 8 comprises the municipalities of Success (336), Vimy (337), Hays (338), Pine Lake (339), Arthur (340), Dublin (366), Waverly (367), Haig (396), Lakeside (397), Lamerton (398), Crown (399), Melrose (426), Evergreen (427), Waterglen(428), Fertile Valley (429), Parkland (456), Lloyd George (457), Montgomery (458), Bigstone (459); Indian Reserves—Hoblema Agency; Cities—Red Deer, Wetaskiwin; Towns—Big Valley, Camrose, Daysland, Innisfail, Lacombe, Ponoka, Stettler; Villages—Alix, Bashaw, Bawlf, Bittern Lake, Blackfolds, Botha, Clive, Delburne, Donalda, Erskine, Ferintosh, Gadsby, Halkirk, Heisler, Millet, Mirror, New Norway, Ohaton, Penhold.

Division No. 9 comprises the municipalities of Waterloo (312), Poplar Grove (341), Raven (342), Prairie Creek (343), Golden West (371), Lorne (400), Lochearn (401), Blindman (430), Last West (431), Columbia (460); Local Improvement Districts 344, 374, 403, 432, 434, 461, 462; Unorganized Territorial Units 433, 463, 464; Unorganized parts between townships 30 and 47 west to the provincial boundary; Villages—Bentley, Bowden, North Red Deer, Rimbey, Rocky Mountain House, Sylvan Lake.

Division No. 10 comprises the municipalities of Merton (451), Grizzley Bear (452), Buffalo Coulee (453), Lake View (454), Wellington (481), Vermilion Valley (482), Melberta (483), Birch Lake (484), Patricia (485), Beaver Lake (486), Streamstown (511), Ethelwyn (512), Ukrainia (513), Sobor (514), Norma (515), The Pines (516), Eagle (545), Wostok (546), Leslie (547); Towns—Lloydminster (part), Vegreville, Vermilion; Villages—Bruderheim, Chipman, Holden, Innisfree, Islay, Kitscoty, Lamont, Lavoy, Mannville, Minburn, Mundare, Ryley.

Division No. 11 comprises the municipalities of Cornhill (487), Black Mud (488), Liberty (489), Pioneer (490), Clover Bar (517), Strathcona (518), Spruce Grove (519), Inga (520), Tomahawk (521), Sturgeon (548), Ray (549), Woodford (550), Morthen (551); Local Improvement District 491; Indian Reserves—Edmonton Agency; Cities—Edmonton; Towns—Beverley, Fort Saskatchewan, Leduc, Morinville, St. Albert, Stony Plain, Tofield; Villages—Alberta Beach, Seba Beach, Wabamun.

Division No. 12 comprises the municipalities of Rocky Rapids (522), Pembina (552), Kitchener (582); Local Improvement Districts 496, 523, 525, 526, 527, 553, 554, 555, 556, 557, 558, 583, 584, 585, 588, 612, 615, 616; Unorganized Territorial Units 493, 494, 495, 524, 586, 587; Unorganized parts between townships 46 and 57 west to the provincial boundary; Towns—Edson; Villages—Entwistle.

Division No. 13 comprises the municipalities of Lincoln (542), Laurier (543), Champlain (544), Boucher (572), St. Vincent (573), St. Lina (574), Wasel (575), Ashmont (605); Local Improvement Districts 541, 571, 601, 602, 603, 604, 631, 632, 633, 634, 635, 661, 663, 664, 666, 695; Unorganized Territorial Unit 662; Indian Reserves—Saddle Lake Agency, Frog Lake Reserve, White Fish Lake; Villages—St. Paul de Metis.

Division No. 14 comprises the municipalities of Smoky Lake (576), Unity (577), Opal (578), Hazelwood (579), Lockerbie (580), Pershing (581), Tawatinaw (608), Pibroch (609), Cartier (637), Nelson (638), Grosmont (668); Local Improvement Districts 606, 607, 610, 611, 636, 639, 640, 665, 667, 669, 696, 697, 698, 699, 726, 727, 729; Unorganized Territorial Unit 728; Town—Athabaska,; Villages—Clyde, Lac La Biche, Legal, Westlock.

Division No. 15 comprises Local Improvement Districts 613, 614. 641, 642, 643, 647, 670, 702, 705, 706, 707, 708, 709, 730, 731, 732, 733, 734, 735, 736, 737, 738, 764, 765, 766, 767, 794, 795, 796, 825, 826, 854, 855; Unorganized Territorial Units 617, 618, 619, 620, 621, 622, 644, 645, 646, 648, 671, 672, 673, 674, 675, 676, 677, 678, 679, 700, 701, 703, 704, 710, 824; Unorganized parts between townships 56 and 69 west to the provincial boundary, and the part of T 69 R 10 and 11 W 5th Meridian south of the Wapiti River; Indian Reserves—Grouard, Sturgeon Lake, Sawridge, Swan River, Drift Pile, Sucker Creek; Towns—Grouard, Peace River.

Division No. 16 comprises the municipalities of Grande Prairie (739), Bear Lake (740), Spirit River (829), Peace (857), Fairview (858), Local Improvement Districts 741, 742, 769, 770, 771, 772, 797, 800, 801, 827, 828, 830, 831, 859, 860, 861, 886, 887, 888, 889, 916, 917; Unorganized Territorial Units 890, 891, 918, 919; Unorganized parts between townships 86 and 90 and between U.T.U. 919 and the western provincial boundary; Indian Reserves—Saskatoon Lake, Moberly Lake, Hudson Hope, St. John, Dunvegan, Peace River; Towns—Grande Prairie; Villages—Clairmont, Spirit River.

Division No. 17 comprises the remainder of the province consisting of northern parts; Indian Reserves—Long Lake, Chipewyan, Little Red River, Boyer River, Upper Hay River, Wabaska, Fort Vermilion.

APPENDICE

DIVISIONS DE RECENSEMENT DANS LES PROVINCES DES PRAIRIES

Le Manitoba, la Saskatchewan et l'Alberta ne possédant pas de divisions politiques correspondant aux comtés de l'est du Canada, on a cru devoir, aux fins de la compilation et de la publication des résultats du recensement de 1921, diviser ces provinces, pour les besoins de la statistique, en "divisions de recensement", chacune de celles-ci contenant un certain nombre de municipalités rurales, de "districts d'améliorations locales", de cités, de villes et de villages incorporés. En établissant ces lignes de démarcation on a créé des unités territoriales permanentes, plus petites que les provinces et facilitant les comparaisons, pendant un certain nombre d'années. Ce sont ces unités territoriales que l'on trouvera dans le présent rapport.

Sur les cartes, ci-jointes les limites des divisions sont figurées par des lignes rouges, celle des municipalités qui sont contenues dans les divisions par d'épaisses lignes noires et celles des cantons par de minces lignes noires.

Les nombres entourés d'un cercle rouge sont les numéros donnés aux divisions; les chiffres en noir sont les numéros des municipalités ou des districts d'améliorations locales (marqués L.I.D.) ils correspondent aux numéros sous lesquels les données de recensement relatives à ces territoires figurent dans les tableaux. Lorsque la municipalité a un nom, ce nom accompagné d'un numéro, est imprimé sur la marge des tableaux.

On trouvera dans la liste qui suit l'énumération des municipalités rurales, par nom et numéro (ce dernier entre parenthèses) ainsi que les cités, villes et villages composant chacune des "divisions de recensement". Les districts d'améliorations locales et les unités des territoires inorganisés de la Saskatchewan et de l'Alberta sont indiqués simplement par un numéro.

MANITOBA

Division N° 1.—Elle comprend les municipalités de: Birch-River (1), Hanover (2), La Broquerie (3), Piney (4), Ste-Anne (5), Sprague (6), Stuartburn (7), Taché (8); Parties in organisées à l'est du méridien principal, entre les cantons 3 et 10 (9).

Division N° 2.—Elle comprend les municipalités de: De-Salaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Réserve indienne: Bande Roseau; Villes—Emerson, Morden, Morris; Villages—Gretna, Plum Coulée, Winkler.

Division N° 3.—Elle comprend les municipalités de: Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Réserve indienne: Swan Lake; Ville—Killarney; Villages—Manitou, Pilot Mound.

Division N° 4.—Elle comprend les municipalités de: Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Villes—Boissevain, Deloraine, Hartney, Melita; Village—Napinka.

Division N° 5.—Elle comprend les municipalités de: Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St-Clements (5), St-Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Parties inorganisées à l'est du méridien principal, entre les cantons de 9 à 21 (10); Réserves indiennes—Fort Alexander, Brokenhead; Villes—Beauséjour, Transcona; Village—Lyall.

Division N° 6.—Elle comprend les municipalités de: Cartier (1), Charleswood (2), Dufferin (3) Fort Garry (4), Grey (5), Macdonald (6), Portage la Prairie (7), Ritchot (8), St-Vital (9); Réserves indiennes—Long Plain, Sioux Village; Cités—Portage la Prairie, St-Boniface, Winnipeg; Villes—Carman, Tuxedo.

Division N° 7.—Elle comprend les municipalités de: Cornwallis (1), Cypress North (2) Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Réserve indienne—Indian Gardens; Cité—Brandon; Ville—Carberry; Village—Wawanesa.

Division N° 8.—Elle comprend les municipalités de: Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5); Whitehead (6), Woodworth (7); Réserves indiennes—Oak Lake, Oak River; Villes—Oak Lake, Rivers, Souris, Virden; Village—Elkhorn.
